“Fascinating. Doidge’s book is a remarkable and hopeful portrait of the endless adaptability of the human brain.”—Oliver Sacks, MD, author of The Man Who Mistook His Wife for a Hat What is neuroplasticity? Is it possible to change your brain? Norman Doidge’s inspiring guide to the new brain science explains all of this and more An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they’ve transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains,

Socio-political views on housing have been brought to the fore in recent years by global economic crises, a notable rise of international migration and intensified trans-regional movement phenomena. Adopting this viewpoint, From Conflict to Inclusion in Housing maps the current terrain of political thinking, ethical conversations and community activism that complements the current discourse on new opportunities to access housing. Its carefully selected case studies cover many geographical contexts, including the UK, the US, Brazil, Australia, Asia and Europe. Importantly, the volume presents the views of stakeholders that are typically left

unaccounted for in the process of housing development, and presents them with an interdisciplinary audience of sociologists, planners and architects in mind. Each chapter offers new interpretations of real-world problems, local community initiatives and successful housing projects, and together construct a critique on recent governmental and planning policies globally. Through these studies, the reader will encounter a narrative that encompasses issues of equality for housing, the biopolitics of dwelling and its associated activism, planning initiatives for social sustainability, and the cohabitation of the urban terrain.

What happens to people, places and objects that do not fit the ordering regimes and progressive narratives of modernity?

Conventional understandings imply that progress leaves such things behind, and excludes them as though they were valueless waste. This volume uses the concept of indeterminacy to explore how conditions of exclusion and abandonment may give rise to new values, as well as to states of despair and alienation. Drawing upon ethnographic research about a wide variety of contexts, the chapters here explore how indeterminacy is created and experienced in relationship to projects of classification and progress.

within a swirling cloud of gas and dust in the area of space that eventually hosted the Sun and its planets. Locked within each of these extra-terrestrial objects is the 4.6-billion-year wisdom of Solar System events, and by studying them at close quarters using spacecraft we can coerce them into revealing their closely-guarded secrets. This offers us the chance to answer some fundamental questions about our planet and its inhabitants. Exploring comets and asteroids also allows us to shape the story of Earth's future, enabling us to protect our precious planet from the threat of a catastrophic impact from space, and maybe to even recover valuable raw materials from them. This cosmic bounty could be as useful in space as it is on Earth, providing the necessary fuel and supplies for humans as they voyage into deep space to explore more distant locations within the Solar System. Catching Stardust tells the story of these enigmatic celestial objects, revealing how scientists are using them to help understand a crucial time in our history - the birth of the Solar System, and everything contained within it.

The Rights of the Roma writes Romani struggles for citizenship into the history of human rights in socialist and post-socialist Eastern Europe. If Roma have typically appeared in human rights narratives as victims, Celia Donert here draws on extensive original research in Czech and Slovak archives, sociological and ethnographic studies, and oral histories to foreground Romani activists as subjects and actors. Through a vivid social and political history of Roma in Czechoslovakia, she provides a new interpretation of the history of human rights by highlighting the role of Socialist regimes in constructing social citizenship in postwar Eastern Europe. The post-socialist human rights movement did not spring from the dissident movements of the 1970s, but rather emerged in response to the collapse of socialist citizenship

after 1989. A timely study as Europe faces a major refugee crisis which raises questions about the historical roots of nationalist and xenophobic attitudes towards non-citizens. Training advice combining the everyday fundamentals of dressage with mutual listening skills.

"With the legends and lore of Ireland running through his blood, falconer Connor O'Dwyer is proud to call County Mayo home. It's where his sister, Branna, lives and works, where his cousin, Iona, has found true love, and where his childhood friends form a circle that can't be broken... A circle that is about to be stretched out of shape--by a long-awaited kiss. Meara Quinn is Branna's best friend, a sister in all but blood. Her and Connor's paths cross almost daily, as Connor takes tourists on hawk walks and Meara guides them on horseback across the lush countryside. She has the eyes of a gypsy and the body of a goddess...things Connor has always taken for granted--until his brush with death propels them into a quick, hot tangle. Plenty of women have found their way to Connor's bed, but none to his heart until now. Frustratingly, Meara is okay with just the heat, afraid to lose herself--and their friendship--to something more. But soon, Connor will see the full force and fury of what runs in his blood. And he will need his family and friends around him, when his past rolls in like the fog, threatening an end to all he loves.."

Letter by Tom Franklin, Julie Cantrell has created Into the Free--now a New York Times bestseller--a story that will sweep you away long after the novel ends.

In the Romantic period, a range of social, cultural, and political changes and events coalesce in such a way as to produce a sudden and significant amount of pressure on general ideas of what a gypsy might be, and thus on representations of gypsies in literature and art. Because of the very particular situation in which Romantic-period gypsies find themselves, for approximately fifty years the figure of the gypsy becomes a peculiarly effective means through which anxieties about these changes and events might be articulated. This book examines the way in which writers and artists from the Romantic period depict gypsies, showing how various aspects of the contemporary context influence those depictions, and highlighting the opportunities offered by the figure of the gypsy for the exploration of a range of hopes and fears. A debut entry in a new trilogy by the author of the Jenna Fox Chronicles introduces Princess Lia, who flees an unwanted marriage and expectations about her supernatural legacy only to be pursued by her jilted fiancé and a ruthless assassin.

