

Herbal Cosmetics Ppt

Over 400 years ago, Swiss alchemist and physician Paracelsus (1493-1541) cited: "All substances are poisons; there is none that is not a poison. The right dose differentiates a poison from a remedy." This is often condensed to: "The dose makes the poison." So, why are we overtly anxious about intoxications? In fact, poisons became a global problem with the industrial revolution. Pesticides, asbestos, occupational chemicals, air pollution, and heavy metal toxicity maintain high priority worldwide, especially in developing countries. Children between 0 and 5 years old are the most vulnerable to both acute and chronic poisonings, while older adults suffer from the chronic effects of chemicals. This book aims to raise awareness about the challenges of poisons, to help clinicians understand current issues in toxicology.

Combining the latest developments and research discoveries, board-certified gastroenterologist and medical host on CNN and Fox News, Dr. Roshini Raj shows the ways in which the microbiome impacts overall well-being, and helps readers reset their biological clocks by improving their gut health. With one in four Americans suffering from digestive health issues every day, gut health has become an increasingly important part of wellness. With the human body, so many issues can be improved upon, or cured, by balancing the microbiome. But the microbiome—a community of bacteria, viruses, and yeasts that dwell in the body—has long been something that the average person can find baffling—and maybe a little bit gross. By offering simple and straightforward answers to questions like what one should be eating, what probiotics are, which vitamins and medicines really work, Dr. Raj demystifies the gut. She uses the idea of a home renovation to show how different organs and parts of the body can be “renovated” in order to optimize the microbiome. After all, balancing one’s microbiome improves digestive health, brain function, emotional stability, the body’s response to inflammation, immunity, and lessens premature aging. Melding the latest developments and discoveries in microbiome research, along with Dr. Raj’s practical tips developed from her years of clinical experience, Gut Renovation shows readers how to turn back the biological clock and revamp the way they live forever.

Cosmetics have been in utilization for more than thousands years. More commonly known as make-up, it includes a host of skin products like foundation, lip colors etc. The international market for skincare and color cosmetics surpassed a sale of 53 billion dollars in 2002. The quantity and number of latest products brought to market both nationally and internationally continues to develop at a fast pace. Cosmetic chemists all the time are looking for attractive and striking material that enhances skin's appearance and healthiness. A huge collection of compounds is required to supply these products. The newest edition of the Cosmetics Toiletries and Fragrance Association (CTFA) Dictionary displays more than 10,000 raw materials and the list continues to increase with every year hundreds of new ingredients being added. The cosmetic chemistry has encompasses a vast area of study and one such is Herbal Cosmetics. Herbal cosmetics are the product of cosmetic chemistry, a science that combines the skills of specialists in chemistry, physics, biology, medicine and herbs. Since cosmetics are applied mostly to the skin, hair and nails, a brief description of the anatomy of these is desirable. Herbal cosmetic major users are girls and women who are very much peculiar about their skin type and requirement. Synthetic cosmetic being harsh and prone to more side-effects, herbal cosmetic is quickly replacing it and gaining a lot of popularity. As a result it has created an enormous market for itself both domestic as well as export market. Herbal Cosmetics Handbook has been featured as best seller. The book contains formulae, manufacturing processes of different herbal cosmetics like cosmetics for skin, nails, hair etc. It also covers analysis method of cosmetics, toxicity and test method. Some of the chapters of the book are: Classification of cosmetics Economic aspects, Cosmetic Emulsions, Cosmetics for the skin, Cosmetic Creams, Lubricating or Emollient Creams-Night Creams, Skin Protective and Hand Creams, Vanishing Creams-Foundation Creams, Liquid Creams, Cosmetic Lotions, Hand Lotions, Skin Toning Lotions-Skin Fresheners, Astringent Lotions, Hair Tonics and many more. The book will render useful purpose for new entrepreneurs, technologists, professionals, researchers and for those who want to extend their knowledge in the said field.

Aquaponics is the integration of aquaculture and soilless culture in a closed production system. This manual details aquaponics for small-scale production--predominantly for home use. It is divided into nine chapters and seven annexes, with each chapter dedicated to an individual module of aquaponics. The target audience for this manual is agriculture extension agents, regional fisheries officers, non-governmental organizations, community organizers, government ministers, companies and singles worldwide. The intention is to bring a general understanding of aquaponics to people who previously may have only known about one aspect.

