In consideration of UN Resolution 1325 (which called for women's equal participation in promoting peace and security and for greater efforts to protect women exposed to violence during and after conflict), this volume takes stock of the current state of knowledge on women, peace and security issues, including efforts to increase women's participation in post-conflict reconstruction strategies and their protection from wartime sexual violence.

This startling and original study emerged from Kenneth Rockford's wish to vindicate Aristophanes' *Clouds* against detractors. As a result of years of rereading and teaching Aristophanes, he realized that the *Clouds* could not be defended in an analysis of that play in isolation. A better approach, he decided, would be to define a comic perspective within which Aristophanes' comedies in general as well as the *Clouds* in particular could be appreciated. This first volume of Reckford's defense examines the comedies as a whole in a series of defining essays, each with its own dominant concern and method of approach. The author begins by exploring not the usual questions of Aristophanes' political attitudes and his place in the development of comedy, but rather the festive, celebratory, and Dionysian nature of Old Comedy. Here and throughout the book Reckford illustrates Aristophanes' form of comedy with analogies to Rabelais, Shakespeare, Charlie Chaplin, Alice in Wonderland, and *The Wonderful Wizard of Oz*. In the remaining essays Reckford goes beyond the usual Freudian

approaches, reinterpreting the comic catharsis as a clarification of wishing and hoping. He also explores the growth of plays from comic idea to comic performance, in ways reflected in Tom Stoppard's plays today. Only then are Aristophanes' basic political loyalties described, as well as the place of his old- and-new comedy within the history of the genre. In a book that is as much about comedy generally as it is about Aristophanes specifically, some plays are treated more fully than others. Reckford discusses the *Wasps* at length, comparing the symbolic transformations and comic recognitions in the play with dream experience and dream interpretation. He also analyzes the *Peace*, the *Acharians*, the *Birds*, and the *Frogs*. Reckford's vindication of the *Clouds* will appear in the second volume of his defense, *Clouds of Glory*. Reckford's playful translations preserve the puns and anachronisms of Aristophanes, maintaining the playwright's comic feeling and tone. Combining traditional classical scholarship with a variety of literary, psychological, and anthropological approaches, he has written a study that will appeal to both the academic audience and the general reader who cares about comedy. This is the first volume dedicated to Aristophanes' comedy *Peace* that analyses the play for a student audience and assumes no knowledge of Greek. It launches a much-needed new series of books each discussing a comedy that survives from the ancient world. Six chapters highlight the play's context, themes, staging and legacy including its response to contemporary wartime politics and the possible staging options for flying. It is ideal for students, but helpful also for scholars wanting a quick introduction to the play. *Peace* was first performed in 421 BC, perhaps only days before the signing of a peace treaty that ended ten years of fighting between Athens and Sparta (the Archidamian War). Aristophanes celebrates this prospect with an imaginative fantasy involving his hero's flight on a gigantic dung-beetle to Olympus, the rescue of the goddess *Peace* from her imprisonment in a cave, and her return to a Greece weary of ten years of war. Like most of the poet's comedies, this play is heavy on fantasy and imagination, light on formal structure, being an exuberant farce that champions the opponents of War and celebrates the delights of the return to country life with its smells, food and drink, its many pleasures and none of the complications that war brings in its wake.

Volume I: Six Essays in Perspective

The Knights of Aristophanes

The Athenian Expounders of the Sacred and Ancestral Law

The purpose of this book is to examine the variety, the mechanisms, and the poetological intention of the effect of surprise in Aristophanic comedy, addressing the phenomenon not as a self-evident or unselfconscious element of comedy as a genre, but as an elaborate system which characterises the style of the specific dramatist. More precisely, the book analyses Aristophanes' most prominent verbal, thematic, and theatrical modes of surprise from a typological perspective, and interprets them as comprising the key area in which the playwright claims and demonstrates his artistic superiority over rival genres and individual poets. In line with this purpose, two parallel aims of the book are to provide an original commentary on the passages under examination, and to promote the study of modern performances - a practice which has so far been either restricted to Classical Reception or only theoretically acknowledged (if at all) by mainstream philological scholarship. This

is a timely book on a topic of wide current interest across a range of interlocking disciplines: emotion studies, semiotics, narratology, information theory, and -most pertinently for this book- humour research.

This is the first digital version of Cases of Circumstantial Evidence, a collection of three historical novels by noted American writer Janet Lewis. For the first time, these works have been brought together in a single edition, each with a new introduction by Kevin Haworth: The Wife of Martin Guerre Based on a notorious trial in sixteenth-century France, The Wife of Martin Guerre follows Bertrande de Rois and her lost-and-returned husband through a tale of impersonation, conspiracy, and small-town intrigue. Their fascinating story has also inspired a bestselling historical study and two films, including The Return of Martin Guerre. The Trial of Sören Qvist Although set in seventeenth-century Denmark, The Trial of Sören Qvist has a contemporary feel and has been praised for its intriguing plot and for Lewis's powerful writing. In this second novel in the Cases of Circumstantial Evidence, Lewis recounts the story of a murder, an investigation, and a pious town pastor who confesses to

the crime, driven perhaps more by a recognition of his own moral flaws than by guilt for the acts of which he stood accused. The Ghost of Monsieur Scarron The court of Louis XIV and a modest Paris street provide the incongruous settings for this tale of a humble bookbinder, his wife, and the young craftsman who seduces her and blackmails her husband into covering up a terrible crime. This third and last case of circumstantial evidence bristles with character, the smell of blood, and considerable suspense against a backdrop of national political unrest in the cruel and dingy Paris of the seventeenth century.

