***A possible life-saving
reference to keep around
the house or in the car,
DK's First Aid Manual looks
at more than 100 different
conditions, from splinters
and sprained ankles to
strokes and
unconsciousness, and
shows exactly what to do
with step-by-step
photographic sequences.
Every condition is clearly
explained, outlining causes,***

symptoms, and signs, and action plans. The updated design makes the instructions easier to follow, whether you need information on emergency first aid, first aid for babies and children, or tips on resuscitation. This ACEP First Aid Manual is an invaluable resource to keep you and your loved ones safe and healthy.

Family & Friends CPR 20-2872

A workbook for students taking the American Heart Association's Heartsaver First Aid CPR AED course. Covers first aid basics, CPR for adults and how to use an AED. Product 90-1073

The Pediatric First Aid, CPR & AED manual is 153 pages and full-color. It covers the material included in a 6 to 7.5-hour course. This book is for anyone who takes care of children, including parents, daycare and other childcare workers, teachers and others. The focus is on preventing childhood injury where possible, how to recognize and act in a pediatric emergency and sustain life until professional help

can arrive. Along with basic first aid components such as bleeding control and shock, the book covers child abuse and common childhood illnesses.

This New American Red Cross CPR/AED for the Professional Rescuer

Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The

integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.
