This book offers a comprehensive account of the audiovisual translation (AVT) of humour, bringing together insights from translation studies and humour studies to outline the key theories underpinning this growing area of study and their applications to case studies from television and film. The volume outlines the ways in which the myriad linguistic manifestations and functions of humour make it difficult for scholars to provide a unified definition for it, an issue made more complex in the

transfer of humour to audiovisual works and their translations as well as their ongoing changes in technology. Dore brings together relevant theories from both translation studies and humour studies toward advancing research in both disciplines. Each chapter explores a key dimension of humour as it unfolds in AVT, offering brief theoretical discussions of wordplay, culture-specific references, and captioning in AVT as applied to case studies from *Modern Family*. A dedicated chapter to audio description, which allows the visually impaired or blind to assess a film's non-verbal content, using

examples from the 2017 film *the Big Sick*, outlines existing research to date on this under-explored line of research and opens avenues for future study within the audiovisual translation of humour. This book is key reading for students and scholars in translation studies and humour studies.

New Trends in Audiovisual Translation is an innovative and interdisciplinary collection of articles written by leading experts in the emerging field of audiovisual translation (AVT). In a highly accessible and engaging way, it introduces readers to some of the main linguistic and cultural challenges that

translators encounter when translating films and other audiovisual productions. The chapters in this volume examine translation practices and experiences in various countries, highlighting how AVT plays a crucial role in shaping debates about languages and cultures in a world increasingly dependent on audiovisual media. Through analysing materials which have been dubbed and subtitled like *Bridget Jones's Diary*, *Forrest Gump*, *The Simpsons* or *South Park*, the authors raise awareness of current issues in the study of AVT and offer new insights on this complex and vibrant area of the

Spanning the centuries, from the seventeenth to the twentieth, and ranging across cultures, from England to Mexico, this collection gathers together important statements on the function and feasibility of literary translation. The essays provide an overview of the historical evolution in thinking about translation and offer strong individual opinions by prominent contemporary theorists. Most of the twenty-one pieces appear in translation, some here in English for the first time and many difficult to find elsewhere. Selections include writings by Scheiermacher,

This volume outlines a new approach to the study of linguistic hybridity and its translation in cross-cultural writing. By building on concepts from narratology, cognitive poetics, stylistics, and film studies, it explores how linguistic hybridity contributes to the reader's construction of the textual agents' world-view and how it can be exploited

in order to encourage the reader to empathise with one world-view rather than another and, consequently, how translation shifts in linguistic hybridity can affect the world-view that the reader constructs. Linguistic hybridity is a hallmark of cross-cultural texts such as postcolonial, migrant and travel writing as source and target language come into contact not only during the process of writing these texts, but also often in the

(fictional or non-fictional) story-world. Hence, translation is frequently not only the medium, but also the object of representation. By focussing on the relation between medium and object of representation, the book complements existing research that so far has neglected this aspect. The book thus not only contributes to current scholarly debates – within and beyond the discipline of translation studies – concerned with cross-cultural writing

Comics are a pervasive art form and an intrinsic part of the cultural fabric of most countries. And yet, relatively little has been written on the translation of comics. *Comics in Translation* attempts to address this gap in the literature and to offer the first and most comprehensive account of various aspects of a diverse range of social practices subsumed under the label 'comics'. Focusing on the role played by translation in shaping graphic narratives that appear in various formats, different contributors examine various aspects of this popular phenomenon. Topics covered include the impact of globalization and localization processes on the ways in which translated comics are embedded in cultures; the import of editorial and publishing practices; textual strategies adopted in translating comics, including the translation of culture- and language-specific

features; and the interplay between visual and verbal messages. Comics in translation examines comics that originate in different cultures, belong to quite different genres, and are aimed at readers of different age groups and cultural backgrounds, from Disney comics to Art Spiegelman's *Maus*, from Katsuhiro Ōtomo's *Akira* to Goscinny and Uderzo's *Astérix*. The contributions are based on first-hand research and exemplify a wide range of approaches. Languages covered include English, Italian, Spanish, Arabic, French, German, Japanese and Inuit. The volume features illustrations from the works discussed and an extensive annotated bibliography. Contributors include: Raffaella Baccolini, Nadine Celotti, Adele D'Arcangelo, Catherine Delesse, Elena Di Giovanni, Heike Elisabeth Jüngst, Valerio Rota, Carmen Valero-Garcés, Federico Zanettin and Jehan Zitawi.

