

Handbook On Rajputs

This two-volume publication offers an in-depth analysis of ophidian symbolism in Eastern Africa, while setting the topic within its regional and historical context: namely, with regards to the rest of Africa, ancient Egypt and Mesopotamia, the Greek world, ancient Palestine, Arabia, India, and medieval and pre-Christian Europe. Through the ages, most of those areas have connected with Eastern Africa in a broad sense, where ophidian symbolism was as “rampant” and far-reaching, if not more so, as anywhere else on the continent, and perhaps in past civilisations. Much as in the wider context, snakes were held to be long-lived, closely related to holes, caverns, trees, and water, life and death, and credited with a liking for milk. Even though ophidian symbolism has always been developed out of the outstanding biological and ethological features of snakes, the process of symbolisation, which plays a crucial role in the elaboration of cultural systems and the shaping of human experience, was inevitably at work. This second volume focuses on southern Abyssinia, an area of Eastern Africa latu senso where the connection between snakes and paramount religious leaders was especially far-reaching. Their clans were said to be the outcome of sexual encounters between a young woman and an ophidian. These leaders bred and fed snakes. Some of them buried dead snakes in their compounds. Their curse was likened to the bite of a deadly serpent. This volume is devoted to a few communities of southern Abyssinia, notably the Oromo, an important group that has fascinated European travellers, missionaries, and social science specialists over a period of 150 years. The rich Oromo ethnographic record lends itself to full-circle analysis. This volume represents a significant contribution to the study of the mysterious “snake priests” of the Oromo, Hoor, Konso, and Burji peoples. In Eastern Africa, the meanings attributed to snakes were multifaceted and paradoxical. Overall, the two volumes of this publication show that African snake symbolism broadly echoed the diverse representations of ancient civilisations. The widely acknowledged assimilation of snakes to death and Evil is therefore unrepresentative, both historically and culturally.

This collection brings together twenty-one articles that explore the diverse impact of modern empires on societies around the world since 1800. Colonial expansion changed the lives of colonised peoples in multiple ways relating to work, the environment, law, health and religion. Yet empire-builders were never working with a blank slate: colonial rule involved not just coercion but also forms of cooperation with elements of local society, while the schemes of the colonisers often led to unexpected outcomes. Covering not only western European nations but also the Ottomans, Russians and Japanese, whose empires are less frequently addressed in collections, this volume provides insight into a crucial aspect of modern world history. The Handbook of Hinduism in Europe portrays and analyses Hindu traditions in every country in Europe. It presents the main Hindu communities, religious groups, forms and teachings present in the continent and shows that Hinduism have become a major religion in Europe.

In today’s digital world, the huge amount of data being generated is unstructured, messy, and chaotic in nature. Dealing with such data, and attempting to unfold the meaningful information, can be a challenging task. Feature engineering is a process to transform such data into a suitable form that better assists with interpretation and visualization. Through this method, the transformed data is more transparent to the machine learning models, which in turn causes better prediction and analysis of results. Data science is crucial for the data scientist to assess the trade-offs of their decisions regarding the effectiveness of the machine learning model implemented. Investigating the demand in this area today and in the future is a necessity. The Handbook of Research on Automated Feature Engineering and Advanced Applications in Data Science provides an in-depth analysis on both the theoretical and the latest empirical research findings on how features can be extracted and transformed from raw data. The chapters will introduce feature engineering and the recent concepts, methods, and applications with the use of various data types, as well as examine the latest machine learning applications on the data. While highlighting topics such as detection, tracking, selection techniques, and prediction models using data science, this book is ideally intended for research scholars, big data scientists, project developers, data analysts, and computer scientists along with practitioners, researchers, academicians, and students interested in feature engineering and its impact on data.

Even though ophidian symbolism has always been developed out of the outstanding biological and ethological features of snakes, the process of symbolisation, which plays a crucial role in the elaboration of cultural systems and the shaping of human experience, was inevitably at work. This first volume deals with snakes as a zoological category; snake symbolism as perceived by encyclopaedists and psychologists; and ophidian symbolism as it occurred in ancient civilisations. It explores the traditional African scene in general with a view to set the scene for a more proximate baseline for comparison. The divide between animals and humans was porous, and snakes had a more or less equal footing in both the animal realm and the spiritual world. Key features of snake symbolism in traditional Eastern Africa are then examined in detail, especially phantasmagorical snakes, the rainbow serpent, snake-totems, and snake-related witches and ritual leaders, among others. In Eastern Africa, the meanings attributed to snakes were multifaceted and paradoxical. Overall, the two volumes of this publication show that African snake symbolism broadly echoed the diverse representations of ancient civilisations. The widely acknowledged assimilation of snakes to death and Evil is therefore unrepresentative, both historically and culturally.

Imperial Sovereignty and Local Politics

Imperial Sovereignty and Local Politics takes at its focus the historically significant interconnections between local polities and imperial formations in South Asia. Using the relationship between the Bhadauria Rajputs and the Mughal, Maratha and British Empires as a prism to evaluate the constitution of sovereignty and the process of state formation, it demonstrates the enduring relevance of symbolism and ritual, the persistence of pre-colonial political forms and ideologies and the continuing importance of local power networks in moulding imperial projects. Employing theories of state formation borrowed from anthropology, Singh emphasizes the need to conceptually separate political authority from symbolic sovereignty and examine the local context of imperial politics. This work provides a compelling re-orientation of the way we understand the nature of imperial states, the experience of sovereignty and the processes of political change in the eighteenth and nineteenth centuries.

