

Hair Transplant 360 Volume 4 By Samuel M Lam

The second edition of Hair Transplant 360: Volume 4 † Follicular Unit Extraction (FUE) is an illustrated guide to this minimally invasive procedure, involving the grafting of hair follicles that are genetically resistant to balding, onto a bald scalp. This book is edited by Samuel M Lam, from the Lam Institute for Hair Restoration, Texas, and Kenneth L Williams Jr from Orange County Hair Restoration, California. With the advent of hybrid-punch technology for follicular unit excision (FUE) in 2017, the first edition of this book became outdated and required a major revision. The new edition more than doubles the scope of the prior edition from 25 chapters in a single book, to 60 chapters in two hardcover volumes. The first volume updates and expands on the previous edition's sections and is divided into the following: Basics, Operative Fundamentals, Practice Considerations, and Devices. The second volume is entirely new and is sectioned into Concepts, Techniques, Adjunctive Measures, Regional and Ethnic, Complications and Repair, and How I Do It and Special Topics. This unique, comprehensive text provides practical, up to date knowledge on FUE and incorporates over 100 videos that cover a range of subjects showcasing operative technique, interviews, video lectures and much more, all easily accessed via a QR code embedded in each chapter. In addition, an app allows the video/photo/illustration/text experience to be completely portable with a tablet or phone.

Provides latest advances and techniques in aesthetic and reconstructive hair transplant surgery. Covers various procedures in step by step format and setting up a hair transplant practice.

Treatment of hair disorders has progressed considerably over time. More patients are now interested in hair care and some are bombarded by promising advertisements. In reality, hair disorders may be complex and require accurate diagnosis for suitable treatment. Hair Loss and Restoration provides an extensive look at the practical management, both medical and surgical, of all forms of hair loss. Proper examination of the patient with hair loss is discussed in depth as is androgenetic alopecia, the most common cause of hair loss. The autoimmune disease alopecia areata is examined comprehensively, including its pathogenesis, clinical features, differential diagnosis, and treatment. This edition also covers new developments on the diagnosis and treatment of the disease. Hair loss from drugs and radiation is reviewed along with other topics such as telogen effluvium and frontal fibrosing alopecia(an increasing concern in scarring hair loss. Hair restoration surgery is described in detail and an excellent review of what is available from a nonmedical approach to hair loss is provided. Extensively referenced and illustrated with more than 300 clinical color photographs, this compact and easy-to-read book is a valuable resource for both doctors and patients.

Written by experts from London's renowned Royal Free Hospital, Textbook of Plastic and Reconstructive Surgery offers a comprehensive overview of the vast topic of reconstructive plastic surgery and its various subspecialties for introductory plastic surgery and surgical science courses. The book comprises five sections covering the fundamental principles of plastic surgery, cancer, burns and trauma, paediatric plastic surgery and aesthetic surgery, and covers the breadth of knowledge that students need to further their career in this exciting field. Additional coverage of areas in which reconstructive surgery techniques are called upon includes abdominal wall reconstruction, ear reconstruction and genital reconstruction. A chapter on aesthetic surgery includes facial aesthetic surgery and blepharoplasty, aesthetic breast surgery, body contouring and the evolution of hair transplantation.The broad scope of this volume and attention to often neglected specialisms such as military plastic surgery make this a unique contribution to the field. Heavily illustrated throughout, Textbook of Plastic and Reconstructive Surgery is essential reading for anyone interested in furthering their knowledge of this exciting field. This book was produced as part of JISC's Institution as e-Textbook Publisher project. Find out more at https://www.jisc.ac.uk/rd/projects/IC's Institution-as-e-textbook-publisher

Follicular Unit Extraction

The Tale of Two Transplants My Journey to Discovering the Best Hair Transplants for Under 2K

The Hair Transplant

Hair transplantation is in demand worldwide, but because Asian hair tends to be more sparse and coarse than Caucasian hair, transplantation procedures need to be adapted to Asian patients. This book, exclusively devoted to Asian hair, is a complete and comprehensive text written by a group of authors sharing their experience in their specialized fields of hair restoration. Included are many practical tips as well as chapters on regional transplantation such as eyebrows, eyelashes, sideburns, beards, and mustaches, in addition to the usual scalp hair restoration. With its many illustrations, the book gives readers a complete knowledge of hair restoration surgery and provides a quick, easy-to-use reference on Asian hair and the differences in patients' demands. With an influx of new physicians in this challenging field of medicine, further education and training are imperative and must be available to provide a high standard of medical practice. This compilation meets that objective and ultimately makes the valuable contribution of restoring patients' self-confidence.