This volume seeks to investigate how humour translation has developed since the beginning of the 21st century, focusing in particular on new ways of communication. The authors, drawn from a range of countries, cultures and academic traditions, address and debate how today's globalised communication, media and new technologies are influencing and shaping the translation of humour. Examining both how humour translation exploits new means of communication and how the processes of humour translation may be challenged and enhanced by technologies, the chapters cover theoretical foundations and implications, and methodological practices and challenges. They include a description of current research or practice, and comments on possible future developments. The contributions interconnect around the issue of humour creation and translation in the 21st century, which can truly

A Centennial Commentary on Walter Benjamin's "The Task of the Translator"

Download Ebook Hasuria 1997

Toward a Science of Translating, first published in 1964, is still very much in demand today. Written by a linguist and anthropologist with forty years of experience in the field of language and religion, this work describes the major components of translating; setting the translating into the context of historical changes in principles and procedures over the last two centuries. With an emphasis on texts being understood within their cultural contexts, one of the reasons for its continuing relevance is the broad

number of illustrative examples taken from field experience of translators in America, Africa, Europe and Asia. Subtitling: Concepts and Practices provides students, researchers and practitioners with a research-based introduction to the theory and practice of subtitling. The book, inspired by the highly successful Audiovisual Translation: Subtitling by the same authors, is a new publication reflecting the developments in practice and research that mark subtitling today, while considering the way ahead. It

supplies the core concepts that will allow its users to acquaint themselves with the technical, linguistic and cultural features of this specific yet extremely diverse form of audiovisual translation and the many contexts in which it is deployed today. The book offers concrete subtitling strategies and contains a wealth of examples in numerous languages for dealing with specific translation problems. State-of-the art translation technologies and their impact on the profession are explored along with a

Envisioned as a much needed celebration of the massive strides made in translation and interpreting studies, this eclectic volume takes stock of the latest cutting-edge research that exemplifies how translation and interpreting might interact with such topics as power, ideological discourse, representation, hegemony and identity. In this exciting volume, we have articles from different language combinations (e.g. Arabic, English, Hungarian and Chinese) and from a wide range of sociopolitical, cultural, and institutional contexts and geographical locales (China, Iran, Malaysia, Russia and Nigeria). Those chapters also draw on a diverse range of theoretical perspectives and methodological approaches (e.g. critical discourse analysis, Bourdieu's

sociological theories, corpus linguistics, narrative theory and structuration theory), focusing on translation and interpreting relating to various settings and specialised genres (traditional media, digital media, subtitling, manga, etc.). As such, this volume serves as a dynamic forum for intercultural and interlingual communication and an exciting arena for interdisciplinary dialogues, thus enabling us to look beyond the traditionally more static, mechanical and linguistics-oriented views of translation and interpreting. This book appeals to scholars and students interested in translation and interpreting studies and issues of power, ideology, identity in interlingual and intercultural communication.

and Resistance in Chicano Poetry, pp 141-160 Tace Hedrick (Comparative Literature, Penn State Harrisburg, USA) This paper examines the nature of contemporary bilingual Chicano poetry from the 1970s to the present, particularly in terms of the poetic use of bilingual wordplay and the questions it raises about the uses and possibilities of translation. Using Walter Benjamin's essay 'The Task of the Translator' as a touchstone, and positing a metaphorical link between translation and transfer, the paper looks at bilingual wordplay as a kind of bridging-over or translation of one language into the other, crossing and breaking down borders and hierarchies between the two languages. To illustrate this, cultural practices and uses of bilingualism are examined from both a sociolinguistic and a

poetic point of view, with examples of how puns, (mis)pronunciations, slang, loanwords, and mixtures of Spanish and English are used in bilingual poetry for formal and polemical effect. Meaningful Literary Names: Their Forms and Functions, and their Translation, pp 161-178 Luca Manini (Montalto, Italy) Proper nouns, which have a special status within the language system as opposed to common nouns, can be used as characterizing devices in literary texts and so become a meaningful element in the texture of such works. Names can in this way be endowed with an extra semantic load that makes them border on wordplay. The presence of meaningful literary names is likely to cause problems when the text is to be translated, the question being not only whether

the transposition of such names in the target language is technically possible, but also to what extent this would be viewed as an appropriate procedure. This paper, which reflects research in progress, explores the issue by analyzing a two-part corpus of texts: The first part consists of twentieth-century Italian translations of English Restoration comedies and the second of Italian translations of Dickens's novels. There are occasional references to other English literary texts from the medieval and Renaissance periods as well. Technical problems of translating proper nouns are taken into consideration, along with other factors which may influence the translator's choices, such as genre, intended audience, cultural tradition and general norms of translation. The Pitfalls of Metalingual Use in

