*"Obviously, you are not chanting the exaltations of China which many of my country people are used to listening to." A Chinese scholar recognizes that this book is not a further attempt to carry favor with China by tickling its leaders' ears. This book examines what is right and the truth about what is wrong with English language education in Chinese colleges and universities. As our Chinese colleague further states, "Most Chinese are learning English like one learning swimming ashore." We have been writing about these shortcomings for ten years. It arises because administrators posted to their positions due to party affiliation and good standing, are basically ignorant of administration and educational matters. The VIPs of EEC believe that they know, while they don't, what are under their supervision; the professionals of EEC believe that what they are doing academically is helpful while it's not. The two types are making the common non-professional people believe that they are knowingly reliable while they are not. . . . The educated, as well as the illiterate, do not know what to do and what not to do, what is correct and what is wrong, what is worthy and what is not, etc. The weakness, from the historical perspective, is also a consequence of modern Chinese history whose knowledge*

*most Chinese people are poor at but reluctant to admit." This book could not be published within China due to its truthfulness.*

In addition to test-taking techniques and the information required by the test - such as literary definitions and essay structure - you will find complete lessons that teach you the skills demanded by this test. The instructional passages of this book teach you critical reading skills by using material beyond the range of the AP exam. You will be taught by lesson and example how to write high-scoring essays that demonstrate all you have learned. To complement the chapters on critical reading, Chapter 4 focuses on the test itself and prepares you for it specifically. Everything you need to know for the test is encapsulated in this chapter. You will find helpful facts about the AP exam, along with a breakdown of the questions into easily recognizable types. As the time of the test approaches, you will be able to rely on this chapter for the most time-efficient preparation. Our book also provides three full-length practice tests. Our exams include thorough explanations of the answers for added instruction and self-diagnosis of problem areas. We also include a glossary of literary terms with 63 entries, all fully defined. About the Test The Advanced Placement Examination in English Language & Composition is open to students who have studied the mechanics of writing and rhetoric at an advanced level, and wishes to pursue college credit. Take care not to confuse the AP Examination in English Language & Composition with the AP Examination in Literature & Composition. The Literature exam focuses on literature and literary criticism, while the Language exam deals with writing as a craft. This book is designed to help you prepare for the AP Examination in English Language & Composition only. The AP English Language & Composition Exam is divided into two sections: Section 1 - Multiple-Choice (60 minutes - accounts for 45% of total score) Five or six reading passages, with an average of 10 questions each. Section 2 - Free-Response (up to 120 minutes - accounts for 55% of total score) Three essay questions. The first section consists of five or six reading passages and sixty multiple-choice questions, which you will have one hour to complete. Each passage will be followed by an average of ten questions and thereafter the passage will not be referred to again. Do not feel pressured to remember each reading - just digest them one at a time and move on. After reading the passage, you will have approximately one minute to answer each question. The second section of the AP English Language & Composition Exam consists of three essay questions, and is divided such that you will have forty minutes to write each essay. Do not expect to be able to go back to an essay after the allotted time has elapsed. Note that each essay has very specific instructions, and most have a passage which you will read critically to answer the essay question. Your essays will be scored according to the essay structure, the clarity of your writing, and the extent to which you have answered the question. Scoring the Exam The multiple-choice section of the exam is scored by crediting each correct answer with one point and deducting one-fourth of a point for each incorrect answer. Unanswered questions receive neither a credit nor a deduction. The free-response essays are graded by more than 5,000 instructors and professors who gather together each June for a week of non-stop AP essay grading. Each essay booklet is read and scored by four graders. Each grader provides a score for the individual essays. This score is a number on a scale from 0 to 9, 0 being the lowest and 9 the highest. The graders are not aware of each other's scores. When the essays have been graded four times, the scores are averaged - one score for each of the three essays - so that the free-response section is composed of three scores. The three essays are weighted equally, and the total weight of the free-response section is fifty-five percent of the total score. The multiple-choice section accounts for forty-five percent of the total score. Each year the overall grades may fluctuate because the grading scale depends upon the performance of students in past AP administrations. The following method of scoring, along with the corresponding chart, will give you an approximation of your score. It will not indicate the exact score you would get on the actual AP English Language & Composition Exam

