"Information technology shapes nearly every part of modern life, and debates about information--its meaning, effects, and applications--are central to a range of fields, from economics, technology, and politics to library science, media studies, and cultural studies. This rich, unique resource traces the history of information with an approach designed to draw connections across fields and perspectives, and provide essential context for our current age of information. Clear, accessible, and authoritative, the book opens with a series of articles that provide a narrative history of information from premodern practices to twenty-first-century information culture. This section focuses on major developments in the creation, storage, search, exchange, management, and manipulation of information, as well as the many meanings and uses of information over time. Coverage spans Europe, North America, and many other places and periods, including the medieval Islamic world and early modern East Asia, as well as the emergence of global networks. A second, alphabetical section includes more than 100 concise articles that cover specific concepts (e.g., data, intellectual property, privacy); formats and genres (books, databases, maps,

newspapers, scrolls, social media); people (archivists, diplomats and spies, readers, secretaries, teachers); practices (censorship, forecasting, learning, surveilling, translating); processes (digitization, quantification, storage and search); systems (bureaucracy, platforms, telecommunications); technologies (algorithms, cameras, computers), and much more. The book concludes with an informative glossary, defining terms from "analog/digital" to "World Wide Web.""--

"The single most beautiful, solid, unearthly, and unjustifiably forgotten novel of the twentieth century ... a little golden miracle of a book." —Neal Gaiman
Hope Mirrlees penned Lud-in-the-Mist--a classic fantasy, and her only fantasy novel--in 1926. When the town of Lud severs its ties to a Faerie land, an illegal trade in fairy fruit develops. But eating the fruit has horrible and wondrous effects. "Helen Hope Mirrlees was born in England in 1887. Mirrlees was a close friend of such literary lights as Walter de la Mare, T.S. Eliot, André Gide, Katharine Mansfield, Lady Ottoline Morrell, Bertrand Russell, Gertrude Stein, Virginia Woolf, and William Butler Yeats. Under her own name, she published three novels: Madeleine—One of Life's Jansenists (1921); The Counterplot (1924); and her 1926 classic fantasy Lud-in-the-Mist, which has acknowledged inspiration to the likes of Neil Gaiman, Mary Gentle, Elizabeth Hand, Johanna Russ, and Tim Powers."--SF Site "Hope Mirrlees'

writing, usually underrated, moves between gently crazy humour, poetic snatches, real menace, and real poignancy."—The Encyclopedia of Fantasy

The accomplishments of pioneering doctors such as John Peter Mettauer, James Marion Sims, and Nathan Bozeman are well documented. It is also no secret that these nineteenth-century gynecologists performed experimental caesarean sections, ovariectomies, and obstetric fistula repairs primarily on poor and powerless women. Medical Bondage breaks new ground by exploring how and why physicians denied these women their full humanity yet valued them as “medical superbodies” highly suited for medical experimentation. In Medical Bondage, Cooper Owens examines a wide range of scientific literature and less formal communications in which gynecologists created and disseminated medical fictions about their patients, such as their belief that black enslaved women could withstand pain better than white “ladies.” Even as they were advancing medicine, these doctors were legitimizing, for decades to come, groundless theories related to whiteness and blackness, men and women, and the inferiority of other races or nationalities. Medical Bondage moves between southern plantations and northern urban centers to reveal how nineteenth-century American ideas about race, health, and status influenced doctor-patient relationships in sites of healing like slave cabins, medical colleges, and hospitals. It also retells the story of black enslaved

women and of Irish immigrant women from the perspective of these exploited groups and thus restores for us a picture of their lives.

Praise for How I Became a Quant "Led by two top-notch quants, Richard R. Lindsey and Barry Schachter, How I Became a Quant details the quirky world of quantitative analysis through stories told by some of today's most successful quants. For anyone who might have thought otherwise, there are engaging personalities behind all that number crunching!" --Ira Kawaller, Kawaller & Co. and the Kawaller Fund "A fun and fascinating read. This book tells the story of how academics, physicists, mathematicians, and other scientists became professional investors managing billions." --David A. Krell, President and CEO, International Securities Exchange "How I Became a Quant should be must reading for all students with a quantitative aptitude. It provides

fascinating examples of the dynamic career opportunities potentially open to anyone with the skills and passion for quantitative analysis." --Roy D. Henriksson, Chief Investment Officer, Advanced Portfolio Management "Quants"--those who design and implement mathematical models for the pricing of derivatives, assessment of risk, or prediction of market movements--are the backbone of today's investment industry. As the greater volatility of current financial markets has driven investors to seek shelter from increasing uncertainty, the quant revolution has given people the opportunity to avoid unwanted financial risk by literally trading it away, or more specifically, paying someone else to take on the unwanted risk. How I Became a Quant reveals the faces behind the quant revolution, offering you?the?chance to learn firsthand what it's like to be a?quant today. In this fascinating collection of Wall Street war stories, more than two dozen quants detail their roots, roles, and contributions, explaining what they do and how they do it, as well as outlining the sometimes unexpected paths they have followed from the halls of academia to the front lines of an investment revolution.