Download Ebook Hasuria 1997

Simultaneous Interpreting, pp 179-198 Sergio Viaggio (United Nations, Vienna, Austria) For the simultaneous interpreter, puns and other instances of metalingual use, involving as they do an interplay of form, content and pragmatic intention, may represent a formidable challenge. The interpreter's most efficient tool is his or her adroitness at determining the pun's or the metalingual comment's relevance on the basis of an instant analysis of the communication situation, with particular attention to the speaker's pragmatic intention and intended sense, as well as the audience's needs and expectations. Actual examples from United Nations meeting are used to illustrate the different factors affecting the rendition of wordplay and metalanguage and some suggestions are made towards

improving the training of interpreters. Caught in the Frame: A Target-Culture Viewpoint on Allusive Wordplay, pp 199-218 Ritva Leppihalme (University of Helsinki, Finland) Allusive wordplay - stretches of preformed linguistic material (or frames) that have undergone lexical, grammatical, or situational modification - is so culture-specific that it is not only hard for translators working from a foreign language to translate but easy for them to miss altogether. This paper discusses examples of allusive wordplay in English fiction and journalism and reports on an experiment designed to investigate the recognition of frames and carried out on twenty-one Finnish university students of English. Student translations of some of the examples are also discussed. It is argued that a

translator who wants to produce a coherent target text and to avoid 'culture bumps' (Archer 1986) must above all pay attention to the function of the wordplay in the relevant context. Passages that include modified frames will often need to be rewritten, as attempts to evoke source-culture frames are unlikely to work with target-culture readers to whom such frames are unfamiliar. Target-culture frames, on the other hand, may be puzzling in a text which is set in the source-culture context. 'Curiouser and Curiouser': Hebrew Translation of Wordplay in 'Alice's Adventures in Wonderland', pp 219-234 Rachel Weissbrod (The Open University of Israel) In 'Alice's Adventures in Wonderland', wordplay has a central role in producing an ambivalent text, that is, one which can

function at one and the same time in children's literature and in adult literature. This paper examines, from a norm-oriented approach, how instances of wordplay were treated in three Hebrew translations. The first translation, published in 1923, was subject to a norm which required acceptability at the socio-cultural level. Instances of wordplay were accordingly replaced by completely new ones that were rooted in Jewish tradition. In the second translation, published in 1951, the treatment of wordplay was determined by a different norm, one which required a rephrasing of Carroll's work in an elevated style. Only in the third translation, published in 1987, was the translator sufficiently free from socio-cultural and stylistic dictates to cope with Carroll's wordplay with all the

means available. In this last translation, elements which are foreign to Carroll's world or style are introduced only insofar as they helped the translator replace the original wordplay. Translating Jokes for Dubbed Television Situation Comedies, pp 235-257 Patrick Zabalbeascoa (Universitat Pompeu Fabra, Barcelona, Spain) This paper examines Catalan and Spanish dubbed versions of English TV comedy series such as 'Yes, Minister', with special attention to wordplay as a particular instance of the more general problem of translating comedy for television. The objective is to show that producing foreign-language dubbed versions of audiovisual texts has enough in common with other types of translating assignments to be included within translation studies, as well as to contribute to

Download Ebook Hasuria 1997

the area of quality assessment and evaluation of translations by proposing that the criteria for judging a translation should be clear, flexible and realistic, and should take into account the translator's limitations and working environment. The paper also proposes a classification of jokes, with further examples from translations of British situation comedy into Catalan, and presents the concept of 'stylebook' as a helpful bridge between general statements about translation and specific contextualized translating assignments. Dante's Puns in English and the Question of Compensation, pp 259-276 Edoardo Crisafulli (University College, Dublin, Ireland) After a comparative analysis of the source and target texts, this paper attempts to put forward an explanation to account for H. F.

Download Ebook Hasuria 1997

Cary's avoidance policy as he deals with Dante's puns in his early nineteenth-century translation of the 'Divina Commedia'. The aim is to consider the findings of the analysis in relation to the issue of compensation. No discussion of translation can avoid dealing with this issue, but there is evidence that compensation cannot be called upon to account for all the foregrounding devices in the target text. In particular, the relationship between compensation and the translator's ideology must be taken into account. The paper concludes by suggesting some conditions which might make it easier to identify instances of compensation. Harvey's (1995) descriptive framework is employed with a view to improving its explanatory power. No-Man's Land on the Common

