Transfusion

Medicine,

Apheresis, and

Hemostasis. These

questions often

represent both rare

and common

clinical scenarios

that the authors

have seen during their clinical practice. Each question is then followed by 5 possible answers, with only one being correct (or the best answer). After the question, there is a conceptual explanation

followed by a more factual explanation of the right and wrong answers. We gave the individual authors the freedom to choose how they explained the wrong answer choices. Some authors chose to be more direct (e.g. Answer A is
