Gross Things On Buses Trains And Planes Thats Gross

The New York Times bestselling author of *Sweetness* delivers the first all-encompassing account of the 1980s Los Angeles Lakers, one of professional sports' most-revered—and dominant—dynasties. The Los Angeles Lakers of the 1980s personified the flamboyance and excess of the decade over which they reigned. Beginning with the arrival of Earvin “ Magic ” Johnson as the number-one overall pick of the 1979 draft,

the Lakers played basketball with gusto and pizzazz, unleashing their famed “ Showtime ” run-and-gun style on a league unprepared for their speed and ferocity—and became the most captivating show in sports and, arguably, in all-around American entertainment. The Lakers ’ roster overflowed with exciting all-star-caliber players, including center Kareem Abdul-Jabbar, and they were led by the incomparable Pat Riley, known for his slicked-back hair, his Armani suits, and his arrogant strut. Hollywood ’ s biggest celebrities lined the court and gorgeous women

flocked to the arena. Best of all, the team was a winner. Between 1980 and 1991, the Lakers played in an unmatched nine NBA championship series, capturing five of them.

Bestselling sportswriter Jeff Pearlman draws from almost three hundred interviews to take the first full measure of the Lakers ' epic Showtime era. A dazzling account of one of America ' s greatest sports sagas, Showtime is packed with indelible characters, vicious rivalries, and jaw-dropping, behind-the-scenes stories of the players ' decadent Hollywood lifestyles. From the Showtime

era ' s remarkable rise to its tragic end—marked by Magic Johnson ' s 1991 announcement that he had contracted HIV—Showtime is a gripping narrative of sports, celebrity, and 1980s-style excess.

ordinary couple who decided to take a chance and do something extraordinary which others only dream about. Sixteen years ago Frank and Maria Nelson traded in excellent jobs, financial security, the safety net of family and friends, plus deep roots in their local community, for a nomadic lifestyle few people ever experience. All You Need is Luck recounts their first two years on the road after saying goodbye to their home in New Zealand. During this time they lived and worked in Australia, England and the United States

besides visiting Indonesia, France and Thailand. Leaving their comfort zone thousands of miles behind, they worked at American summer camps in Vermont and Cape Cod; at hospitals, a university and other jobs in Melbourne and Brisbane; and looked after scores of pampered pets in the poshest of homes all over England. This amusing adventure will appeal to anyone with a sense of humour but especially those who sometimes wonder what it would be like just to take off...and keep going.

A celebrated social psychologist offers a radical new perspective on cultural differences that reveals why some countries, cultures, and individuals take rules more seriously and how following the rules influences the way we think and act. In *Rule Makers, Rule Breakers*, Michele Gelfand, "an engaging writer with intellectual range" (The New York Times Book Review),

takes us on an epic journey through human cultures, offering a startling new view of the world and ourselves. With a mix of brilliantly conceived studies and surprising on-the-ground discoveries, she shows that much of the diversity in the way we think and act derives from a key difference—how tightly or loosely we adhere to social norms. Just as DNA affects everything from eye color to height, our tight-loose social coding influences much of what we do. Why are clocks in Germany so accurate while those in Brazil are frequently wrong? Why do New Zealand's women have the highest number of sexual partners? Why are red and blue states really so divided? Why

was the Daimler-Chrysler merger ill-fated from the start? Why is the driver of a Jaguar more likely to run a red light than the driver of a plumber's van? Why does one spouse prize running a tight ship while the other refuses to sweat the small stuff? In search of a common answer, Gelfand spent two decades conducting research in more than fifty countries. Across all age groups, family variations, social classes, businesses, states, and nationalities, she has identified a primal pattern that can trigger cooperation or conflict. Her fascinating conclusion: behavior is highly influenced by the perception of threat. "A useful and engaging

