Through close analysis of texts, cultural and civic communities, and intellectual history, the papers in this collection, for the first time, propose a dynamic relationship between rhetoric and medicine as discourses and disciplines of cure in early modern Europe. Although the range of theoretical approaches and methodologies represented here is diverse, the essays collectively explore the theories and practices, innovations and interventions, that underwrite the shared concerns of medicine, moral philosophy, and rhetoric: care and consolation, reading, policy, and rectitude,

The Handbook of Research on Applied Learning Theory and Design in Modern Education provides international perspectives from education professors and researchers, cyberneticists, psychologists, and instructional designers on the processes and mechanisms of the global learning environment.

Highlighting a compendium of trends, strategies, methodologies, technologies, and models of applied learning theory and design, this publication is well-suited to meet the research and practical needs of academics, researchers, teachers, and graduate students as well as curriculum and instructional design professionals. This panoramic book tells the story of how revolutionary ideas from the Enlightenment about freedom, equality, evolution, and democracy have reverberated through modern history and

shaped the world as we know it today. A testament to the enduring power of ideas, The Shape of the New offers unforgettable portraits of Adam Smith, Thomas Jefferson, Alexander Hamilton, Charles Darwin, and Karl Marx—heirs of the Enlightenment who embodied its highest ideals about progress—and shows how their thoughts, over time and in the hands of their followers and opponents, transformed the very nature of our beliefs, institutions, economies, and politics. Yet these ideas also hold contradictions. They have been used in the service of brutal systems such as slavery and colonialism, been appropriated and twisted by monsters like Stalin and Hitler, and provoked reactions against the Enlightenment's legacy by Islamic Salafists and the Christian Religious Right. The Shape of the New argues that it is impossible to understand the

ideological and political conflicts of our own time without familiarizing ourselves with the history and internal tensions of these world-changing ideas. With passion and conviction, it exhorts us to recognize the central importance of these ideas as historical forces and pillars of the Western humanistic tradition. It makes the case that to read the works of the great thinkers is to gain invaluable insights into the ideas that have shaped how we think and what we believe. What role do metaphors play in philosophical language? Are they impediments to clear thinking and clear expression, rhetorical flourishes that may well help to make philosophy more accessible to a lay audience, but that ought ideally to be eradicated in the interests of terminological exactness? Or can the images used by philosophers tell us more about the hopes and cares,

attitudes and indifferences that regulate an epoch than their carefully elaborated systems of thought? In Paradigms for a Metaphorology, originally published in 1960 and here made available for the first time in English translation, Hans Blumenberg (1920-1996) approaches these questions by examining the relationship between metaphors and concepts. Blumenberg argues for the existence of "absolute metaphors" that cannot be translated back into conceptual language. "Absolute metaphors" answer the supposedly naïve, theoretically unanswerable questions whose relevance lies quite simply in the fact that they cannot be brushed aside, since we do not pose them ourselves but find them already posed in the ground of our existence. They leap into a void that concepts are unable to fill. An afterword by the translator, Robert Savage, positions the book in the

Project and Sleepless in Seattle, Happiness for Humans considers what exactly makes people fall in love. And whether it's possible for a very artificially intelligent machine to discover the true secret of real human happiness.

Frank E. Burdett is a survivor from seriousness. This is no laughing matter and only needs a simple explanation. Frank decided to divorce himself from all seriousness in an effort to gain control of his sense of humour. Once he attained his sense of humour he realised that the amount of absurdity and nonsense that abounds in society can only be diagnosed, in the gentlest of terms, as over-seriousness of epidemic proportions. Frank has researched and evaluated the importance of nurturing your sense of humour in order to balance the well-being of people everywhere, especially against the high degrees of stress, both emotional

and work-associated challenges that attack everyone today. He came to the conclusion that people of all persuasions have completely lost the knack of being able to step aside and have a good and free laugh at themselves. Therefore, the time has come for you to learn to laugh at yourself and live longer! Frank knows the effects of harrowing trauma, being attacked, mauled and carried away by a man-eating tiger and, curing himself of spreading melanoma cancer of the neck/shoulder, both lungs, liver and bowel cancer. He had been diagnosed by orthodox medicine as stage IV and given six months to live. He tuned to find an alternative cure. He has now been four years free of cancer. Frank devised a technique whereby, even you, can benefit and learn to laugh at yourself. You have nothing to lose, except your overpowering seriousness. Frank spent three years

delving into the properties of laughing at yourself and he soon realised that there is more to laughing than showing a set of teeth. Laughing at yourself allows you the complete freedom to see stress and seriousness in their proper light, as a threat to your long-lasting happiness. This is your opportunity to take a real look at yourself by using Frank's technique to step on the path towards learning the Art of Happiness. You either want to be free from the pangs of stress and seriousness, or you do not! Your choice!

