Material presented in many testing books is appropriately broad and comprehensive, but the effect for students new to testing is difficulty in then translating the extensive information into the practical skills of administering, scoring, and interpreting tests to help inform the treatment process. Few resources exist to help students and mental health clinicians with the daunting task of learning how to synthesize test data from numerous instruments into a meaningful treatment plan and strategy for a client. This book was written to address that need. It takes readers through a systematic explanation of

how to understand and integrate data from multiple sources to maximize the information gleaned from the tests. It also emphasizes using test data to maximize helpfulness to the client and how to interpret test data to clients in language that is understandable.

history and personal memoir. It recounts the author's experiences as a volunteer leader of the American Civil Liberties Union from 1966, when he founded an ACLU chapter in Baton Rouge, to 1977, when he ended his work as state legislative director. Through a series of "war stories," he details his struggles on multiple fronts, including racial justice, the rights of students, women and the mentally ill, and reform of criminal justice. By the time the author switched his focus to nuclear disarmament, the Old South, organized around the subordination, exploitation and humiliation of Black people, had been transformed into something

any other. There is little doubt today that the United States had to engage in the fighting, especially after the Japanese attack on Pearl Harbor on December 7, 1941. The conflict was, in the words of historians Allan Millett and Williamson Murray, "a war to be won." As the world's largest industrial power, the United States put forth a supreme effort to produce the weapons, munitions, and military formations essential to achieving victory. When the war finally ended, the finale signaled by atomic mushroom clouds over Hiroshima and Nagasaki, upwards of 60 million people had perished in the inferno. Of course, the human toll represented only part of the devastation; global environments also suffered greatly. The growth and

distinguishing those agencies that are responsive to elected officials from those that are not. On the responsive side, for example, she cites the Traffic Division of the Department of Streets, which has erected about 1,000 four-way stop signs (compared to 34 in Kansas City) because the aldermen, responding to parents concerned about the safety of their street-crossing kids, demanded them. Similarly, she finds that building inspectors are responsive to aldermen's requests that
