

## Great Women Exploring Nature How Wild Florida Influenced Their Lives

Do you know how it feels to run for 1,900 miles? Or to look down at the earth from a space station? Or to swim alongside a hungry shark? *Fantastic Female Adventurers* by Lily Dyu is a collection of fourteen exciting and inspirational stories about the women that do. Follow them on their incredible journeys around the globe. Ski to the North Pole with Ann Daniels while watching out for polar bears and lethal cracks in the ice. Feel the air beneath your feet as you climb high on a cliff face with Gwen Moffat. Experience the thrill of racing down rocky Himalayan trails with champion runner Mira Rai. Sail the oceans with Ellen MacArthur, the girl who saved up her lunch money to buy her first boat. You'll even fly into space with Britain's first astronaut, Helen Sharman. And join Lily on other awesome adventures with Anna McNuff, Sarah Outen, Misba Khan and more – taking you from Everest to the South Pole and all the places in between. Beautifully illustrated by artist and adventurer Chellie Carroll, *Fantastic Female Adventurers* will leave you thinking: I can do that, too!

In *The Politics of Women's Rights in Iran*, Arzoo Osanloo explores how Iranian women understand their rights. After the 1979 revolution, Iranian leaders transformed the state into an Islamic republic. At that time, the country's leaders used a renewed discourse of women's rights to symbolize a shift away from the excesses of Western liberalism. Osanloo reveals that the postrevolutionary republic blended practices of a liberal republic with Islamic principles of equality. Her ethnographic study illustrates how women's claims of rights emerge from a hybrid discourse that draws on both liberal individualism and Islamic ideals. Osanloo takes the reader on a journey through numerous sites where rights are being produced--including Qur'anic reading groups, Tehran's family court, and law offices--as she sheds light on the fluid and constructed nature of women's perceptions of rights. In doing so, Osanloo unravels simplistic dichotomies between so-called liberal, universal rights and insular, local culture. *The Politics of Women's Rights in Iran* casts light on a contemporary non-Western understanding of the meaning behind liberal rights, and raises questions about the misunderstood relationship between modernity and Islam.

*Women and Nature? Beyond Dualism in Gender, Body, and Environment* provides a historical context for understanding the contested relationships between women and nature, and it

## Where To Download Great Women Exploring Nature How Wild Florida Influenced Their Lives

articulates strategies for moving beyond the dualistic theories and practices that often frame those relationships. In 1974, Françoise d'Eaubonne coined the term "ecofeminism" to raise awareness about interconnections between women's oppression and nature's domination in an attempt to liberate women and nature from subordination. Since then, ecofeminism has attracted scholars and activists from various disciplines and positions to assess the relationship between the cultural human and the natural non-human through gender reconsiderations. The contributors to this volume present critical and constructive perspectives on ecofeminism throughout its history, from the beginnings of ecofeminism in the 1970s through to contemporary and emerging developments in the field, drawing on animal studies, postcolonialism, film studies, transgender studies, and political ecology. This interdisciplinary and international collection of essays demonstrates the ongoing relevance of ecofeminism as a way of understanding and responding to the complex interactions between genders, bodies, and the natural environment. It will be of great interest to students and scholars of ecofeminism as well as those involved in environmental studies and gender studies more broadly.

A revolutionary new study of the origins of love based on physiological research probes the human brain for insights into the origins of the sex drive, romance, and attraction, while also offering practical advice on how to control and channel these desires into healthy pursuits. "The children and nature movement is fueled by this fundamental idea: the child in nature is an endangered species, and the health of children and the health of the Earth are inseparable."