This new edition has been fully revised to provide spine surgeons with the latest advances in their field. Beginning with an overview of surgical anatomy of the spine, the following chapters describe numerous surgical techniques for each section of the spine – cervical, thoracic, and lumbosacral. The text covers both traditional and new procedures, and includes discussion on recent technologies such as disk arthroplasty and minimally invasive techniques. The final section of this comprehensive volume focuses on associated practices including graft harvesting, discography, and cement augmentation. Authored by renowned experts in the field, this guide is enhanced by clinical photographs and diagrams. A list of ‘key points’ summarises the most important aspects in each chapter. Previous edition (9789350903261) published in 2013. Key points Fully revised, new edition presenting latest advances in spinal surgery Covers techniques for each section of the spine Authored by internationally recognised, US-based experts in the field Previous edition (9789350903261) published in 2013

Alcohol use disorder (AUD) is a major public health problem in the United States. The estimated 12-month and lifetime prevalence values for AUD are 13.9% and 29.1%, respectively, with approximately half of individuals with lifetime AUD having a severe disorder. AUD and its sequelae also account for significant excess mortality and cost the United States more than \$200 billion annually. Despite its high prevalence and numerous negative consequences, AUD remains undertreated. In fact, fewer than 1 in 10 individuals in the United States with a 12-month diagnosis of AUD receive any treatment. Nevertheless, effective and evidence-based interventions are available, and treatment is associated with reductions in the risk of relapse and AUD-associated mortality. The American Psychiatric Association Practice Guideline for the Pharmacological Treatment of Patients With Alcohol Use Disorder seeks to reduce these substantial psychosocial and public health consequences of AUD for millions of affected individuals. The guideline focuses specifically on evidence-based pharmacological treatments for AUD in outpatient settings and includes additional information on assessment and treatment planning, which are an integral part of using pharmacotherapy to treat AUD. In addition to reviewing the available evidence on the use of AUD pharmacotherapy, the guideline offers clear, concise, and actionable recommendation statements, each of which is given a rating that reflects the level of confidence that potential benefits of an intervention outweigh potential harms. The guideline provides guidance on implementing these recommendations into clinical practice, with the goal of improving quality of care and treatment outcomes of AUD.

This book is a comprehensive guide to hair transplantation for dermatologists and hair transplant surgeons. The text begins with an introduction to evaluation, workup and postoperative care, and anaesthesia and pain management. The next chapters guide clinicians step by step through direct hair transplantation, design, and reconstruction, followed by discussion on follicular unit excision (FUE), a technique using grafts. In addition to detailed coverage of hair transplantation on the scalp, the book also explores body hair transplants and eyebrow and eyelash transplantation, concluding with a chapter on setting up a hair transplant centre. The book is further enhanced by nearly 400 descriptive photographs, diagrams and tables. Key points Comprehensive, step by step guide to hair transplantation Includes discussion on follicular unit excision (FUE) and its complications Covers body hair and eyebrow/eyelash transplantation as well as scalp Features nearly 400 clinical photographs, diagrams and tables

A Practical Guide

Hair Restoration Surgery in Asians

WHO Guidelines for Indoor Air Quality

Complementary Fat Grafting

Alcoholics Anonymous

This book presents WHO guidelines for the protection of public health from risks due to a number of chemicals commonly present in indoor air. The substances considered in this review, i.e. benzene, carbon monoxide, formaldehyde, naphthalene, nitrogen dioxide, polycyclic aromatic hydrocarbons (especially benzo[a]pyrene), radon, trichloroethylene and tetrachloroethylene, have indoor sources, are known in respect of their hazardousness to health and are often found indoors in concentrations of health concern. The guidelines are targeted at public health professionals involved in preventing health risks of environmental exposures, as well as specialists and authorities involved in the design and use of buildings, indoor materials and products. They provide a scientific basis for legally enforceable standards. A source of information for men and women suffering from hair loss described in detail and in an easy-to-read format the latest surgical, medical, and alternative treatments for hair loss. No aspect of this issue has been left untouched, giving the reader a comprehensive understanding of causes and solutions. Original