Herbal Cosmetics Handbook (3rd Revised Edition)

Aromatic and Medicinal Plants

Dietary Supplements

Selected Pollutants

Textbook of Cosmetics

Today, young cosmetics researchers who have completed their graduate studies and have entered a cosmetics company are put through several years of training before they become qualified to design cosmetics formulations themselves. They are trained so that they can design formulas not by a process of logic but by heart, like craftsmen, chefs, or carpenters. This kind of training seems a terrible waste of labor and time. To address this issue and allow young scientists to design novel cosmetics formulations, effectively bringing greater diversity of innovation to the industry, this book provides a key set of skills and the knowledge necessary for such pursuits. The volume provides the comprehensive knowledge and instruction necessary for researchers to design and create cosmetics products. The book’s chapters cover a comprehensive list of topics, which include, among others, the basics of cosmetics, such as the raw materials of cosmetics and their application; practical techniques and technologies for designing and manufacturing cosmetics, as well as theoretical knowledge; emulsification; sensory evaluations of cosmetic ingredients; and how to create products such as soap-based cleansers, shampoos, conditioners, creams, and others. The potential for innovation is great in Japan’s cosmetics industry. This book expresses the hope that the high level of dedicated research continues and proliferates, especially among those who are innovators at heart.

Human hair is the subject of a wide range of scientific investigations. Its chemical and physical properties are of importance to the cosmetics industry, forensic scientists, and to biomedical researchers. This updated and enlarged fourth edition continues the tradition of its predecessor as being the definitive monograph on the subject. It now contains new information on various topics including: chemical hair damage, the cause of dandruff, skin and eye irritation, hair straightening, and others. Chemical and Physical Behavior of Human Hair is a teaching guide and reference volume for cosmetic chemists and other scientists in the hair products industry, academic researchers studying hair and hair growth, textile scientists, and forensic specialists.

Grey's Anatomy meets One L in this psychiatrist's funny and moving memoir about his residency at Harvard Medical School.

Safety is a fundamental principle in the provision of herbal medicines and herbal products for health care and a critical component of quality control. These guidelines provide practical technical guidance for monitoring the safety of herbal medicines with pharmacovigilance systems.

The Yoga Journey to Wholeness, Inner Peace, and Ultimate Freedom

Surfactants in Cosmetics, Second Edition,

With a Treatise on Planta Cosmetica

This Book Has Gleaned Various Cosmetic Formulations Contained In A Wide Body Of Literature On Subjects As Diverse As Dharma (Religion), The Art Of Love And Health Sciences. Condition Good.

This new edition has been fully revised to bring pharmacologists and trainees fully up to date with the latest developments in the field of medical pharmacology. Beginning with an introduction to general pharmacological principles, the following sections discuss drugs for common and less common disorders found in different regions of the body. The seventh edition includes new drugs, as well as the latest therapeutic guidelines from authoritative sources such as the World Health Organisation (WHO) and the British National Formulary (BNF). Each topic includes key point summary boxes as well as illustrations, flowcharts and tables to enhance learning. A 'problem-directed study' question at the end of each chapter helps trainees test their knowledge. An extensive appendices section includes a list of essential medicines, drugs that should/shouldn't be prescribed in pregnancy and lactation, and suggestions for further reading. Key points Fully revised, new edition presenting latest developments in medical pharmacology Includes therapeutic guidelines from WHO and BNF Problem-directed study questions and key point summary boxes enhance learning Previous edition published in 2008

""Second Edition provides a thorough, up-to-date treatment of the fundamental behavior of surface active agents in solutions, their interaction with biological structures from proteins and membranes to the stratum corneum and epidermis, and their performance in formulations such as shampoos, dentifrice, aerosols, and skin cleansers.

This book covers interesting research topics and the use of natural resources for medical treatments in some severe diseases. The most important message is to have native foods which contain high amount of active compounds that can be used as a medicinal plant. Most pharmaceutical drugs were discovered from plants, and still ongoing research will have to predict such new active compounds as anti-diseases. I do believe this book will add significant knowledge to medical societies as well as can be used for postgraduate students.

Poisoning in the Modern World

Handbook of Cosmetic Science and Technology, Third Edition

Committed

Terpenes and Terpenoids

Technology of Skin- and Hair-Care Products in Japan

Principles and Practice

This handbook features contributions from a team of expert authors representing the many disciplines within science, engineering, and technology that are involved in pharmaceutical manufacturing. They provide the information and tools you need to design, implement, operate, and troubleshoot a pharmaceutical manufacturing system. The editor, with more than thirty years' experience working with pharmaceutical and biotechnology companies, carefully reviewed all the chapters to ensure that each one is thorough, accurate, and clear.