This saga of war and family from a New York Times–bestselling author is “sheer, wonderful storytelling” (Chicago Tribune). Spanning six decades, these three novels follow a man and his family as they struggle to adapt to life in a new world. From the death of Queen Victoria through the swinging sixties, this acclaimed saga is an unforgettable story of a farming family and a vanishing way of life.

Long Summer Day: Lt. Paul Craddock returns to England after the Boer War to resume civilian life. His father has died, leaving Craddock heir to a scrap-metal business. But instead of continuing the family business, he purchases an auctioned-off thirteen-hundred-acre estate, Shallowford, where he will be changed by his love for two women: fiercely independent Grace Lovell and lovely, demure Claire Derwent. *Post of Honour*: Through hard work and love of the land, Craddock has transformed his sprawling estate and enjoys a peaceful country life with his wife and three children. But war has begun its inevitable march across England, and this remote corner of Devon cannot escape its destruction. As the Great War ends and another threatens to

erupt, Craddock's faith and the strength he derives from his family must sustain him and his village through trying, tumultuous times. The Green Gauntlet: Though Craddock's village has endured despite the sorrows of war, he has new perils to face. Emerging property laws threaten his livelihood, dividing his family over the future of his beloved Shallowford. For his sons and daughter, the fifties and sixties will be a time of discovery and change that will resonate in the lives of their own children.

A masterful work of personal reportage, this volume is also a vibrant portrait of a mysterious people and an essential document of a disappearing culture. Fabled, feared, romanticized, and reviled, the Gypsies—or Roma—are among the least understood people on earth. Their culture remains largely obscure, but in Isabel Fonseca they have found an eloquent witness. In *Bury Me Standing*, alongside unforgettable portraits of individuals—the poet, the politician, the child prostitute—Fonseca offers sharp insights into the humor, language, wisdom, and taboos of the Roma. She traces their exodus out of India 1,000 years ago and their astonishing history of persecution: enslaved by the princes of medieval Romania; massacred by the Nazis; forcibly assimilated by the communist regimes; evicted from their settlements in Eastern Europe, and most recently, in Western Europe as well. Whether as handy scapegoats or figments of the

When he learns that the anonymous beauty is Lady Rowena, he vows to coax that flicker of warmth into a flame. more. Since swinging her leg over the

The goal of the book is to present the latest research on the new challenges of data technologies. It will offer an overview of the social, ethical and legal problems posed by group profiling, big data and predictive analysis and of the different approaches

and methods that can be used to address them. In doing so, it will help the reader to gain a better grasp of the ethical and legal conundrums posed by group profiling. The volume first maps the current and emerging uses of new data technologies and clarifies the promises and dangers of group profiling in real life situations. It then balances this with an analysis of how far the current legal paradigm grants group rights to privacy and data protection, and discusses possible routes to addressing these problems. Finally, an afterword gathers the conclusions reached by the different authors and discuss future perspectives on regulating new data technologies.

Animal welfare is attracting increasing interest worldwide, but particularly from those in developed countries, who now have the knowledge and resources to be able to offer the best management systems for their farm animals, as well as potentially being able to offer plentiful resources for companion, zoo and laboratory animals. The increased attention given to farm animal welfare in the West derives largely from the

fact that the relentless pursuit of financial reward and efficiency has led to the development of intensive animal production systems, that challenge the conscience of many consumers in those countries. In developing countries human survival is still a daily uncertainty, so that provision for animal welfare has to be balanced against human welfare. Welfare is usually provided for only if it supports the output of the animal, be it food, work, clothing, sport or companionship. In reality, there are resources for all if they are properly husbanded in both developing and developed countries. The inequitable division of the world's riches creates physical and psychological poverty for humans and animals alike in all sectors of the world. Livestock are the world's biggest land user (FAO, 2002) and the population is increasing rapidly to meet the need of an expanding human population. Populations of farm animals managed by humans are therefore increasing worldwide, and there is the tendency to allocate fewer resources to each animal. Increased attention to

welfare issues is just as evident for companion, laboratory, wild and zoo animals.

The winner of over 350 races, he was champion jockey in 1953/1954 and rode for HM Queen Elizabeth, the Queen Mother, most famously on Devon Loch in the 1956 Grand National. On his retirement from the saddle, he published his autobiography, *The Sport of Queens*, before going on to write forty-three bestselling novels, a volume of short stories (*Field of 13*), and the biography of Lester Piggott. During his lifetime Dick Francis received many awards, amongst them the prestigious Crime Writers' Association's Cartier Diamond Dagger for his outstanding contribution to the genre, and three 'best novel' Edgar Allan Poe awards from The Mystery Writers of America. In 1996 he was named by them as Grand Master for a lifetime's achievement. In 1998 he was elected a fellow of the Royal Society of Literature, and was awarded a CBE in the Queen's Birthday Honours List of 2000. Dick Francis died in February 2010, at the age of eighty-nine, but he remains one of the greatest thriller writers of all time.*
