The reality of the Arab-Israeli balance now consists of two subordinate balances: Israel versus Syria and Israel versus the Palestinians. The book analyzes these two balances in detail and their impact on defense planning in each country and on the overall strategic risk to the region as a whole. It covers military developments in each of six states—Egypt, Israel, Jordan, Lebanon, Syria, and Palestine—and provides an analytical view with charts and tables of how the changing natures of the military and political threats faced by each is impacting its military force readiness and development. The book has the most comprehensive data on past, current, and future military force structure currently available, drawn from the widest range of sources. Responding to the most recent of events in the region, this book is the first to deal with the effects on the Arab-Israeli military balance of the strategic uncertainty created by the Iraqi insurgency and the Iranian nuclear program. It also studies how the Gaza pullout, the Syrian withdrawal from Lebanon, the changing political landscape in Israel, and the threat of nuclear proliferation are having impacts on the Egyptian-Israeli and Jordanian-Israeli peace accords and the prospects for a settlement between the Palestinians and Israelis. The roles of Hezbollah, Hamas, and Palestinian Islamic Jihad are analyzed in light of the changing political landscape in both Israel and Palestine. Given the role of Syria in the Palestinian-Israeli affairs, the book also explores the ways that internal instability in Lebanon could escalate into a regional conflict.

Histories of revolutions often focus on military, political, or economic upheavals but sometimes neglect to connect these larger events to the daily lives of "ordinary" people. Yet the peoples' perception that "things are worse than before" is shown by the recent defeat of the Sandinista regime in Nicaragua and the governments of Eastern Europe. Providing the kind of prosaic, revealing details that more formal histories have excluded, My Car in Managua offers an objective, of difficulties and occasional pleasures of life in Nicaragua during the Sandinista revolution. During a year's work (1985-1986) at the Instituto Centroamericano de Administración de Empresas (INCAE), Forrest Colburn purchased a dilapidated car for everyday life in Nicaragua. His discoveries of the length of time required to register the car (approximately six weeks), the impossibility of finding spare parts (except when U.S. dollars were applied to the search), and the fact that "anyone charged a small fee [for car watching] by anyone else" all suggest the difficulties most Nicaraguans faced living in a devastated economy. Drawing on experiences from visits throughout the revolutionary period (1979-1989), Colburn also shows social customs and language, gender roles and family relationships, equality and authority, the availability of goods and services, the status of ethnic minorities, and governmental and other institutions. Illustrations by Nicaragua's celebrated artist Flores enliven the lucid text.

July 2019 Printed in BLACK AND WHITE The Army's Weapon Systems Handbook was updated in July 2019, but is still titled "Weapon Systems Handbook 2018." We are printing this in black and white to keep the price low. It presents many of the acquisition programs currently fielded or in development. The U.S. Army Acquisition Corps, with its 36,000 professionals, bears a unique responsibility for the oversight and systems management of the Army's acquisition lifecycle. With responsibility for hundreds of acquisition programs, civilian and military professionals collectively oversee research, development and acquisition activities totaling more than \$20 billion in Fiscal Year 2016 alone. Why buy a book you can download for free? We print this so you don't have to. We at 4th Watch Publishing are former government employees, so we know how government employees actually use the standards. When a new standard is released, somebody has to print it, punch holes and put it in a 3-ring binder. While this is not a big deal for a 5 or 10-page document, many DoD documents are over 400 pages and printing a large document is a time-consuming effort. So, a person that's paid \$25 an hour is spending hours simply printing out the tools needed to do the job. The time that could be better spent doing mission. We publish these documents so you can focus on what you are there for. It's much more cost-effective to just order the latest version from Amazon.com. The tank revolutionized the battlefield in World War II. In the years since, additional technological developments—including nuclear weapons, ballistic missiles, computer assisted firing, and satellite navigation—have continued to transform the face of combat. The only complete history of U.S. armed forces from the advent of the tank in battle during World War I to the campaign to drive Iraq out of Kuwait in 1991, Camp Colt to Desert Storm traces the development of doctrine for operations at the tactical and operational levels of war and translates this fighting doctrine into the development of equipment.