—Richard Louv, from the new edition In his landmark work *Last Child in the Woods*, Richard Louv brought together cutting-edge studies that pointed to direct exposure to nature as essential for a child's healthy physical and emotional development. Now this new edition updates the growing body of evidence linking the lack of nature in children's lives and the rise in obesity, attention disorders, and depression. Louv's message has galvanized an international back-to-nature campaign to "Leave No Child Inside." His book will change the way you think about our future and the future of our children. "[The] national movement to 'leave no child inside' . . . has been the focus of Capitol Hill hearings, state legislative action, grass-roots projects, a U.S. Forest Service initiative to get more children into the woods and a national effort to promote a 'green

hour' in each day. . . . The increased activism has been partly inspired by a best-selling book, *Last Child in the Woods*, and its author, Richard Louv." —The Washington Post "Last Child in the Woods, which describes a generation so plugged into electronic diversions that it has lost its connection to the natural world, is helping drive a movement quickly flourishing across the nation." —The Nation's Health "This book is an absolute must-read for parents." —The Boston Globe Now includes A Field Guide with 100 Practical Actions We Can Take Discussion Points for Book Groups, Classrooms, and Communities Additional Notes by the Author New and Updated Research from the U.S. and Abroad

Real Life Paleo takes a practical approach to going Paleo with three simple steps that Stacy Toth and Matt McCarry, creators of the popular blog Paleo Parents, used to lose a combined 200 pounds and improve the health of their whole family. The "Swap, Remove, Heal" method is easy for anyone to follow, no matter where you are in your journey: first, swap healthier versions of packaged foods for ones full of processed, damaging ingredients; then remove unhealthy foods entirely; and finally, add healing, nutritious foods to your diet. Stacy and Matt also provide you with all the tools you need to make the switch to a Paleo lifestyle for good:

- Over 175 delicious recipes: With so many Paleo-friendly recipes, figuring out what to eat will never be a problem. Plus, the meal plans and menu ideas help you turn individual recipes into balanced meals. There are even holiday menu ideas to help you plan for special occasions and on-the-go snack ideas, so that last-minute meal before you have to rush out the door can be a healthy one.
- Handy how-to section: With practical tips aimed at real-life solutions to common concerns, the how-tos make it easy to replace allergens in recipes, find substitutes for unhealthy staples such as pasta and bread, and make everyday cooking quick, easy, and affordable.
- Guides to long-term success: Informative guides to swapping out foods, adding nutrient-dense and healing foods, ordering in a restaurant, stocking a Paleo pantry, and much more help you stick with your new Paleo lifestyle, while shopping lists make going to the grocery store fast and easy.
- Recipe indexes: Looking for a dish you can make in under 30 minutes? Or one-pan recipes? Maybe a recipe with fewer than five ingredients? You're covered with the recipe indexes.

Real Life Paleo will give you the confidence and tools to set your table with delicious and healthy foods to nourish those you love. Over several decades, scholarship in New Testament and early Christianity has drawn attention both to the ways in which ancient Mediterranean conceptions of embodiment, sexual difference, and desire were fundamentally different from modern ones and also to important lines of genealogical connection between the past and the present. The result is that the study of "gender" and "sexuality" in early Christianity has become an increasingly complex undertaking. This is a complexity produced not only by the intricacies of conflicting historical data, but also by historicizing approaches that query the very terms of analysis whereby we inquire into these questions in the first place. Yet at the same time, recent work on these topics has produced a rich and nuanced body of scholarly literature that has contributed substantially to our understanding of early Christian history and also proved relevant to ongoing theological and social debates. The Oxford Handbook of Gender and Sexuality in the New Testament provides a roadmap to this lively scholarly landscape, introducing both students and other scholars to the relevant problems, debates, and issues. Leading scholars in the field offer original contributions by way of synthesis, critical interrogation, and proposals for future questions, hypotheses, and research trajectories. The book combines history, travel ideas, nature awareness and art. The reader will discover how a thread of Florida's wild nature wove itself into the lives of ten women. This connection is examined in the stories of Harriet Beecher Stowe, Mina Miller Edison, Marjory Stoneman Douglas, Zora Neale Hurston, Myrtle Scharrer Betz, Marjorie Kinnan Rawlings, Anne Morrow Lindbergh, Jackie Cochran, Rachel Carson and Marjorie Harris Carr. Author Linda Taylor developed the idea for this book from her experience of guiding women on nature adventures in the Tampa Bay area through her company It's Our Naturer. Each chapter begins with a stunning calligraphy quote sketched by artist Linda Renc and then summarized in a map of Florida

## Where To Download Great Women Exploring Nature How Wild Florida Influenced Their Lives

establishing a sense of place for each woman. The cover is the work of Bill Renc. Linda and Bill Renc are co-owners of Painted Fish Gallery in Dunedin, Florida.

