Houghton Mifflin English

This volume documents international, national, and small-scale testing and

assessment projects of English language education for young learners, across a range of educational contexts. It covers three main areas: age-appropriate 'can do statements' and task types for teaching and testing learners between the ages of 6 to 13; innovative approaches to self-assessment, diagnostic testing, self-perception, and computer-based testing; and findings on how young learners perform on vocabulary, listening, speaking, pronunciation, and reading comprehension tests in European and Asian contexts. Early language learning has become a major trend in English language education around the globe. As a result of the spread of teaching English to a growing number of young children, assessment of and for learning have emerged as key issues. In line with this development, there is a clear and emerging need to make early language programs accountable and to assess both the progress children make over time and to quantify their achievement at various stages of development. This volume informs stakeholders about the realistic goals

of early language learning, their efficiency, and how much progress children make over time.

Racial intolerance, social change, and sweeping progress make 1908 Washington, D.C., a turbulent place to grow up in for 12-year-old Emily Soper. For Emily, life in Papa's carriage barn is magic, and she's more at home hearing the symphony of the blacksmith's hammer than trying to conform to the proper expectations of young ladies. When Papa's livelihood is threatened by racist neighbors and horsepower of a different sort, Emily faces changes she'd never imagined. Finding courage and resolve she didn't know she had, Emily strives to save Papa's business, even if it means going all the way to the White House.

This book analyzes the performance of South Asian educational systems and identifies the causes and correlates of student learning outcomes. Drawing on successful initiatives both in the region and elsewhere in the world, it offers an insightful approach to setting priorities for enhancing the quality of school education in South Asia.

Language, Literacy, and Learning in Primary Schools is a synthesis of the findings arising from four years of policy research and development in Nigeria's primary schools that focused on the gap between what teachers should know and be able to do, and the realities of teaching and learning in classrooms. It begins by critically examining the outcomes of primary schooling as measured by learning achievement results

from national assessments, and by identifying some core learning problems for Nigerian primary school children. It reviews the findings from recent research reports that studied teaching and learning processes in primary school classrooms, and it identifies the pedagogical issues in primary classrooms that contribute to poor learning achievements. This report describes a research and development program that set out to improve teaching and learning in core learning skill areas of the curriculum. This study identifies priority areas for teachers' professional development. It suggests a policy framework for the continuing professional development of primary school teachers, including the initial preparation of teachers and their induction into teaching. It proposes medium and long-term strategies to bring about the desired changes in teaching and learning through school-based approaches to teacher development.