There is no industry left where artificial intelligence is not used in some capacity. The application of this technology has already stretched across a multitude of domains including law and policy; it will soon permeate areas beyond anyone’s imagination. Technology giants such as Google, Apple, and Facebook are already investing their money, effort, and time toward integrating artificial intelligence. As this technology continues to develop and expand, it is critical for everyone to understand the various applications of artificial intelligence and its full potential. The Handbook of Research on Innovative Management Using AI in Industry 5.0 uncovers new and innovative features of artificial intelligence and how it can help in raising economic efficiency at both micro and macro levels and provides a deeper understanding of the relevant aspects of artificial intelligence impacting efficacy for better output. Covering topics such as consumer behavior, information technology, and personalized banking, it is an ideal resource for researchers, academicians, policymakers, business professionals, companies, and students.

A fresh and stimulating examination of the ideology, programmes, expressions and consequences of the British ‘civilizing mission’ in South Asia.

Providing a comprehensive overview of the study of gender in South Asia, this Handbook covers the central contributions that have defined this area and captures innovative and emerging paradigms that are shaping the future of the field. It offers a wide range of disciplinary and interdisciplinary perspectives spanning both the humanities and social sciences, focussing on India, Pakistan, Bangladesh and Sri Lanka. The Handbook brings together key experts in the field of South Asia and gender, women and sexuality. Chapters are organised thematically in five major sections: Historical formations of gender and the significance of colonialism and nationalism Law, Citizenship and the Nation Representations of Culture, Place, Identity Labour and the Economy Inequality, Activism and the State This timely survey is essential reading for scholars who research and teach on South Asia as well as for scholars in related interdisciplinary fields that focus on women and gender from comparative and transnational perspectives.

Low-Level Laser Therapy (LLLT) also known as photobiomodulation is almost 50 years old, and recently has been getting increasing acceptance from the scientific, medical, and veterinary communities. Discoveries are constantly being made about the cellular and molecular mechanisms of action, the range of diseases that can be treated is also rising, and home use LED devices are becoming common. This book compiles cutting-edge contributions from the world’s leading experts in Photobiomodulation and LLLT. Chapters cover general concepts, mechanisms of action, in vitro studies, pre-clinical animal studies, veterinary applications and a wide range of clinical topics. Edited by Michael Hamblin from Massachusetts General Hospital and Harvard Medical School, aided by two prominent researchers (Marcelo Sousa and Tanupriya Agrawal), this book will appeal to anyone involved in the basic science, translational aspects and clinical applications of LLLT.

This handbook presents a multilayered and multidimensional history of state formation in premodern India. It explores dense and rich local and subregional historiography from the mid-first millennium BC to the eighteenth century in South Asia. Shifting the focus away from economic and political factors, this handbook revises the conventional understanding of states and empires and locates them in their quotidian conduct and activity on socio-cultural and concomitant factors. Comprehensive in scope, this handbook addresses a range of themes connected with the idea of state formation in the subcontinent. It includes discussions and debates on ritual practices and the Brahmanical order in early India; the Delhi Sultanate and role of Sultans among the Hindu kings; the cosmopolitan ‘Islamicate’ cultural influences on Puranic Hinduism; cultural background of the Mughal state. The handbook examines new questions and ideologies of state formation, such as:

- facets of violence and resistance;
- the significance of the autonomous spaces and forests;
- regional elites, including ‘Little kings’;
- tribal background of some famous cults;
- trade and maritime commerce;
- royal patronage, courtly manners, lineage formation;
- imperial architecture, monuments, and temple, among others.

Featuring case studies from different part of the India subcontinent, and with contributions by renowned historians, this authoritative handbook will be an indispensable reading for teachers, scholars, and students of early India, medieval India, premodern India, South Asian history, Asian history, historiography, economic history, historical sociology, and South Asia studies.

This book challenges the view, common among Western scholars, that precolonial India lacked a tradition of military philosophy. It traces the evolution of theories of warfare in India from the dawn of civilization, focusing on the debate between Dharmayuddha (Just War) and Kutayuddha (Unjust War) within Hindu philosophy. This debate centers around four questions: What is war? What justifies it? How should it be waged? And what are its potential repercussions? This body of literature provides evidence of the historical evolution of strategic thought in the Indian subcontinent that has heretofore been neglected by modern historians. Further, it provides a counterpoint to scholarship in political science that engages solely with Western theories in its analysis of independent India’s philosophy of warfare. Ultimately, a better understanding of the legacy of ancient India’s strategic theorizing will enable more accurate analysis of modern India’s military and nuclear policies.

In the era of social connectedness, people are becoming increasingly enthusiastic about interacting, sharing, and collaborating through online collaborative media. However, conducting sentiment analysis on these platforms can be challenging, especially for business professionals who are using them to collect vital data. Sentiment Analysis and Knowledge Discovery in Contemporary Business is an essential reference source that discusses applications of sentiment analysis as well as data mining, machine learning algorithms, and big data streams in business environments. Featuring research on topics such as knowledge retrieval and knowledge updating, this book is ideally designed for business managers, academicians, business professionals, researchers, graduate-level students, and technology developers seeking current research on data collection and management to drive profit.

Canvas of the Chauhan King ' s life has been unfurled. From the desert of Bikampur to beyond the Chambal ravines. Shiwalik hills to the peaks of Aravali. This book flies with the undaunted Prithviraj, witnessing the formation of history. It locks horns with his controversies and observes their vast ramifications at the curves of Indian destiny. The author acknowledges a widening divide between facts and the current mainstream narrative on Prithviraj who is a brand ambassador of India's engrossing medieval History. With this work, Virendra has eyed to shoot down every myth about Prithviraj and free the young Indian hero ' s truth from the claws of fringe camps of new and old propaganda. The book makes use of more than 100 authentic sources to substantiate it's data and applies methodical theory formation to put forth its arguments.