**A one-of-a-kind text designed to launch readers into a thoughtful encounter with gender issues. Questioning Gender: A Sociological Exploration, Third Edition serves as a point-of-departure for productive conversations about gender, and as a resource for exploring answers to many of those questions. Rather than providing definitive answers, this unique book exposes readers to some of the best scholarship in the field that will lead them to question many of their assumptions about what is normal and abnormal. The author uses both historical and cross-cultural approaches—as well as a focus on intersectionality and transgender issues—to help students understand the socially constructed nature of gender.**

There is renewed interest in lifestyle medicine - the focus on food, physical activity, stress management, high-quality connections, restorative sleep, and avoidance of toxic substances - in the prevention, treatment, and sometimes reversal of chronic disease, but very little information exists on its application for improving specific women's health issues across the lifespan. Consequently, there is a growing need among health professionals who care for women for a textbook that addresses evidence-based lifestyle solutions to manage the health challenges they face every day in their offices. This book begins with a review of the fundamentals of Lifestyle Medicine through the lens of a woman's lifespan. It provides information about lifestyle interventions to improve gynecologic and sexual health and to manage and sometimes reverse gynecologic diseases. It clarifies the importance of lifestyle and behaviors before and during pregnancy to address infertility, reduce adverse pregnancy outcomes, and to lower non-communicable diseases in children along with emerging epigenetic evidence. The use of Lifestyle Medicine to prevent and manage breast and gynecologic cancers, enhance health as part of cancer survivorship, and decrease the risk or reduce many of the

## Where To Download Great Women Exploring Nature How Wild Florida Influenced Their Lives

symptoms and diseases experienced during menopause including vasomotor symptoms and osteoporosis are also discussed. Additionally, the text covers cardiovascular disease, diabetes, autoimmune disorders, dementia and mental health from the perspective of gender specific differences. This book provides practical resources on implementing the components of lifestyle medicine. Some of the topics covered include models of care for women and families, reimbursement, health coaching and behavioral change, community engagement and health equity for under-resourced settings. The electronic version of the book presents supplemental material featuring in-depth reading, as well as online and digital resources for implementing Lifestyle Medicine. The book is an evidence-based source of information on women's health issues for health professionals already practicing lifestyle medicine, as well as an entry level textbook for those new to the field of lifestyle medicine. The collective expertise of each of the editors along with content provided by leaders within the American College of Lifestyle Medicine fills a much-needed void within the specialty of Lifestyle Medicine and is for providers of women's health globally. Features: ? Provides a basic overview of Lifestyle Medicine (nutrient-rich diet, exercise, stress resilience, sleep, and high-quality connections) in the care of women across the lifespan. ? Provides lifestyle-focused treatment recommendations for specific women health issues. ? Includes strategies for implementing Lifestyle Medicine with vulnerable populations and in communities. ? Summarizes key points at the close of each chapter and includes supplemental material with in-depth reading. ? Features additional resources for implementing lifestyle medicine into practice. "This women's health book is evidence based and comprehensive. There is nothing like it. Women need up to date information about physical activity, nutrition, sleep, stress resilience, social connection and substance use. In addition, there is a desire to better understand the power of these pillars throughout a woman's life including pregnancy, menopause and the golden years. This book fills that need." Elizabeth Pegg Frates, MD, DipABLM, FACLM, President Elect of the American College of Lifestyle Medicine "Healthy aging begins at pre-conception. Evidence overwhelmingly shows that it's we women who-through our lifestyle behavior choices-can take far

## Where To Download Great Women Exploring Nature How Wild Florida Influenced Their Lives

greater control of our own health destinies, as well as the health destinies of our children and generations to come. We cannot underestimate the power of what we eat, how we move, and what we think in regard to our optimal health or lack thereof. This book is a must-read for all medical professionals!" Susan Benigas, Executive Director of the American College of Lifestyle Medicine Lifestyle Medicine is the science of taking core principles and customizing how they're applied to each individual and each situation to achieve positive health behavior change. This book sets the evidence based foundation for how that process happens, and why it needs to happen, with the most important segment of health consumers - women. It is the next for all who are passionate about changing how health care is delivered."

