*A coming-of-age story about transgender tween Obie, who didn't think being himself would cause such a splash. For fans of Alex Gino's *George* and Lisa Bunker's *Felix Yz*. Obie knew his transition would have ripple effects. He has to leave his swim coach, his pool, and his best friends. But it's time for Obie to find where he truly belongs. As Obie dives into a new team, though, things are strange. Obie always felt at home in the water, but now he can't get his old coach out of his head. Even worse are the bullies that wait in the locker room and on the pool deck. Luckily, Obie has family behind him. And maybe some new friends too, including Charlie, his first crush. Obie is ready to prove he can be one of the fastest boys in the water—to his coach, his critics, and his biggest competition: himself.*

Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical

Access Free Grade 12 Sporton Teachers Guide Life Sciences Caps 2014

activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.