This volume presents a selection of the philosophical papers which Richard Rorty has written over the past decade, and complements three previous volumes of his papers: Objectivity, Relativism, and Truth, Essays on Heidegger and Others and Truth and Progress. Topics discussed include the changing role of philosophy in Western culture over the course of recent

centuries, the role of the imagination in intellectual and moral progress, the notion of 'moral identity', the Wittgensteinian claim that the problems of philosophy are linguistic in nature, the irrelevance of cognitive science to philosophy, and the mistaken idea that philosophers should find the 'place' of such things as consciousness and moral value in a world of physical particles. The papers form a rich and distinctive collection which will appeal to anyone with a serious interest in philosophy and its relation to culture. Does it melt at a certain temperature? Can you buy it? Must you suffer for it before or after? ” In her wildly and wisely observed book, the comedy legend takes on that most inalienable of rights—the pursuit of happiness. Offering herself up as a human guinea pig in a series of thoroughly unscientific experiments, Poundstone tries out a different get-happy hypothesis in each chapter of her data-driven search. The Totally Unscientific Study of the Search for Human Happiness is both a story of jumping into new experiences with both feet and a surprisingly poignant tale of a single working mother of three children (not to mention dozens of cats, a dog, a bearded dragon lizard, a lop-eared bunny, and one ant left from her ant farm) who is just trying to keep smiling while living a busy life. Like George Carlin, Steve Martin, and David Sedaris, she is a master of her craft, and her comedic brilliance is served up in abundance in this book. As author and humorist Roy Blount Jr. notes, “ Paula Poundstone deserves to be happy. Nobody deserves to be this funny. ”

What is happiness, and how does the pursuit of happiness shape our lives? Happiness appears to be a simple emotion, individual and pleasurable, yet the problems associated with happiness in politics, economics, and philosophy suggest that it is perhaps more complex and paradoxical than we first thought. This eclectic collection of essays interrogates the 'common sense' understanding of happiness in the West and examines the

strategies devised to obtain it.

Without disposing of the concept altogether, the book rediscovers the latent aspects of this pervasive (and elusive) phenomenon.

Ultimately, it concludes that our current notions of happiness may in fact be the very cause of our discontent. *On Happiness* offers readers a spectrum of critical reflections and 'rethinks' of this ubiquitous cultural obsession. ***

offers his culminating thoughts on the influential version of pragmatism he began to articulate decades ago in his groundbreaking *Philosophy and the Mirror of Nature*. Marking a new stage in the evolution of his thought, Rorty's final masterwork identifies anti-authoritarianism as the principal impulse and virtue of pragmatism. Anti-authoritarianism, on this view, means acknowledging that our cultural inheritance is always open to revision because no authority exists to ascertain the truth, once

and for all. If we cannot rely on the unshakable certainties of God or nature, then all we have left to go on—and argue with—are the opinions and ideas of our fellow humans. The test of these ideas, Rorty suggests, is relatively simple: Do they work? Do they produce the peace, freedom, and happiness we desire? To achieve this enlightened pragmatism is not easy, though. Pragmatism demands trust. Pragmatism demands that we think and care about what others think and care about, which

further requires that we account for others' doubts of and objections to our own beliefs. After all, our own beliefs are as contestable as anyone else's. A supple mind who draws on theorists from John Stuart Mill to Annette Baier, Rorty nonetheless is always an apostle of the concrete. No book offers a more accessible account of Rorty's utopia of pragmatism, just as no philosopher has more eloquently challenged the hidebound traditions arrayed against the goals of social justice.

The Human Comedy (French: La Comédie Humaine) is the title of Honoré de Balzac's multi-volume collection of interlinked novels and stories depicting French society in the period of the Restoration (1815-1830) and the July Monarchy (1830–1848). It consists of 91 finished works (stories, novels or analytical essays) and 46 unfinished works (some of which exist only as titles). It does not include Balzac's five theatrical plays or his collection of humorous tales, the "Contes drolatiques" (1832–37). The title of the series is usually considered an allusion to

Dante's Divine Comedy; while Ferdinand Brunetière, the famous French literary critic, suggests that it may stem from poems by Alfred de Musset or Alfred de Vigny. Focusing on literature by Juan Gelman, Sergio Chejfec, and Roberto Bolaño, as well as art by Eugenio Dittborn, Kate Jenckes argues that these works represent life, death, and the relation between self and other “beyond the human,” that is beyond the sense that we can know and represent ourselves and others, with powerful implications for our understanding of history, community, and politics. The idea of technological singularity, and what it would mean if ordinary human intelligence were enhanced or overtaken by artificial intelligence. The idea that human history is approaching a “singularity”—that ordinary humans will someday be overtaken by artificially intelligent machines or cognitively enhanced biological intelligence, or both—has moved from the realm of science fiction to serious debate. the field of artificial intelligence (AI) continues to develop at its current dizzying rate, the singularity could come about in the middle of the present century.
