This mock term paper is the highlight of Schaefer's book:

""Grade A Papers: The Slap Stack."" This satirical essay pokes harmless, wacky fun at all political party spectrums and a slew of celebrities. The essay is stocked with wordplay. Includes two bonus papers: "Make No Room for Kids: Bells Ding for Online Classes K-8" (a composition theorist parody from Grade A Papers: The Slap Stack) and "My Flesh is My Blanket Inside Which I Hide" (a funny yet poignant historical term paper all patriotic Americans will adore)

This book provides an overview of recent research on the relationship between noncognitive attributes (motivation, self efficacy, resilience) and academic outcomes (such as grades or test scores). We focus primarily on how these sets of attributes are measured and how they relate to important academic outcomes. Noncognitive attributes are those academically and occupationally relevant skills and traits that are not "cognitive"—that is, not specifically intellectual or analytical in nature. We examine seven attributes in depth and critique the measurement approaches used by researchers and talk about how they can be improved.

For many years, Dr. Wayne W. Dyer's fans have wondered when he would write a memoir. Well, after four decades as a teacher of self-empowerment and the best-selling author of more than 40 books, Wayne has finally done just that! However, he has written it in a way that only he can—with a remarkable take-

home message for his longtime followers and new readers alike—and the result is an exciting new twist on the old format. Rather than a plain old memoir, Wayne has gathered together quantum-moment recollections. In this revealing and engaging book, Wayne shares dozens of events from his life, from the time he was a little boy in Detroit up to present day. In unflinching detail, he relates his vivid impressions of encountering many forks in the road, taking readers with him into these formative experiences. Yet then he views the events from his current perspective, noting what lessons he ultimately learned, as well as how he has made the resulting wisdom available to millions via his lifelong dedication to service. As a reader, you will feel as if you are right there with Wayne, perusing his personal photo album and hearing about his family, his time in the service, how he writes his best-selling books, and so much more. In the process, you'll be inspired to look back at your own life to see how everything you have experienced has led you to where you are right now. Wayne has discovered that there are no accidents. Although we may not be aware of who or what is "moving the checkers," life has a purpose, and each step of our journey has something to teach us. As he says, "I wasn't aware of all of the future implications that these early experiences were to offer me. Now, from a position of being able to see much more clearly, I know that every single encounter, every challenge, and every situation are all spectacular threads in the tapestry that represents and defines my life, and I am deeply grateful for all of it." I Can See Clearly Now is an intimate look at an amazing teacher, but it also holds the key for seekers on a personal path of enlightenment. Wayne offers up his own life as an example of how we can all recognize the hand of the Divine steering our individual courses,

helping us accomplish the mission we came here to fulfill.

Becoming Teachers of Inner-city Students takes on the continuing challenges of White teachers in increasingly de facto re-segregated schools of the present. Drawing on the author's eighteen years of experience as a classroom teacher and his research on White teachers of inner-city students, Becoming Teachers provides key discussions on professional identity for preservice teachers, professional educators, and researchers interested in diversity education or urban education. Driving at complex recognitions of race, class, culture, language, and gender as a basis for teaching and learning with diverse urban students, the author's and other White teachers' life and teaching stories move beyond prescriptive models of professional identity for preservice and professional teachers to "follow." Instead, life and teaching stories in Becoming Teachers demonstrate again and again that in teaching the personal is political, professional knowledges are forged in practice, and – overall – that becoming a professional teacher is a process that draws on one's experiences and inner-most convictions. Becoming Teachers, updating Vivian Paley's White Teacher and reworking Christine Sleeter's multicultural research on White teachers' race-evasive identities, moves discussions on White teacher identity toward a second wave of race-

visible professional identity for White teachers in the present. James Jupp's book is an instruction on how to keep the democratic educational experiment on the workbench... – Roger Slee, Professor and Director of the Victoria Institute for Education, Diversity, and Life Long Learning at Victoria University, Melbourne James Jupp thoughtfully explicates the complexity of the social justice literature in education related to race, class, culture, language, gender and other differences in classrooms. Jupp is one of the leading scholars in education who challenges static notions of difference and opens up new curriculum spaces for a second wave of critical race work. Challenging the field to consider more nuanced possibilities that will advance social justice in the present, Jupp provides generous readings for new intercultural alliances. Jupp's Becoming Teachers of Inner-city Students offers a fresh understanding for those who are looking for new ways to understand teachers' lives and professional identities. – Patrick Slattery, Professor of Curriculum, Texas A&M University Jupp does the hard work, here, of understanding where we have been in conceptualizing the racial identities of White teachers. And then he does something harder. With abundant intelligence, courage, and generosity, Jupp opens up new pathways for our thinking and feeling and action. Read this book. – Timothy Lensmire, Associate Professor of Curriculum & Instruction, University of Minnesota

"Rebecca D. Cox draws on five years of interviews and observations at community colleges. She shows how students and their instructors misunderstand and ultimately fail one another, despite good intentions. Most

memorably, she describes how easily students can feel defeated - by their real-world responsibilities and by the demands of college - and come to conclude that they just don't belong there after all."--BOOK JACKET.

Combining current knowledge of what works in teaching and learning with the most enduring philosophies of classical education, this book challenges readers to develop the skills, attitudes, knowledge, and habits of mind of strong writers. How do definitions of literacy in the academy, and the pedagogies that reinforce such definitions, influence and shape our identities as teachers, scholars, and students? The contributors gathered here reflect on those moments when the dominant cultural and institutional definitions of our identities conflict with our other identities, shaped by class, race, gender, sexual orientation, location, or other cultural factors. These writers explore the struggle, identify the sources of conflict, and discuss how they respond personally to such tensions in their scholarship, teaching,

and administration. They also illustrate how writing helps them and their students compose alternative identities that may allow the connection of professional identities with internal desires and senses of self. They emphasize how identity comes into play in education and literacy and how institutional and cultural power is reinforced in the pedagogies and values of the writing classroom and writing profession.