A Novel

Praised by Jack Gantos, author of *Dead End in Norvelt*, as "a quick read with a kick at the finish," this debut novel sensitively and memorably captures a teen runner's relationship with his autistic older brother. Like most siblings, Leo and Caleb have a complicated relationship. But Caleb's violent outbursts literally send Leo running. When the family is forced to relocate due to Caleb's uncontrollable behavior, Leo tries to settle into a new school, joining the cross-country team and discovering his talent for racing and endurance for distance. Things even begin to look up for Leo when he befriends Curtis, a potential state champion who teaches Leo strategy and introduces him to would-be girlfriend, Mary. But Leo's

stability is short-lived as Caleb escalates his attacks on his brother, resentful of his sport successes and new friendships. Leo can't keep running away from his problems. But, with a little help from Curtis and Mary, he can appreciate his worth as a brother and his own capacity for growth, both on and off the field. Praise from Jack Gantos, author of *Dead End in Norvelt*, *Hole in My Life* and *The Trouble With Me*: "Currinder's novel, *Running Full Tilt*, is a fast-paced convincing drama of a young runner whose legs circle him back to the many conflicts he is trying to escape--but he can't outrun himself. A quick read with a kick at the finish." Praise from Paul Volponi, author of *The Final Four*, *Black and White*, and *Rikers High*: "We feel the inner strength it takes to compete on every page of this splendid narrative, until, as readers, we are running as well--engrossed, and loving every step

This is an astonishing story about two childhood friends who are now grown with families of their own. The book alternates back and forth, chapter to chapter, from the present to the past, and back to the present describing how they deal with devastating events of the last days and times. One friend has a deja vu feeling that's connected to a story the other told her when they were only six years old, and then the other one begins experiencing deja vu too. The story seems to be coming to life for even though these two women haven't been in contact with each other in over fifteen years, both are having the same horrific dream. One friend will rely on the other to save she and her family's lives. And both will rely on God to save them from The Mark of The Beast. Hargraves lives on a farm in Hopkinton, a small New Hampshire town, during the early 19th century. She has a couple of big problems. First of all, she has a stepmother, Priscilla, who used to be her spinster schoolteacher aunt. Clara resents that her late mother's older sister has not only married her father but is about to have a baby. To make matters worse, "Prissy Priscilla" keeps trying to make the rambunctious, clever, and witty Clara act like a proper young lady. Secondly, Clara has red hair, making her a

target for teasing by a handsome older boy, Dickson Weeks, and by her pretty seventeen-year-old Dread Cousin Hetty. Clara, however, has a secret plan she hopes will change this. During the last week of June, 1825, Clara's town is abuzz because the famous General Lafayette is about to visit their state during his farewell tour of America. In those eventful seven days, Clara learns a lot about her family, Hetty, Dickon, herself, and about Lafayette. She comes to understand the huge and vital role the young French

Aware of Moreys scheme and unable to fully carry out the Democrats plan, David McClurry becomes the new dictator of the United States and the new leader of an unprecedented postcapitalist world.

"In his insightful study, Gregory L. Thompson examines the demise of passenger trains and the rise of buses in California and

demonstrates that railroad management's shortsighted response to the growing use of automobiles contributed to its own decline." "After peaking about 1910, the use of intercity passenger trains rapidly gave way to the onslaught of the automobile. For the next three decades, railroad managers tried, but failed, to adapt the passenger train to the new competition. Although previous studies have suggested that regulation and a conspiracy between rail and bus management played a significant role in the decline of the industry, Thompson reaches a different conclusion. Focusing on the California operations of two major

railroads and the largest intercity bus company in the United States, he demonstrates that railroad management failed to accurately assess the demand for its service and the costs of providing it. According to Thompson, railroad management's faulty planning and its misleading accounting system eventually did the passenger train in, while superior corporate planning within bus companies led to their success." "Based on previously unseen data, *The Passenger Train in the Motor Age* offers an illuminating portrait of a critical time in railroad history."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.
