varieties of European languages are scrutinized systematically. The synchronic picture is complemented by a chapter on the diachrony of comparative constructions. The European facts are compared to those of

the geographically adjacent Asian and African regions. It is argued that cross-linguistic investigations must take account also of so-called secondary options. These secondary options suggest strongly that the

supposedly dominant role of the particle comparative cannot be upheld for Europe. Moreover, only the secondary options allow us to draw isoglosses which cross the borders between Europe and Asia (and Africa).

he just got his big break. Up and coming comedian Brady Owens has agreed to sit down for an interview. And this isn ' t just any interview; it ' s the first interview Brady has given since a video of him lashing out at an audience member went viral. Now people are protesting his shows and calling him violent. Nancy agrees to help out with

Luckily, they find Brady unhurt and nothing of monetary value is missing from the room. Only his notebook of new material is gone. Brady says he knows it ' s

She thinks he should apologize to the crowd and admit that he crossed a line. But she recognizes a person in need of help when she sees one and agrees to get to the

This book is a functional-typological study of possession splits in European languages. It shows that genetically and structurally diverse languages such as Icelandic, Welsh, and Maltese display possessive systems which are sensitive to semantically based distinctions reminiscent of the alienability correlation. These distinctions are

grammatically relevant in many European languages because they require dedicated constructions. What makes these split possessive systems interesting for the linguist is the interaction of semantic criteria with pragmatics and syntax. Neutralisation of distinctions occurs under focus. The same happens if one of the constituents of a

possessive construction is syntactically heavy. These effects can be observed in the majority of the 50 sample languages. Possessive splits are strong in those languages which are outside the Standard Average European group. The bulk of the European languages do not behave much differently from those non-European

languages for which possession splits are reported. The book reveals interesting new facts about European languages and possession to typologists, universals researchers, and areal linguists.
