Engage students in grades K-1 and build their confidence using Early Graphing: Hidden Pictures. This 64-page resource teaches essential early graphing skills through hands-on activities using popular kindergarten and first-grade themes. Students work to reveal hidden pictures while practicing reading order, fine-motor skills, attention to detail, concentration, and color words. They take pride in the finished product and look forward to the next one lesson. The lessons are ideal for independent practice, centers, and homework. This book aligns with state, national, and Canadian provincial standards.

Are you looking for new ways to help your children learn math? In a math journal, children explore their own ideas about numbers, shapes, and patterns through drawing or writing in response to a question. Journaling encourages students to develop a rich mathematical mindset. They begin to see connections and make sense of math concepts. They grow confident in their ability to think through new ideas. All they need is a piece of paper, a pencil, and a good prompt to launch their mathematical journey. 312 Things To Do with a Math Journal includes number play prompts, games, math art, story problems, mini-essays, geometry investigations, brainteasers, number patterns, research projects, and much more. These activities work at any grade level, and most can be enjoyed more than once. It doesn't matter whether your students are homeschooled or in a classroom, distance-learning, or in person. Everyone can enjoy the experience of playing around with math. Early Reviews from My Journaling Beta-Testers: □ "We really enjoyed these!" □ "I remember doing pages and pages of dull equations with

no creativity or puzzle-thinking, but now as a homeschool mom, I'm actually enjoying math for the first time! My daughter's math skills have skyrocketed and she always asks to start homeschool with math." □ "Thank you for a great intro to Playful Math!" □ "All of the kids were excited about their journals. My oldest kept going without prompting and did several more pages on his own." □ "We had a lot of fun doing your math prompts. We had never done any math journaling before, but we will certainly integrate this into our weekly routine from now on." Pick up a copy of 312 Things To Do with a Math Journal and begin your family's math journaling adventure today.

From Pixels to Animation: An Introduction to Graphics Programming deals with the C programming language, particularly for the Borland C and Microsoft C languages. The book reviews the basics of graphics programming, including graphics hardware, graphs, charts, changing colors, 3D graphics, high level functions provided by Borland and Microsoft C. The

text also explains low-level graphics, getting around the limitations of standard, graphics libraries, SVGA programming, and creating graphics functions. Advanced topics include linear transformations, ray tracing, and fractals. The book explains in detail the aspect ratio of pixels (length of the pixel dot divided by its width), pixel colors, line styles, and the functions to create the graphic. The text also describes the presentation of a three-dimensional object by using perspective, shading, and texturing. Between the operating system, which carries out the instruction of the program, and the hardware, which displays the output of the program, is the Basic Input/Output Services (BIOS). The BIOS is a set of routine instruction inside the different parts or hardware devices in the computer. The book explains programming animation effects by utilizing routines provided by Microsoft or Borland. The text also notes that a programmer can create good animation effects by directly addressing the graphics adapter, bypassing the BIOS or the high-level routines created by Microsoft or Borland. The book is suitable for beginning programmers, computer science, operators, animators, and artists involved with computer aided designs.

This American edition is a reference book of 335 games for parents, teachers, home-schooling families, childcare workers, Cub Scout Leaders, Sunday School teachers, and anyone else who supervises or entertains children. The book is divided into three main sections: physical and mental, life skill, and educational. The physical and mental games are for fun and fitness, and can be enjoyed at birthday parties, family get-togethers, vacation and scouting camps, and on weekend outings. The life skill games are especially designed for Cub Scout Leaders, and include such activities as map and compass reading, knotting, first aid, home safety, and outdoor cooking. The educational games include fun activities in math, English, science, history, geography, foreign languages, art and music. Teachers and home-schooling families will find this section instructive, stimulating and very unusual. The games are suitable for 7 to 17 year olds, and some of the activities will challenge even the cleverest teenagers.
