Despite the reversal of America's fortune from the triumphalism of the Roaring Nineties to the gloom of the lost decade and the Great Depression, theoretical conceptions of US capitalism have remained surprisingly unchanged. In fact, if the crisis questioned the sustainability of the US capitalist paradigm, it did not fundamentally challenge academic theorization of American political economy. This book departs from the American political economy literature to identify three common myths that have shaped our conceptualization of US capitalism: its reduction to a state-market dyad dis-embedded from societal factors; the illusion of a weak state and the synchronic conception of the US variety of capitalism. To remedy these pitfalls, the authors propose a civilizational approach to American political economy at the crossroads between cultural studies, history, sociology and political science. Drawing together contributions from a rich variety of fields (from geography to cultural studies, political science and sociology) this work sheds a new light on America's "cultural political economy" combining theoretical reflection with empirical data and offering innovative perspectives on the crisis and renewal of American capitalism. As environmental concerns become more prevalent, it is important for today's youth to be exposed to green practices. The introduction of environmentally sound principles into educational systems and institutions helps establish a positive viewpoint on sustainability as well as promote green practices. Marketing the Green School: Form, Function, and the Future features the latest research surrounding the operational efficiency, financial and legal considerations, and effectiveness of environmentally friendly school systems, as well as the integration of environmental education curriculum. Investigating the impact a green environment has on student well-being and success, this book is an essential reference source for school superintendents, school business managers, contractors, architects, and civil engineers interested in the development and promotion of green initiatives in educational institutions.

Most Americans had no idea what Common Core was in 2013, according to polls. But it had been creeping into schools nationwide over the previous three years, and children were feeling its effects. They cried over math homework so mystifying their parents could not help them, even in elementary school. They read motley assortments of "informational text" instead of classic literature. They dreaded the high-stakes tests, in unfamiliar formats, that were increasingly controlling their classrooms. How did this latest and most sweeping "reform" of American education come in mostly under the radar? Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers, and it led to a big tangle of history and politics, intrigue and arrogance. She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K–12 classes, and how the Obama administration pressured states to adopt them. Thus a federalized education scheme took root, despite legal prohibitions against federal involvement in curriculum. Common Core and its testing regime were touted as "an absolute game-changer in public education," yet the evidence so far suggests that kids are actually learning less under it. Why, then, was such a costly and disruptive agenda imposed on the nation's schools? Who benefits? And how can citizens regain local self-governance in education, so their children's minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats? The Education Invasion offers answers and remedies.

Azmi Bishara's seminal study of the 2011 Egyptian Revolution chronicles in granular detail the lead up to the momentous uprisings and the subsequent transition and coup. The book critically investigates the social and economic conditions that formed the backdrop to the revolution and the complex challenges posed by the transition from authoritarianism to democracy. Part One, 'From July Coup to January Revolution', goes back to what is called the '1952 revolution' or the '1952 Coup d'état' and traces events until 2011 when Hosni Mubarak stepped down as the president of Egypt after weeks of protest. It highlights the relationship between the presidency and the army to show that, contrary to popular belief, the presidency grew gradually stronger at the expense of other institutions, especially the army, and reached its apogee under Mubarak. Part Two 'From Revolution to Coup d'Etat', covers the critical stages from when the military junta took over the governing of Egypt as the Supreme Council of the Armed Forces (SCAF), and the election of Morsi, up until the coup to overthrow his presidency. Using a democratic transition theory perspective, Azmi Bishara explains the failure of the democratic transition and how it has impacted on Arab revolutions ever since. Written while the revolutions were taking place, this book conveys a sense of immediacy and urgency as Bishara makes wide-ranging assessments with many of his forecasts corroborated in later years. The book is renowned for its use of primary source material - including interviews, statistics and public opinion polls - thus preserving the memory of the revolution and remaining one of the most comprehensive reference books on the subject to date.

Asia in International Relations decolonizes conventional understandings and representations of Asia in International Relations (IR). This book opens by including all those geographical and cultural linkages that constitute Asia today but are generally ignored by mainstream IR. Covering the Indian subcontinent, Turkey, the Mediterranean, Iran, the Arab world, Ethiopia, and Central-Northeast-Southeast Asia, the volume draws on rich literatures to develop our understanding of power relations in the world's largest continent. Contributors "de-colonize", "de-imperialize", and "de-Cold War" the region to articulate an alternative narrative about Asia, world politics, and IR. This approach reframes old problems in new ways with the possibility of transforming them, rather than recycling the same old approaches with the same old "intractable" outcomes.

Economy Ramesh Singh, General Studies UPPSC Uttar pradesh, MPPSC Madhya Pradesh, RPSC rajasthan, Bpsc Bihar Etc. Objective History Economy Polity Geography Vidarbha—the parched heartland of central India—has become the foremost site of farmer suicides in the country. These suicides are the most striking indictment of the neglect of agriculture by the state. But the story of the farmers' distress does not end with their death—it lives on in the experience of their widows who struggle to survive in the shadows. Widows of Vidarbha tells the story of 16 such widows who have been invisible to the state, the community, and even their families, and talks of their lost dreams, their diminished worldviews, and their helpless surrender to the conveniences of patriarchy. These narratives throw light on the dark and desperate corners of their invisible world, one that reflects the state of farm widows across the country.