Hair Transplant 360 is conceived as an entirely new project idea in which the physicians and the assistants have each been afforded an equally, authoritative voice. Volume 2 is written by an assistant for assistants. Phase 1 training (how to train a new assistant and determine whether that individual will perform well using a new “foam model” technique developed by the author). Phase 2 training (how to train an assistant using live tissue after completion of phase 1 training developed by the author). Review of anatomy, physiology and surgery basics for the assistant. Graft preparation: slivering and graft dissection (step-by-step approach). Managing difficult graft preparation situations: white hair, ethnic hair, scar tissue, etc. Graft placement technique and strategies (step-by-step approach). Understanding regional hair transplant principles (appropriate follicular unit selection and distribution according to their size, hair color and hair characteristics). Understanding the importance of hair curl. Managing difficult graft placement situations: popping, bleeding and oozing. Quality control for the assistant. Office set-up, photography basics, surgery room set-up and take down. Body ergonomics, stress management, team work.

This new edition of a highly acclaimed standard reference has been restructured for greater practical usefulness, to follow the clinical setting: it meticulously describes and illustrates all procedures utilized by the most recognized leaders in the field, to showcase current trends, controversies, and innovations in practice. Video is provided on the Thieme MediaCenter.

Contemporary Hair Transplant Surgery

Hair Transplant 360: Follicular Unit Excision (FUE)

Immunisation against infectious diseases

The Empire Strikes Black

A Step by Step Approach

Hair transplantation is widely recognized as the most effective current treatment for male pattern baldness. Until now, however, it has not received comprehensive treatment in a single book. This new work, the first devoted exclusively to hair transplant surgery, provides information on patient evaluation, operative planning, and the step-by-step details of surgical technique. Written by a team of leading experts, the book focuses throughout on procedures that have proven successful in the authors' own clinical experience, including: Help in planning the right operation for all types of pattern baldness Pointers on combining standard grafts, minigrfts, and micrografts to achieve a natural appearance Advice on treating young, rapidly balding patients Information on designing surgery that ages with the patient and produces permanent, high-quality results This textbook contains the latest advances and scientific knowledge from the leading experts in hair biology, hair disorders, and clinical trichology. The book consists of ten sections in which hair biology, hair genetics, hair diagnostics, hair loss types, pathogenesis, treatment options, and restoration techniques are discussed. This book also emphasizes on various genetic and nongenetic alopecia types, differential diagnosis, and the measurement of hair loss. One chapter of the book is devoted to natural products for hair care and treatment. We believe that this textbook will serve as a comprehensive guide to many physicians dealing with hair disorders in their clinical practice.

Conditions of the hair and scalp often cause significant psychological distress and sometimes physical discomfort for patients. Similarly, finding the right treatment can prove challenging for the physician. Hair and Scalp Treatments -- A Practical Guide, focuses on therapy with each chapter briefly describing the disease to the reader and then teaching the step-by-step therapeutic algorithm. Procedures commonly used in the treatment of alopecias are also reviewed and explained in specific chapters. This book also discusses everyday questions that patients commonly ask doctors and provides practical tips such as how to recommend the best shampoo, conditioner or hair dye for your patient, or how to prescribe the right nutritional supplements. There are additional sections on future treatments on the horizon and how regenerative medicine can be used. Hair and Scalp Treatments -- A Practical Guide, is the only book of its kind focused on treatment and addresses topics that are not covered by current titles on hair disorders. Written and edited by leading experts in the field, this practical guide can be used not only by dermatologists but by general practice and family physicians as well.

The basic text for Alcoholics Anonymous.