Wayne S. Dysinger, MD, MPH, Physician, Founder and Chair, Lifestyle Medical "Lifestyle factors have a powerful role in chronic disease prevention, underscoring the profound control we have over our health. Improving Women's Health Across the Lifespan applies lifestyle medicine to women's health, empowering women and their clinicians with the tools to transform their lives, and fostering a legacy of health for future generations." JoAnn E. Manson, MD, MPH, DrPH, Professor of Medicine and the Michael and Lee Bell Professor of Women's Health, Harvard Medical School Chief, Division of Preventive Medicine Brigham and Women's Hospital, Professor, Harvard Chan School of Public Health

Women Writing Nature addresses the question, "Do women write about nature differently?" In the process, the collection considers women's writings about the natural world in light of recent and current feminist and ecofeminist theory.

UPDATED 40TH ANNIVERSARY EDITION WITH 2020 PREFACE An examination of the Scientific Revolution that shows how the mechanistic world view of modern science has sanctioned the exploitation of nature, unrestrained commercial expansion, and a new socioeconomic order that subordinates women.

## Good Observers of Nature

### Questioning Gender

This practical and interactive guide shows women how to optimize their potential for health and well-being through in-depth information, self-assessment quizzes, and checklists to determine individual risk factors for common ailments and more serious diseases. Dr. Miriam Nelson shares the preventative measures that can be taken now to avoid such health problems down the road. From sexual and reproductive health to beauty, heart health, emotional well-being, bone and muscle health, and weight control, *The Strong Women's Guide to Total Health* offers a complete picture of the broad spectrum of issues that impact overall health. It is essential reading for women of all ages.

Annotation *Heroic mothers defending home and hearth against a nature deformed by multinationalist corporate practice*: this may be a compelling story, but it is not necessarily the source of valid feminist or ecological critique. What's missing is the democratic element, an insistence on bringing to public debate all the relations of gender and nature that such a view takes for granted. This book aims to situate a commitment to theory and politics -- that is, to democratic practice -- at the center of ecofeminism and, thus, to move toward an ecofeminism that is truly both feminist and ecological. *The Good-Natured Feminist* inaugurates a sustained conversation between ecofeminism and recent writings in feminist postmodernism and radical democracy. Starting with the assumption that ecofeminism is a body of democratic theory, the book tells how the movement originated in debates about "nature" in North American radical feminisms, how it then became entangled with identity politics, and how it now seeks to include nature in democratic conversation and, especially, to politicize relations between gender and nature in both theoretical and activist milieus.

The broad sweep of environmental and ecological history has until now been written and understood in predominantly male terms. In *Made From This Earth*, Vera Norwood explores the relationship of women to the natural environment through the work of writers, illustrators, landscape and garden designers, ornithologists, botanists, biologists, and conservationists. Norwood begins by showing that the study and promotion of botany was an activity deemed appropriate for women in the early 1800s. After highlighting the work of nineteenth-century scientific illustrators and garden designers, she focuses on nature's advocates such as Rachel Carson and Dian Fossey who differed strongly with men on both women's "nature" and the value of the natural world. These women challenged the dominant, male-controlled ideologies, often framing their critique with reference to values arising from the female experience. Norwood concludes with an analysis of the utopian solutions posed by ecofeminists, the most recent group of women to contest men over the meaning and value of nature.