A permanent political class has emerged on a scale unprecedented in our nation's history. Its self-dealing, nepotism, and corruption contribute to rising inequality. Its reach extends from the governing elite throughout nongovernmental institutions. Aside from constituting an oligarchy of prestige and power, it enables the creation of an aristocracy of massive inherited wealth that is accumulating immense political power. In a muckraking tour de force reminiscent of Lincoln Steffens, Upton Sinclair, and C. Wright Mills, American Oligarchy demonstrates the way the corrupt culture of the permanent political class extends down to the state and local level. Ron Formisano breaks down the ways this class creates economic inequality and how its own endemic corruption infects our entire society. Formisano delves into the work of not just politicians but lobbyists, consultants, appointed bureaucrats, pollsters, celebrity journalists, behind-the-scenes billionaires, and others. Their shameless pursuit of wealth and self-aggrandizement, often at taxpayer expense, rewards channeling the flow of income and wealth to elites. That inequality in turn has choked off social mobility and made a joke of meritocracy. As Formisano shows, these forces respond to the oligarchy's power and compete to bask in the presence of the .01 percent. They also exacerbate the dangerous instability of an American democracy divided between extreme wealth and extreme poverty.

The Syrian Civil War has created the worst humanitarian disaster since the end of World War II, sending shock waves through Syria, its neighbours, and the European Union. Calls for the international community to intervene in the conflict, in compliance with the UN-sanctioned Responsibility to Protect (R2P), occurred from the outset and became even more pronounced following President Assad's use of chemical weapons against civilians in August 2013. Despite that egregious breach of international convention, no humanitarian intervention was forthcoming, leaving critics to argue that UN inertia early in the conflict contributed to the current crisis Syria, Press Framing, and The Responsibility to Protect examines the role of the media in framing the Syrian conflict, their role in promoting or, on the contrary, discouraging a robust international intervention. The media sources examined are all considered influential with respect to the shaping of elite views, either directly on political leaders or indirectly through their influence on public opinion. The volume provides a review of the arguments concerning appropriate international responses to events in Syria and how they were framed in leading newspapers in the United States, Great Britain, and Canada during the crucial early years of the conflict; considers how such media counsel affected the domestic contexts in which American and British decisions were made not to launch forceful interventions following Assad's use of sarin gas in 2013; and offers reasoned speculation on the relevance of R2P in future humanitarian crises in light of the failure to protect Syrian civilians.

In India, you can still find the kabaadiwala, the rag-and-bone man. He wanders from house to house buying old newspapers, broken utensils, plastic bottles—anything for which he can get a little cash. This custom persists and recreates itself alongside the new economies and ecologies of consumer capitalism. Waste of a Nation offers an anthropological and historical account of India's complex relationship with garbage. Countries around the world struggle to achieve sustainable futures. Assa Doron and Robin Jeffrey argue that in India the removal of waste and efforts to reuse it also lay waste to the lives of human beings. At the bottom of the pyramid, people who work with waste are injured and stigmatized as they deal with sewage, toxic chemicals, and rotting garbage. Terrifying events, such as atmospheric pollution and childhood stunting, that touch even the wealthy and powerful may lead to substantial changes in practices and attitudes toward sanitation. And innovative technology along with more effective local government may bring about limited improvements. But if a clean new India is to emerge as a model for other parts of the world, a "binding morality" that reaches beyond the current environmental crisis will be required. Empathy for marginalized underclasses—Dalits, poor Muslims, landless migrants—who live, almost invisibly, amid waste produced predominantly for the comfort of the better-off will be the critical element in India's relationship with waste. Solutions will arise at the intersection of the traditional and the cutting edge, policy and practice, science and spirituality.

This book introduces the basics of law in Papua New Guinea, and it targets upper secondary legal studies teachers and students. Everyone in this country, including the educated, other than lawyers needs to know and understand our own laws. The National Education Department's motto is "Prosperity through self-reliance"; thus, this project is one out of many the department is yet to accomplish. No recommended text was available at the time when the new course, legal studies, was introduced in 2010 to be taught as an examinable subject. Newly elevated secondary schools in the country are facing reference material problem. The problem of rare stock of resource material is truly a considerable physical and psychological stress suffered by most teachers in the country. This book was written exactly in line with Upper Secondary Legal Studies syllabus as a text material to be used across the nation in all secondary schools in which Legal Studies course is offered. The subject itself is fundamentally interesting. I enjoyed teaching law for the last six years. I gained the insights of basic introductory law while in the process of teaching and writing this book. Hope you enjoy reading this book, "Introduction to Our Laws" and gain the insights of law.