The first medical specialty selection guide written by residents for students! Provides an inside look at the issues surrounding medical specialty selection, blending first-hand knowledge with useful facts and statistics, such as salary information, employment data, and match statistics. Focuses on all of the major specialties and features firsthand portrayals of each by current residents. Also includes a guide to personality characteristics that are predominate with practitioners of each specialty. “A terrific mixture of objective information as well as factual data make this book an easy, informative, and interesting read.” --Review from a 4th year medical student

Completely revised and expanded edition of Hair Transplant 360 For Assistants, Volume 2, edited by Emma Karamovskí Vance from the Lam Institute for Hair Restoration in Plano, Texas. The book is divided into two parts: the first part, ‘Core 360’, covers the basics of hair anatomy, growth cycles necessary for assisting hair restoration, male and female pattern baldness, non-surgical hair loss solutions, and the evolution of hair restoration procedures. Part one also features extensive sections on graft preparation and graft placement. The second part of the book, ‘More 360’, covers patient care, from postoperative through short and long term follow-up. Part two features an assistant training section which includes standardised hair-transplant photography and stress management. This highly illustrated new edition also includes an expanded and updated DVD-ROM covering a wide range of topics, from surgery overview and preparation, to quality control, graft handling and placement, and a ‘Test Your Knowledge’ section, making Hair Transplant 360 for Assistants, Volume 2 an ideal resource for hair transplant assistants in training. Key Points Completely revised and expanded edition Previous edition published 2011 (9789350251799) DVD-ROM featuring surgery overview, assistant training, and ‘Test Your Knowledge’ section 319 colour images and illustrations Edited by Emma Karamovskí Vance from Lam Institute for Hair Restoration, Plano, Texas

Jamison Haponenko, a busy serial entrepreneur had his first hair transplant 13 years ago. At that time he was solely focused on growing a thriving glass company he started. Being extremely busy he neglected to research all of the options available to him. Thinking that better might be better he decided to go with a large highly recognized company for his first procedure, and the results were, let's just say okay. 11 years later he decided it was time to look at getting a second hair transplant. However, this time he was on a mission. Since then, he has spent countless hours in research and has consulted with industry leaders from around the world. All in an effort to find the best hair transplant results possible. This book will take you along his journey as he travels from blindly following the crowd to taking control and finding the best quality results, using breakthrough technology at a mindblowing low price.

Hair Transplant 360: Volume 4

Advances, Techniques, Business Development & Global Perspectives

Hair Transplantation

The Art of Micrografting and Minigrafting, Second Edition

Textbook of Plastic and Reconstructive Surgery

Step by Step Hair Transplantation

Hair Transplant 360 is conceived as an entirely new project idea in which the physicians and the assistants have each been afforded an equally, authoritative voice. Volume 1 is written by a physician for physicians. Understanding when it is safe and beneficial to operate and when to forgo the procedure (medical hair loss conditions, the dilemma of the young patient, scarring alopecia, etc.). Understanding male-pattern baldness and female-pattern baldness. Medical management of hair loss. Hairline design (principles, artistic, ethnic and gender variations; step-by-step technique). Donor harvesting (determining area for harvest, understanding and using different harvest techniques, when to perform a recipient-site closure; step-by-step technique). Recipient-site creation (basic principles; angles and distribution; regional considerations: hairline, female hairline, central forehead, midscalp, temple, lateral hair and crown; step-by-step technique for both single follicular unit grafting and multiple follicular unit grafting). Postoperative care, identifying and managing complications. Creating standardized hair-transplant photography. Leadership, office management and marketing. Quality control algorithm for the physician. Case studies, emphasizing creative approach to hair restoration.

This is a completely revised and expanded edition of Hair Transplant 360 for Physicians, Volume 1, edited by Samuel M Lam, Director of the Lam Institute for Hair Restoration Plano, Texas, featuring extensive discussion of bioengineering technology. The book is divided into two parts: part one focuses on preoperative, operative and postoperative care. Chapter one features brand new and updated information on several therapies, and discussion on medical hair loss conditions. Chapter two includes completely revised guidance on operative technique, with a range of step-by-step techniques including hairline design, donor harvesting and recipient-site creation. The post-operative chapter includes discussion on creating standardised hair-transplant photography, leadership, office management and marketing. The second part of the book contains new case studies in hair transplantation, and a final chapter on physician training, which is demonstrated on a DVD-ROM. The DVD has been expanded and updated to cover hairline design using human models, donor harvesting, and recipient-site practice, making Hair Transplant 360 for Physicians, Volume 1 an ideal resource for hair transplant physicians in training. Key Points Revised and expanded second edition Previous edition published 2011 (9789350251782) 263 full colour images and illustrations DVD-ROM including step-by-step demonstrations for trainee physicians Edited by Samuel M Lam, Director, Lam Institute for Hair Restoration Plano, Texas, USA