Gender isn't just about "male" or "female" anymore - if you have any doubts, just turn on your television. RuPaul is as familiar as tomato ketchup with national radio and television shows, and transgendered folk are as common to talk-shows as screaming and yelling. But if the popularization of gender bending is revealing that "male" and "female" aren't enough, where are we supposed to go from here? Cultural theorists have written loads of smart but difficult-to-fathom texts on gender, but none provide a hands-on, accessible guide to having your own unique gender. With *My Gender Workbook*, Kate Bornstein brings theory down to Earth and provides a practical approach to living with or without a gender. Bornstein starts from the premise that there are not just two genders performed in today's world, but countless genders lumped under the two-gender framework. Using a unique, deceptively simple and always entertaining workbook format, Bornstein gently but firmly guides you to discover your own unique gender identity. Whether she's using the USFDA's food group triangle to explain gender, or quoting one-liners from real "gender transgressors", Bornstein's first and foremost concern is making information on gender bending truly accessible. With quizzes and exercises that determine how much of a man or woman you are, *My Gender Workbook* gives you the tools to reach whatever point you desire on the gender continuum. Bornstein also takes aim at the recent flurry of books that attempt to naturalize gender difference, and puts books like *Men are from Mars, Women are from Venus* squarely where they belong: on Uranus. If you don't think you are transgendered when you sit down to read this book, you will be by the time you finish it!

***Book Four in the Gutsy Girls: Strong Christian Women Who Impacted the World series introduces readers to real-life astronomer and leader in science, Dr. Jennifer Wiseman. Dr. Wiseman studies stars and interstellar clouds using radio, infrared, and optical telescopes. She has worked with several major astronomy observatories. This true story tells what happens when a girl's love and curiosity for nature meets her passion for God. Young readers begin the story by exploring nature with young Jennifer in Arkansas' Ozark Mountains and eventually adventure into the far reaches of the universe to learn about black holes, discover a comet, and explore the mysteries of God's creation.***

***This book aims to present key aspects of the prison-based bullying research which has taken place over the last few years. It is a field in which there has been considerably increased interest. One of the main features of this book is the recognition that much previous bullying research has been descriptive in nature, with little underlying theory to assist its development as an area of academic interest. In addressing this need this book will serve as an indispensable resource for students, academics and professionals with interests in this field. Chapters in the book address the following areas: need for innovation in prison bullying research, statistics on bullying, combining methods to research prison bullying, bullying behaviour among women in prison, bullying and suicides in prisons, developmental antecedents of prison bullies and/or victims, applying evolutionary theory to prison bullying, applying social problem solving models to prison bullying.***

***Presents a controversial history of violence which argues that today's world is the most peaceful time in human existence, drawing on psychological insights into intrinsic values that are causing people to condemn violence as an acceptable measure.***

## Where To Download Great Women Exploring Nature How Wild Florida Influenced Their Lives

or those inspired by Cheryl Strayed's *Wild*, this is the definitive guide to being a woman in the great outdoors. This friendly handbook covers the matters of most concern to women, from "feminine functions" in the wilderness to how to deal with condescending men, as well as the basics of wilderness survival tailored to women's unique needs. It includes gear lists in addition to advice for camp setup, fire building, food and water, safety, weather, and navigation.

This book highlights the unique and complex role women have played in the shaping of the American environment from pre-Columbian Native Americans to present-day environmental justice activists.

What would happen, I wondered, if I simply missed out the fifty per cent of the population whose voices have been credited with shaping this particular 'cultural form'. If I coppiced the woodland, so to speak, and allowed the light to shine down to the forest floor and illuminate countless saplings now that a gap has opened in the canopy. . . There has, in recent years, been an explosion of writing about place, landscape and the natural world. But within this blossoming of interest, women's voices have remained very much in the minority. For the very first time, this landmark anthology collects together the work of women, over the centuries and to the present day, who have written about the natural world in Britain, Ireland and the outlying islands of our archipelago. Alongside the traditional forms of the travelogue, the walking guide, books on birds, plants and wildlife, *Women on Nature* embraces alternative modes of seeing and recording that turn the genre on its head. Katharine Norbury has sifted through the pages of women's fiction, poetry, household planners, gardening diaries and recipe books to show the multitude of ways in which they have observed the natural world about them, from the fourteenth-century writing of the anchoress Julian of Norwich to the seventeenth-century travel journal of Celia Fiennes; from the keen observations of Emily Brontë to a host of brilliant contemporary voices. *Women on Nature* presents a groundbreaking vision of the natural world which, in addition to being a rich and scintillating anthology that shines a light on many unjustly overlooked writers, is of unique importance in terms of women's history and the history of writing about nature.