Praise for the first and second editions: "The Copyeditor's Handbook brims with valuable information, good advice, and helpful suggestions for novice copyeditors and experienced practitioners. It is comforting to know that current and future copyeditors will be able to turn to this handbook. I'm placing this work, which fills a huge gap in the literature, right beside my dictionary, and will highly recommend it to all my colleagues and students." –Alice Levine, Lecturer, The Denver Publishing Institute, and freelance editor "A definite 'must have' for the beginning to intermediate editor or author, and even the experienced editor. An indispensable reference tool." –Kim Hawley, President, The Chicago Book Clinic "This is the book that every teacher of editing has been waiting for: thorough, clear, authoritative, up-to-date, and

sane." –Beth Luey, Director, Scholarly Publishing Program, Arizona State University "This book warms the cockles of the copyediting heart. It is thorough, useful, helpful, and smart. And it fills a huge vacuum." –Constance Hale, author of Sin and Syntax and Wired Style "An excellent resource. The Copyeditor's Handbook should sit on every business editor's shelf, next to the in-house style guide." –Erika Henik, Research Publications Manager, Banc of America Securities LLC "The first three chapters alone are worth the cover price. It's a book that acknowledges an assortment of vexing copyediting questions and offers multiple answers to most of them."–Gary Hernandez, Technical Communication "An excellent textbook to teach the essentials of copyediting. An excellent reference work for workplace writing."–Mark Armstrong, Business Communication Quarterly "Straightforward, sound advice for beginning or intermediate copyeditors working with pencil or online."–Priscilla S. Taylor, The Editorial Eye "Lays out the

copyeditor's obligations with humor, style, and perspective."—Walter Pagel, Science Editor

New to this edition: Up-to-date information on on-line research and computer resources. A unique four-way access system enables users of the Handbook of Technical Writing to find what they need quickly and get on with the job of writing: 1. The hundreds of entries in the body of the Handbook are alphabetically arranged, so you can flip right to the topic at hand. Words and phrases in bold type provide cross-references to related entries. 2. The topical key groups alphabetical entries and page numbers under broader topic categories. This topical table of contents allows you to check broader subject areas for the specific topic you need. 3. The checklist of the writing process summarizes the opening essay on "Five Steps to Successful Writing" in checklist form with page references to related topics, making it easy to use the Handbook as a writing text. 4. The comprehensive index provides an exhaustive listing of related and commonly confused topics,

so you can easily locate information even when you don't know the exact term you're looking for.

your sexual orientation without you ever mentioning it. The powers that surveil us do

*more than simply store this information. Corporations use surveillance to manipulate not only the news articles and advertisements we each see, but also the prices we're offered. Governments use surveillance to discriminate, censor, chill free speech, and put people in danger worldwide. And both sides share this information with each other or, even worse, lose it to cybercriminals in huge data breaches. Much of this is voluntary: we cooperate with corporate surveillance because it promises us convenience, and we submit to government surveillance because it promises us protection. The result is a mass surveillance society of our own making. But have we given up more than we've gained? In *Data and Goliath*, security expert Bruce Schneier offers another path, one that values both security and privacy. He brings his bestseller up-to-date with a new preface covering the latest developments, and then shows us exactly what we can do to reform government surveillance programs, shake up surveillance-based business models, and protect our individual privacy. You'll never look at your phone, your computer, your credit cards, or even your car in the same way again.*

Heather Baker was an executive PA at director level for many years and left to start her own training company. She created the BakerWrite speed writing system as a modern and easy to learn alternative to shorthand. Joanna Gutmann is an experienced administrator who started her training consultancy over 20 years ago specializing in minute taking. She is an accredited BakerWrite trainer and developed this dictionary to help people use the system. Margaret Greenhall was a lecturer and became an educational consultant in 2003. Between the three authors this dictionary has been developed to give a huge reference of words to use in speed writing. Quotes about BakerWrite "I will use this system all the time." "This is so easy to learn and use."

"I will recommend this course to anyone who takes notes." Joanna Gutmann Joanna became involved in training whilst working in a PA role in a training center. She left to start her business in the early nineties and continued to work in that area, increasingly specializing in business writing. Today, her business is focused on 'the meeting' with training on chairing, minute taking, report writing and speed reading. Joanna is delighted to hold a license to run the BakerWrite speed writing training.

Heather Baker Heather is a very experienced PA, who worked at boardroom level for high profile companies. She is now an acclaimed international trainer. She created the BakerWrite™ speed writing system to help people take notes using techniques that can be learned in just a few weeks. She thoroughly tested it and has been teaching it for over eleven years.

Dr Margaret Greenhall Margaret was a chemistry lecturer for eight years and she became fascinated by how and why people learn. She moved to staff development and learned more about how people share information with each other. In 2003 Margaret left the university to start a training and educational consultancy business. She combines face to face training with a portfolio of writing and publishing.