City Council President Joseph Coolman was pist. His eyes were filled with vinegar, bile, rage you name it! I mean hotter than Marge Tartaglione on a bad day. “I promise you on the grave of my father that I will destroy that son of bitch!” scowled Joe Coolman as he sipped his Hennessy. He was sitting in the dark of his City Council President Office firmly affixed in his big leather chair. He slowly rocked back and forth. He was like a cobra. Ready to pounce. Maybe like a panther. But not moving too quickly. This one would take a little time. “Big Blarney my ass,” he spoke to himself. And a patient man he was.... NOT A HAPPY BREAKFAST Democratic Party Unity Breakfast, Philadelphia, Pennsylvania. Bellevue Stratford Hotel. No matter how bad the political war or election, primary or general, the eggs get scrambled together into an omelet. They meet the day after the election to make peace. To unify. To continue to solidify the dominant political party again no matter what. Philly is a Democrat town. No ifs, ands, or comolits about it. With a 7 to 1 voter registration advantage in the fifth largest city in the country (No, Philly didn't drop to lower than 6th or 7th nationally except maybe in the National League East). In terms of voter advantage, not even Frank Rizzo could switch over that Democrat nutcase to Republican. Not even half would do it for the Bamboos these days. With a voter lead like that, Johnny Bouchee and The Democratic Party of Philadelphia County / City of Philadelphia had “fack you votes.” He didn't need shit from anybody to win a general election by 4 or 5 to one in November even if the roof fell in or Rizzo appeared in the clouds over Boathouse Row. But this past primary created a lot of bad blood. A lot. The cuts went deep, and the screwing was of blamey and booze. The good of it, for Johnny Bouchee, was The Irish retook the City politically. It had been a while. But Johnny and Bobby Eamon were sitting pretty these days. They were smirking a great deal as the sun glimmered in those Irish Eyes. But like I said, this one cut deep. There was gonna be a price to pay. This Democrat's Unity Breakfast needed a lot of saline and bandages to heal. Salve? They needed more than that! They needed morphine and transplant organs to heal this trauma. The road to recovery went through the heart of North Philadelphia. The reason for it was simple. The African American Political Hierarchy took more than a haircut as James Francis Malloy became the Democratic Nominee for Mayor of Philadelphia. In truth, they got scalped. And the blood was all over Johnny Bouchee's and Bobby Eamon's hands. It happened like this every primary election. It was lick the wounds day and make peace and give respect to the vanquished over cold eggs and scrapple. In fact, Johnny Bouchee had been doing this breakfast for decades... but not today. Today, the rift was a little too big to manage over a breakfast, and Johnny knew it. It was bloody and ugly. A bad cut above the eye. The Philly Democrats looked like Rocky Balboa's face.

This book provides a comprehensive overview of hair transplantation using the Folicle Unit Extraction method, and is the translation of the successful German edition. Following a brief introduction to the topic and explaining key terms used in hair surgery, it discusses one of the most common reasons for hair loss - androgenic alopecia in men and women. The main body then describes the surgical procedure for the Folicle Unit Extraction (FUE) method, including prerequisites for donor and recipient sites, and postoperative care. The result of this minimally invasive procedure are detailed in a wealth of high-quality pictures. The punch and the FUT technique are highlighted as sampling methods. Rounding off the coverage of this highly interesting topic, the book summarizes the latest findings and offers an outlook on further developments. This book offers a valuable guide for all plastic surgeons and dermatologists interested in performing this technique at their practices.