"An arresting vision of this relentless natural world"—*New York Times Book Review* A leading ecologist argues that if humankind is to survive on a fragile planet, we must understand and obey its iron laws. Our species has amassed unprecedented knowledge of nature, which we have tried to use to seize control of life and bend the planet to our will. In *A Natural History of the Future*, biologist Rob Dunn argues that such efforts are futile. We may see ourselves as life's overlords, but we are instead at its mercy. In the evolution of antibiotic resistance, the power of natural selection to create biodiversity, and even the surprising life in the London Underground, Dunn finds laws of life that no human activity can annul. When we create artificial islands of crops, dump toxic waste, or build communities, we provide new materials for old laws to shape. Life's future flourishing is not in question. Ours is. As ambitious as Edward Wilson's *Sociobiology* and as timely as

*The Oxford Handbook of New Testament, Gender, and Sexuality*

From the ancient world to the present women have been critical to the progress of science, yet their importance is overlooked, their stories lost, distorted, or actively suppressed. *Forces of Nature* sets

the record straight and charts the fascinating history of women's discoveries in science. In the

ancient and medieval world, women served as royal physicians and nurses, taught mathematics,

studied the stars, and practiced midwifery. As natural philosophers, physicists, anatomists, and

botanists, they were central to the great intellectual flourishing of the Scientific Revolution and the

Enlightenment. More recently women have been crucially involved in the Manhattan Project,

pioneering space missions and much more. Despite their record of illustrious achievements, even

today very few women win Nobel Prizes in science. In this thoroughly researched, authoritative

work, you will discover how women have navigated a male-dominated scientific culture — showing themselves to be pioneers and trailblazers, often without any recognition at all. Included in the book

are the stories of: Hypatia of Alexandria, one of the earliest recorded female mathematicians Maria

Cunitz who corrected errors in Kepler's work Emmy Noether who discovered fundamental laws of

physics Vera Rubin one of the most influential astronomers of the twentieth century Jocelyn Bell

Burnell who helped discover pulsars

A range of views on the morality of synthetic biology and its place in public policy and political discourse.

In "Good Observers of Nature" Tina Gianquitto examines nineteenth-century American women's intellectual and aesthetic experiences of nature and investigates the linguistic, perceptual, and

scientific systems that were available to women to describe those experiences. Many women writers

of this period used the natural world as a platform for discussing issues of domesticity, education,

and the nation. To what extent, asks Gianquitto, did these writers challenge the prevalent sentimental

narrative modes (like those used in the popular flower language books) and use scientific

terminology to describe the world around them? The book maps the intersections of the main

historical and narrative trajectories that inform the answer to this question: the changing literary

representations of the natural world in texts produced by women from the 1820s to the 1880s and

the developments in science from the Enlightenment to the advent of evolutionary biology. Though

Gianquitto considers a range of women's nature writing (botanical manuals, plant catalogs, travel

narratives, seasonal journals, scientific essays), she focuses on four writers and their most influential

works: Almira Phelps (*Familiar Lectures on Botany*, 1829), Margaret Fuller (*Summer on the Lakes*,

in 1843), Susan Fenimore Cooper (*Rural Hours*, 1850), and Mary Treat (*Home Studies in Nature*,

1885). From these writings emerges a set of common concerns about the interaction of reason and

emotion in the study of nature, the best vocabularies for representing objects in nature (local,

scientific, or moral), and the competing systems for ordering the natural world (theological,

taxonomic, or aesthetic). This is an illuminating study about the culturally assumed relationship

between women, morality, and science.