*The rise of China has necessitated the regional identity in Asia as well as the lens through which understanding of China and self-understanding are no longer separate processes intellectually. China scholarship in South and Southeast Asia necessarily highlights meanings of encountering China that Western social sciences fail to reflect because academics in many places, being migrants, navigate and combine more than one civilization forces. With China in itself undergoing transformation, it is unlikely that one can simply speak of China without multiple qualifications of what one actually refers to. The book gathers authors who come from different scholarly traditions to reflect upon the presentation of China in academic writings as well as think tank analyses can engender different identity possibilities. The book therefore complicates the category 'China' to enable mutual empathy between everything that in one way or another relies on Chineseeness as object or subject in accordance with the Identity strategies of the China experts.*

State Assessment Policy and Practice for English Language Learners presents three significant studies, each examining a different aspect of states' strategies for including English language learners in state assessments. 'an Analysis of State Assessment Policies Regarding Accommodations for English Language Learners; 'a Survey and Description of Test Translation Practices; and 'an Examination of State Practices for Reporting Participation and Performance of English Language Learners in State Assessments. With the rise in population of English language learners and the subsequent stepped-up legislative focus on this student population over the past decade, states have been challenged to include English language learners in state assessment programs. Until now, the little data available on states' policies and practices for meeting this challenge has been embedded in various reports and professional journals and scattered across the Internet. This volume offers, for the first time, a focused examination of states' assessment policies and practices regarding English language learners. The three studies were supported by OELA, the U.S. Department of Education's Office of English Language Acquisition, Language Enhancement, and Academic Achievement for Limited English Proficient Students. State Assessment Policy and Practice for English Language Learners is of interest to researchers and professionals involved with the assessment of English language learners; state- and district-level policy makers; and academics, teacher educators, and graduate students in a number of fields, including educational and psychological assessment, testing and measurement, bilingual education, English as a second language, and second language acquisition.

The book provides new insights into written corrective feedback by describing students' expectations as well as mediating factors that influence their engagement with it. The book draws on an extensive dataset to illustrate secondary school students' behavioural, cognitive and emotional engagement with written corrective feedback and the extent to which mediating factors, such as teachers, peers, feedback partners, attitudes and emotions, foster or hinder it. It shows why teachers need to provide students with the purpose of the corrective feedback they provide, explain how such feedback works and introduce strategies that can be employed to engage with it. Based on the finding that a combination of several feedback types is essential to ensure learner engagement, the book also provides an extensive description and multiple authentic examples of the Engagement-Feedback-Mediator Model that was developed in the context of this study.

Each lesson is based on actual PARCC ELA guidelines and follows the format of Common Core standards. A Handy Guide for Teachers: This book brings the common core down to the classroom level, deciphering what it all means to the way students are taught. Our author gives teachers practical guidance on how the ELA/Literacy assessment should shape teaching methods and lesson plans. Easy-to-understand explanations of PARCC standards take the confusion out of the PARCC ELA exams. This study guide is a must-have for students and teachers who are facing the PARCC and the new Common Core State Standards! What Are the Common Core State Standards (CCSS)? The Common Core State Standards Initiative is a state-led effort coordinated by the National Governors Association Center for Best Practices and the Council of Chief State School Officers. The standards provide teachers and parents with an understanding of what students are expected to learn. Consistent standards provide appropriate benchmarks for all students, regardless of where they live. These standards define the knowledge and skills students should have within their K-12 education so they will graduate high school able to succeed in entry-level, credit-bearing academic college courses and in workforce training programs. Annually, China produces more than 5 million college graduates who have been compelled to study English as a foreign language for 10 to 17 years but graduate functionally illiterate, unable to produce comprehensible oral or written English. English is taught as a subject required to pass tests and not as a communicative language. The problems are identified, confirmed by post-graduate

students and solutions are presented. The development and success of a remedial program designed for the collegiate level, Holistic English, is well documented by the students at top tier and second tier universities, as well as 3rd tier and vocational colleges in seven Provinces of China. This is a compelling story of a 30 year old failed program that reminds us of Albert Einstein's definition of insanity: "Doing the same thing over and over again and expecting a different result."