Hair Transplant 360 for Assistants

Clinical Synopsis and Color Atlas of Skin Tumors

The Ultimate Guide To Choosing a Medical Specialty

Hair Transplant 360 (For Assistants), Volume 2

Hair Transplant 360: Volume 4 – Follicular Unit Extraction (FUE) is an illustrated guide to this minimally invasive procedure, involving the grafting of hair follicles that are genetically resistant to balding, onto a bald scalp. This book is edited by Samuel Lam, Director of the Lam Institute for Hair Restoration, Texas, and Kenneth L Williams from the Irvine Institute of Medicine and Cosmetic Surgery/Orange County Hair Restoration, California. The book is divided into 25 chapters across three sections. The first section covers the basics of FUE beginning with the history, terminology and physics of the technique. Other chapters include information on skin properties and anatomy, scalp anaesthesia, donor evaluation and surgical planning, and improving graft survival. Guidance on starting a practice in FUE is also included. The second part of the book covers FUE methods in detail, and the final section features discussion on specialised topics, such as regenerative medicine, complications and difficulties of FUE, and FUE from the beard and body. Hair Transplant 360: Volume 4 – Follicular Unit Extraction (FUE) contains 510 full colour photographs and illustrations, and includes four DVD ROMs demonstrating various FUE procedures in detail. Key Points Comprehensive, illustrated guide to follicular unit extraction procedures Edited by renowned US experts in the field 510 full colour photographs and illustrations Includes four DVD ROMs demonstrating FUE procedures

This book is a complete guide to dermatologic surgery for clinicians. Divided into 52 sections, the text begins with an overview of surgical instruments, local anaesthesia, sutures, dressings and skin biopsy). The following chapters cover numerous techniques for different dermatologic conditions, from mole surgery, vitiligo, and nail surgery, to Mohs surgery, laser scar revision, fillers, and much more. Each procedure is described with a step by step approach and includes tips and tricks, modifications, potential complications and recent advances. Both common and more complex disorders and techniques are explained in detail. The comprehensive text is further enhanced by more than 1800 clinical and surgical photographs, diagrams and tables. Key points Comprehensive guide to dermatologic surgery Covers numerous common and more complex disorders and techniques Tips and tricks, modifications, complications and recent advances highlighted for each topic Highly illustrated with more than 1800 photographs, diagrams and tables

This is the third edition of this publication which contains the latest information on vaccines and vaccination procedures for all the vaccine preventable infectious diseases that may occur in the UK or in travellers going outside of the UK, particularly those immunisations that comprise the routine immunisation programme for all children from birth to adolescence. It is divided into two sections: the first section covers principles, practices and procedures, including issues of consent, contraindications, storage, distribution and disposal of vaccines, surveillance and monitoring, and the Vaccine Damage Payment Scheme; the second section covers the range of different diseases and vaccines.

This book/DVD set is a thoroughly illustrated “how-to” guide to facial fat transfer, a new facial rejuvenation procedure that allows the surgeon to sculpt the face and restore it to its natural beauty. Fat is harvested from fatter areas of the body through a suction technique and injected into the face with a small cannula. The fat transferred becomes incorporated as living tissue and the results are extremely long lasting. The book guides readers through this procedure with easy-to-follow instructions and more than 200 full-color step-by-step illustrations. Two DVDs accompanying the book contain videos demonstrating the procedure and pitfalls.

Hair Transplant 360 For Physicians

Hair Transplant 360 (For Physicians), Volume 1

Alex Fitzpatrick, transplanted Jersey girl, has recently moved to Sherman, Nebraska and opened her own pub. Sherman is on the map, but sometimes Alex feels she's living in a time warp. The little boys have crew cuts and the residents smile and say hello to strangers. No one locks their doors. Then, on a cold October night, Book Ends, a wonderful Main Street bookstore, burns down with the owner, Alex's friend Barb, inside. As Alex grieves, her initial unease about the fire deepens into a conviction that it was arson. She digs into Barb's past and finds enemies there: an abusive ex-husband-a farmer embittered by their divorce-and closer to home, God's Warriors, a secretive local men's group; their Promise Keepers meets Ku Klux Klan. Becoming a detective was not Alex's game plan and sometimes she feels like a Miss Marple impersonator. But Alex is determined to discover who set the fire. Humor helps her keep things in perspective. She's also helped by her wisecracking friend Kathy (her instructor in Nebraska 101) and Chris, a beautiful photographer to whom she is secretly, unwillingly attracted. But someone wants them to stop, and pranks escalate into threats. To discover the arsonist, Alex must decode the often mystifying culture of Sherman, Nebraska, whose sunny surface conceals more darkness than she'd bargained for. Ultimately, her investigation will force her to confront this question: does a Jersey tomato belong in Nebraska dirt? This is the first book in the Alex Fitzpatrick mystery series.