Backpack Explorer: On the Nature Trail

Jump-start curiosity with this take-along field guide for children ages 4 and up. From worms, birds, and spiders to trees, flowers, and clouds, young explorers learn what to look and listen for wherever they are — whether in a nature preserve, an urban park, or a suburban backyard. Seek-and-find lists, on-the-trail art projects, and discovery pages get kids engaged in hands-on learning about nature, and a real pull-out magnifying glass helps them get a close-up glimpse of leaf veins, seed pods, and tiny insects. With activities, checklists, and stickers, this interactive nature guide belongs in every kid's backpack.

Fully revised and updated with the latest data in the field, the Sixth Edition of *Exploring the Dimensions of Human Sexuality* represents all aspects of human sexuality and explores how it affects personality, development, and decision making. Using a student-friendly interpersonal approach, the text discusses contemporary concepts as well as controversial topics in a sensitive manner, and covers the physiological, biological, psychological, spiritual, and cultural dimensions of human sexuality. *Exploring the Dimensions of Human Sexuality* is an essential text for teaching sexuality and presents an integrated view of human sexuality that encourages students to pursue positive decisions, sexual health, and a lifetime of wellness.

Los Angeles may have a reputation as a concrete jungle, but in reality, it's incredibly biodiverse, teeming with an amazing array of animals and plants. You just need to know where to find them. *Wild LA*—from the experts at the Natural History Museum of Los Angeles County—is the guidebook you've been waiting for. Equal parts natural history book, field guide, and trip planner, *Wild LA* has something for everyone. You'll learn about the factors shaping LA nature—including flood, fire, and climate change—and find profiles of over one hundred local species, from sea turtles to cacti to plants to Hollywood's famous mountain lion, P-22. Also included are day trips that detail which natural wonders you can experience on hiking trails, in public parks, or in your own backyard.

The authoritative biography of the marine biologist and nature writer whose book *Silent Spring* inspired the global environmentalist movement. In a career that spanned from civil service to unlikely literary celebrity, Rachel Carson became one of the world's seminal leaders in conservation. The 1962 publication of her book *Silent Spring* was a watershed event that led to the banning of DDT and launched the modern environmental movement. Growing up in poverty on a tiny Allegheny River farm,

## Where To Download Great Women Exploring Nature How Wild Florida Influenced Their Lives

Carson attended the Pennsylvania College for Women on a scholarship. There, she studied science and writing before taking a job with the newly emerging Fish and Wildlife Service. In this definitive biography, Linda Lear traces the evolution of Carson's private, professional, and public lives, from the origins of her dedication to natural science to her invaluable service as a brilliant, if reluctant, reformer. Drawing on unprecedented access to sources and interviews, Lear masterfully explores the roots of Carson's powerful connection to the natural world, crafting a "fine portrait of an environmentalist as a human being" (Smithsonian). "Impressively researched and eminently readable . . . Compelling, not just for Carson devotees but for anyone concerned about the environment." —People "[A] combination of meticulous scholarship and thoughtful, often poignant, writing." —Science "A sweeping, and first-class biography of Rachel Carson." —Kirkus Reviews

Forces of Nature

Let's Explore Nature in Helsinki

The Life of Cecilia Payne-Gaposchkin

The Death of Nature

***"There is a widespread perception that the development process is in a state of multiple crisis. While the notion of sustainable development is supposed to address adequately its environmental dimensions, there is still no agreed framework relating women to this new perspective. This book is an attempt to present and disentangle the various positions put forward by major actors and to clarify the political and theoretical issues that are at stake in the debates on women, the environment and sustainable development. Among the current critiques of the western model of development which the authors review are the feminist analysis of Science itself and the power relations inherent in the production of knowledge; Women, Environment and Development (WED); Alternative Development; Environmental Reformism; and Deep Ecology, Social Ecology and Ecofeminism. In traversing this important landscape of ideas, they show how they criticise the dominant developmental model at the various levels of epistemology, theory and policy. The authors also go further and put forward their own ideas as to the basic elements they consider necessary in constructing a paradigmatic shift -- emphasising such values as holism, mutuality, justice, autonomy, self-reliance, sustainability and peace. This unique work is a signally useful contribution to clarifying thinking on a topic with immense implications for all women."--Publisher's description.***