Borders of Linguistics, Philosophy & Sinology: Polysemy in the Translation of Ancient Chinese Texts, pp 277-304 Seán Golden (Universitat Autònoma de Barcelona, Spain) This paper treats polysemy as the driving force of ancient Chinese rhetoric, inherent in the language and its system of writing, not just as an embellishment but as the very basis of discourse, and intrinsic to the multiple meanings expressed by the text; in this way, text may represent a worldview that is radically different from the Western one and that is encoded syntactically, semantically, rhetorically, and visually (in the case of the Chinese written character) in the language. This challenges the comprehension of ancient Chinese texts by translators and their reproduction in languages that share neither the

worldview nor the multiple codes involved. From the no-man's land on the common borders of linguistics, philosophy and sinology, the translator may glimpse the horizon of understanding within which the original operates, while knowing that the readership of a translation is looking at a different horizon. Better understanding of this fact by the translator should contribute to a better interpretation of the multiple meanings contained in the original and to a translation that maintains as many meanings as possible.

place as part of the wider Islamic world, especially through its connections to the Arab world, and demonstrates the strength of these connections. The volume is divided into three parts written primarily by scholars from Malaysia and Indonesia. Beginning with a historical overview, it then moves into chapters with a more specifically regional focus to conclude with a thematic approach by looking at topics of some controversy in the broader world. Presenting new examinations of an under-researched topic, this book will be of interest to students and scholars of Islamic studies and Southeast Asian studies.

Topics of current interest such as media interpreting, news translation, advertising, subtitling and the ethics of translation have a prominent position, as does the Workshop 'Contact as Conflict' which discusses the phenomenon of the hybrid text as a result of the translation process. demonstrates clearly the richness and breadth of the topics dealt with in Translation Studies today along with its complex interaction with neighbouring disciplines. This is a book-length commentary on Walter Benjamin's 1923 essay "Die Aufgabe des Übersetzers," best known in English under the title "The Task of the Translator." Benjamin's essay is at once an immensely attractive work for top-flight theorists of translation and comparative literature and a frustratingly cryptic work that cries out for commentary. Almost every one of the claims he makes in it seems wildly counterintuitive, because he articulates none of the background support that would help readers place it in larger literary-historical contexts: Jewish

mystical traditions from Philo Judaeus's Logos-based Neoplatonism to thirteenth-century Lurianic Kabbalah; Romantic and post-Romantic esotericisms from Novalis and the Schlegels to Hölderlin and Goethe; modernist avant-garde foreclosures on "the public" and generally the communicative contexts of literature. The book is divided into 78 passages, from one to a few sentences in length. Each of the passages becomes its own commentarial unit, consisting of a Benjaminian interlinear box, a paraphrase, a commentary, and a list of other commentators who have engaged the specific passage in question. Because the passages cover the entire text of the essay in sequence, reading straight through the book

Bibliographie linguistique/ Linguistic Bibliography is the annual bibliography of linguistics published by the Permanent International Committee of Linguists under the auspices of the International Council of Philosophy and Humanistic Studies of UNESCO. With a tradition of more than forty-five years (the first two volumes, covering the years 1939-1947, were published in 1949-1950), Bibliographie linguistique is by far the most comprehensive

bibliography in the field. It covers all branches of linguistics and related disciplines, both theoretical and descriptive, from all geographical areas, including less known and extinct languages, with particular attention to the many endangered languages of the world. Up-to-date information is guaranteed by the collaboration of some fifty contributing specialists from all over the world. With over 23,000 titles arranged according to a detailed state-of-the-art classification, Bibliographie linguistique remains the standard reference book for every student of language and linguistics.

This work focuses on translators and readers as participants

Reader-response tests and interviews with professional translators highlight the difficulty in conveying the function and meaning of allusive passages to readers in another culture. The many examples discussed also provide materials for translation teachers wanting to address the translation of allusions in their courses.

For the discourse of localization, translation is often "just a language problem". For translation theorists,

localization introduces fancy words but nothing

essentially new. Both views are probably right, but only

to an extent. This book sets up a dialogue across those

differences. Is there anything that translation theory can

gain from localization? Can localization theory learn

anything from the history and complexity of translation?

To address those questions, both terms are placed within a more general frame, that of text transfer. Texts are distributed in time and space; localization and translation respond differently to those movements; their relative virtues are thus brought out on common ground. Anthony Pym here reviews not only key problems in translation theory, but also critical concepts such as cultural resistance, variable transaction costs, segmentation of the labour market, and the dehumanization of technical discourse. The book closes with a plea for the humanizing virtues of translation, over and above the efficiencies of localization.