The Eddic poem Vafþrúðnismál serves as a representation of early pagan beliefs or myths and as a myth itself; the poem performs both of these functions, acting as a poetic framework and functioning as sacred myth. In this study, the author looks closely at the journey of the Norse god Óðinn to the hall of the ancient and wise giant Vafþrúðnir, where Óðinn craftily engages his adversary in a life-or-death contest in knowledge.

It is widely acknowledged that insurance has a major impact on the operation of tort and contract law regimes in practice, yet there is little sustained analysis of their interaction. The majority of academic private lawyers have little knowledge of insurance law in its own right, and the amount of discussion directed to insurance in private law theory is disproportionately small in relation to its practical importance. Filling this substantial gap in the literature, this book explores the multiple influences of insurance in the law of obligations, and the nature and impact of insurance law as an inherent and significant aspect of private law. It combines conceptual and doctrinal analysis, informing the theoretical discussion of the nature of private law, including the role of judicial and public

purpose, and the place of formalism and of contextualism in normative theories of private law. Arguing for the wider recognition of the multiple impacts of insurance, the book claims that recognition of the presence of insurance necessarily marks a departure from the two-party framework sometimes described as definitive of private law. The structured exploration and interpretation of the contemporary role of insurance in the law of obligations, and of its implications, illuminates this under-explored area of private law, and equips the reader for further enquiry and debate.

Presenting original, detailed studies of keywords of Danish, this book breaks new ground for the study of language and cultural values. Based on evidence from the semantic categories of everyday language, such as the Danish concept of *hygge* (roughly meaning, 'pleasant togetherness'), the book provides an integrative socio-cognitive framework for studying and understanding language-particular universes. It is argued that the worlds we live in are not linguistically and conceptually neutral, but rather that speakers who live by Danish concepts are likely to pay attention to their world in ways suggested by central Danish keywords and lexical grids. By means of a sophisticated semantic methodology, the author accounts for the meanings of even highly culture-specific and untranslatable linguistic concepts. The book offers new tools for comparative research into the

diversity of semantic and cultural systems in contemporary Europe. Additionally, it contributes to the emerging discipline of cultural semantics, and to the ongoing debates of linguistic diversity, metalanguage, and the use of linguistic evidence in studies of culture and social cognition.

Older Women: Current and Future Challenges of Professionals With An Aging Population is about older women and the unique challenges they face now and in coming decades. Elderly women face problems that require response from multiple service providers in the social welfare, health care and legal sectors. Due to the complexity of the various issues and the multi-systemic responses required to address these problems among diverse groups, an interdisciplinary perspective in a multicultural context needs to be examined. This book is an attempt to explain the multidisciplinary facets of social work with elderly women. Readers are also introduced to the ethical issues and challenges caused by economic disparities and are also provided with guidelines on potential responses and intervention strategies to such difficulties. Readers are also introduced to the concept of cultural competence in terms of working with aged women. The integration of theory, research and practice in this book makes it a valuable resource for academicians and working professionals who are or will be in frequent contact

with older adults.

This open access book looks at how a democracy can devolve into a post-factual state. The media is being flooded by populist narratives, fake news, conspiracy theories and many things we don't believe. Misinformation is turning into a challenge for all of us, whether politicians, journalists, or citizens. In the age of information, attention is a prime asset and may be converted into money, power, and influence – sometimes at the cost of facts. The point is to obtain exposure on the air and in print media, and to generate traffic on social media platforms. With information in abundance and attention scarce, the competition is ever fiercer with truth all too often becoming the first victim. *Reality Lost: Markets of Attention, Misinformation and Manipulation* is an analysis by philosophers Vincent F. Hendricks and Mads Vestergaard of the nuts and bolts of the information market, the attention economy and media eco-system which may pave way to postfactual democracy. Here misleading narratives become the basis for political opinion formation, debate, and legislation. To curb this development and the threat it poses to democratic deliberation, political self-determination and freedom, it is necessary that we first grasp the mechanisms and structural conditions that cause it.

????????????????? ??????. *The Peace of Aristophanes ... The Greek text revised; with a translation into corresponding metres, and original notes.* By Benjamin Bickley Rogers

This is the colorful story of the life and times of an early Baby Boom generation member. In the US anyway, “Boomers” tended to be individualistic, experimental and social cause-oriented. They epitomized the cultural change of the 1960’s.

Memorable events of this time included the Cold War, “Red Scare”, Cuban Missile Crisis, assassinations of JFK, RFK and MLK, Jr., political unrest, first moon walk, risk of the draft or military service in Vietnam, anti-war protests, women s liberation, “free love,” the Civil Rights and Environmental Movements, drug experimentation, protests and riots, and Woodstock. The author was a “free spirit” and stand-out member of a very large generation. It was an exciting time - and a time to stand up and make a difference!