Hair Transplant Surgery and Platelet Rich Plasma: Evidence-Based Essentials is a high-quality, focused guide poised to become a landmark text for any surgeon interested in learning about or treating hair restoration. Going beyond anecdotal and popularized treatments commonly found online, this text reviews evidence-based treatment options with demonstrated success to provide tailored and optimal results for patients. The content reviews essential topics for understanding of hair loss, the natural cycle of hair regrowth, and medical factors to consider in creating a treatment plan. Postoperative patient instructions and realistic patient expectations are discussed as well as risks and patient selection criteria. Authors also detail pearls and pitfalls for achieving desired results and avoiding rare complications.

Articles in this issue include: Androgenetic Alopecia: Pathophysiology and medical therapy; Follicular Unit Transplantation; Follicular Unit Extraction; Hair Transplantation for Scarring Alopecia; Facial Hair Transplantation; Platelet Rich Plasma/Stem Cells and Hair Transplantation; Robotic Hair Transplantation; Surgical Hairline Advancement; Hair Transplantation in Women; Complications with Hair Transplantation; and The Role for Topical Hair Growth Medications. Make \$100,000 a Year As a Beggar!

Take a Breath

A Transplant Journey

Hair loss affects millions of men and women worldwide. As plastic surgeons and dermatologists seek to expand their practices, hair transplantation is a natural area of focus. This new edition provides these physicians with the information they need to add hair transplantation techniques to their practices. Dr. Alfonso Barrera and Dr. Carlos Uebel, the two leading experts on hair restoration, have collaborated to produce a totally rewritten and revised book which includes many new techniques and 14 new chapters focusing on cutting-edge topics such as, platelet-enriched growth factors, tissue engineering cloning, and autologous cellular therapy. These world-renowned experts describe the latest techniques of follicular unit micrografting and minigrafting which help physicians avoid the unnatural hairlines and the plugged appearance so characteristic of early transplant procedures. Furthermore, they provide the tools surgeons need to increase the scope of their aesthetic practices and improve the cosmetic results from both aesthetic and reconstructive procedures with updated information to help avoid problems of healing and potential complications. This beautifully illustrated reference provides the critical insights needed to treat a variety of hair loss problems, ranging from male pattern baldness and female alopecia to scalp scars and sideburn irregularities. Twenty-one comprehensive chapters provide a total approach to evaluation and treatment. Initial chapters contain basic information on anatomy, physiology, and patient evaluation, and they lay a foundation for the detailed, step-by-step operative sequences that follow. Topics covered include basic techniques for treating male and female hair loss, as well as special applications for camouflaging scalp scars; filling in sideburns; restoring and enhancing eyebrows, mustaches, beards, and eyelashes; and treating burn alopecia. Combined face lift and hair transplantation techniques, as well as strategies for reoperation, are also highlighted. Whether a surgeon is treating major male pattern baldness or attempting to camouflage a scar following a face lift, this book will prove invaluable and is essential reading for anyone performing hair grafting or face-lifting techniques. One to two DVDs contain the following videos pioneered by these experts: Planning and Dissecting Minigrfts Operative Technique for Treating Male Pattern Baldness Operative Technique for Treating Female Sideburn Loss After Facelift Operative Technique for Reconstructing the Eyebrow, Scalp, Mustache, and Eyelash Performing Facelift and Hair Transplantation in a Single Surgery

This book comprehensively discusses the practical aspects of hair transplantation in Asians. The demand for hair transplantation has increased globally in recent years and Follicular Unit Extraction (FUE) is gaining popularity. As such the book examines the techniques used by different ethnic group in Asia, included shaving, non-shaving FUE and robotic hair restoration surgery. With the help of illustrations, it describes surgical techniques and provides numerous practical tips. Written by leading experts and offering an overview of the current state of the art of hair restoration surgery, it enables experienced surgeons in the field to achieve optimal outcomes and to improve patients' QOL. It is a must read for hair surgeons performing hair transplantation on members of the Asian population.
