The Real Life Story of an Immigrant Who Grew up in Chad, Central Africa

The book Making Mathematics Practical (published by World Scientific in 2011) proposes a new paradigm in teaching problem solving in secondary school mathematics classrooms. It is a report of the research project "Mathematical Problem Solving for Everyone" (MProSE), which attempts to provide all the necessary resources for teachers to teach problem solving in schools. This book reports as a follow-up on the actual enactment of the proposed MProSE model solving curriculum in five Singapore schools. The experimental schools, which span across the entire spectrum of all Singapore secondary schools, report how they tweak the MProSE proposal to fit into their school curriculum, together with issues, challenges and success stories in implementing such an innovative curriculum in Singapore schools. It is an ideal handbook for educators who believe in problem solving as the core of mathematics curriculum and who wish to implement such an approach in their schools.

This book presents all the publicly available questions from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment.

From the renowned psychologist who introduced the world to "growth mindset" comes this updated edition of the million-copy bestseller—featuring transformative insights into redefining success, building lifelong resilience, and supercharging self-improvement. "Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life."—Bill Gates, GatesNotes "It's not always the people who start out the smartest who end up the smartest." After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own.

This book presents an ethnographic study of the experiences of teenage boys in an Australian high school. It follows a group of thirteen to fifteen year olds over a period of more than two years, and seeks to understand why so many boys say they hate school yet enjoy being with one another in their daily confrontations with the formal school. The study acknowledges the ongoing significance of the "boys' debate" to

policy-makers and the media, and therefore to teachers and parents, but moves it on from issues of gender construction and the panic about achievement to the broader question of what it is to experience being schooled as a boy in the new liberal educational environment.

This carefully crafted ebook: "Winesburg, Ohio (A Group of Tales of Ohio Small-Town Life)" is formatted for your eReader with a functional and detailed table of contents. This ebook is a series of loosely linked short stories set in the fictional town of Winesburg, mostly written from late 1915 to early 1916. The stories are held together by George Willard, a resident to whom the community confide their personal stories and struggles. The townspeople are withdrawn and emotionally repressed and attempt in telling their stories to gain some sense of meaning and dignity in an otherwise desperate life. The work has received high critical acclaim and is considered one of the great American works of the 20th century. Sherwood Anderson (1876 – 1941) was an American novelist and short story writer, known for subjective and self-revealing works. Anderson published several short story collections, novels, memoirs, books of essays, and a book of poetry. He may be most influential for his effect on the next generation of young writers, as he inspired William Faulkner, Ernest Hemingway, John Steinbeck, and Thomas Wolfe.

Assessment of student learning outcomes (ASLO) is one of the key activities in teaching and learning. It serves as the source of information in determining the quality of education at the classroom and national levels. Results from any assessment have an influence on decision making, on policy development related to improving individual student achievement, and to ensure the equity and quality of an education system. ASLO provides teachers and school heads with information for making decisions regarding a students' progress. The information allows teachers and school heads to understand a students' performance better. This report reviews ASLO in three South Asian countries—Bangladesh, Nepal, and Sri Lanka—with a focus on public examinations, national assessment, school-based assessment, and classroom assessment practiced in these countries.

A New Translation From The French By Marion Wiesel Born in Sighet, Transylvania, Elie Wiesel was a teenager when he and his family were taken from their home in 1944 and deported to the Auschwitz concentration camp, and then to Buchenwald. Night is the terrifying record of Elie Wiesel's memories of the death of his family, the death of his own innocence, and his despair as a deeply observant Jew confronting the absolute evil of man. This new translation by his wife and most frequent translator, Marion Wiesel, corrects important details and presents th

When growing up in Africa, I did not have the privilege to live the simple life that most youngsters in the United States take for granted. This was not only because of the limited means of my parents but also because of the stronghold of my traditional schooling that dictated isolation between men, women, and children. I was a child of a polygamous family of 18 children. My dad had three official wives and several girlfriends. We were afraid of my unapproachable father and could not play with him when we were home. As a kid, I was not privileged to own to other things from discarded cans or corn sticks. Children usually see their parents as role models and follow in their path. Even though I was spiritually immature, I knew deep inside that I was heading in the wrong direction at age 16 and was afraid to follow my father's footsteps when it came to women. You see, at age 16, I started to have girlfriends... many at the same time. My life became worse when I reached age 25. Although I had many girlfriends when growing up in Chad, I truly loved only one. My relationship with this girlfriend started in 1989 when I proposed. We arranged to meet in Chad twice and in the United States twice but connections failed all four times; God did not allow it! As I am alive today, it is because of God. My view of God completely changed after the passing of my first wife in 2000. After living in America for 18 months, God revealed His plan for my life when I met Isabelle. THE woman who I truly believe God reserved for me. As an immigrant who had experienced mental, physical, emotional and spiritual suffering, I will be forever thankful to the United States of America. Knowing from wit immeasurable. He protected me from disease even when I was living in sin. He brought me out of misery when I had no breakfast in the morning or... on a good day, just one meal a day. He made me a citizen of the most powerful nation on earth, the United States of America...the great land that I love and appreciate dearly. I have experienced love and hope in this country of opportunity. God blessed me with education, three masters degrees and a doctorate degree. He blessed me with a rewarding profession. He blessed me with four beautiful children and a blessings. My fervent prayer is that my experiences chronicled in this memoir will encourage my fellow immigrants to study, get a degree from a U.S. college, dream big, and strive for a higher standard. My hope and prayer is that we always set good examples for our children to follow and help them accomplish more in their lives than what we have in ours. Apostle Paul claimed that he could do anything through God who strengthened him. We should claim the same! Please read this entire memoir for my story growing up as a youth in Africa and my love st thought about the millions of immigrants who also have the privilege of living in America. To fellow immigrants, let us embrace and uphold the values of this beautiful country, the United States of America. No, this country is not perfect, but I know from my experiences that we are at least FREE and can make our dreams come true if we work for them. In writing this book, I also thought about my fellow American citizens. My hope and prayer is that this book helps us all to realize just how blessed we are to live in this beautiful country. To God be the glory!