Cosmetic Science and Technology: Theoretical Principles and Applications covers the fundamental aspects of cosmetic science that are necessary to understand material development, formulation, and the dermatological effects that result from the use of these products. The book fulfills this role by offering a comprehensive view of cosmetic science and technology, including environmental and dermatological concerns. As the cosmetics field quickly applies cutting-edge research to high value commercial products that have a large impact in our lives and on the world's economy, this book is an indispensable source of information that is ideal for experienced researchers and scientists, as well as non-scientists who want to learn more about this topic on an introductory level. Covers the science, preparation, function, and interaction of cosmetic products with skin Addresses safety and environmental concerns related to cosmetics and their use Provides a graphical summary with short introductory explanation for each topic Relates product type performance to its main components Describes manufacturing methods of oral care cosmetics and body cosmetics in a systematic manner

Cosmetics are the most widely applied products to the skin and include creams, lotions, gels and sprays. Their formulation, design and manufacturing ranges from large cosmetic houses to small private companies. This book covers the current science in the formulations of cosmetics applied to the skin. It includes basic formulation, skin science, advanced formulation, and cosmetic product development, including both descriptive and mechanistic content with an emphasis on practical aspects. Key Features: Covers cosmetic products/formulation from theory to practice Includes case studies to illustrate real-life formulation development and problem solving Offers a practical, user-friendly approach, relying on the work of recognized experts in the field Provides insights into the future directions in cosmetic product development Presents basic formulation, skin science, advanced formulation and cosmetic product development

Herbal cosmetics have been into usage from time immemorial so has been the use of Ayurvedic medicines. Ayurveda which means the complete knowledge for long life has been very popular these days on account of its minimum or zero side effects with considerable power of curing. Similarly herbal cosmetics have been of great value because of the least harm they cause to the skin and the radiance they add to the skin. These days a number of beauty products that are using the herbal formulae and Ayurveda concepts have got lot of attention and have been witnessing a huge rise in demand not only nationally but on international arena. The charm of understanding herbal product is even you can use it by making certain combination at your home and get the benefits. These are economical and sure to provide alleviate the problems not only for skin but for long term health issues also. Herbal products combine the skills of specialists in chemistry, physics, biology, medicine and herbs. These are less likely to cause any damaging effect to health. Bath and beauty products use herbs for both their scents and therapeutic qualities. Herbal products are replacing the synthetics products because of its harsh nature. Herbal products are in huge demand in the developed world for health care for the reason that they are efficient, safe and have lesser side effects. The formulations based on herbs are safe and effective. To

exploit the knowledge that has got the genesis in our country the book aims to provide you a comprehensive information on different types of herbal Cosmetics formulas. The contents of the book are: Analysis of Creams, Infra-Red Spectrophotometer In Cosmetic Analysis, Infra Red Spectrophotometer In Cosmetic Analysis, Analysis of Creams, Analysis of Shampoos, Lal Tooth Powder, Bath and Massage Oil, Sun Care/Skin Lightening Compound, Herbal Liver Tonic, Vicks Like Compound, hair oil, Eye Drops, Packaging Criteria for Cosmetics and Toiletries, Vicks Like Compound, Cosmetics for Elderly People, Cough Syrup, Colour in Cosmetics, Herbal Liver Tonic, Herbal Formulation, Medicinal Herbs as Cosmetics, Medicinal & Massage Oils, Herbal Cosmetic Cream for Dry Skin, Herbal Deodorant Roll On, Drug Standardization, Guide Lines on GMP, Premises and Equipment Requirements, Aloe Gel, Tablets and Capsule, Sandalwood Oil and Machinery Section. The Third Revised Edition of Herbal cosmetics and Ayurvedic medicines (EOU) also includes photographs of machinery and equipments with addresses of their manufacturers. The book in general will be beneficial for entrepreneurs, industrialists, project consultants, libraries and in general all those looking for detail information.

Building a Sustainable Business

Terpenes belong to the diverse class of chemical constituents isolated from materials found in nature (plants, fungi, insects, marine organisms, plant pathogens, animals and endophytes). These metabolites have simple to complex structures derived from Isopentyl diphosphate (IPP), dimethyl allyl diphosphate (DMAPP), mevalonate and deoxyxylulose biosynthetic pathways. Terpenes play a very important role in human health and have significant biological activities (anticancer, antimicrobial, anti-inflammatory, antioxidant, antiallergic, skin permeation enhancer, anti-diabetic, immunomodulatory, anti-insecticidal). This book gives an overview and highlights recent research in the phytochemical and biological understanding of terpenes and terpenoid and explains the most essential functions of these kinds of secondary metabolites isolated from natural sources.

Edited by a team of experienced and internationally renowned contributors, the updated Third Edition is the standard reference for cosmetic chemists and dermatologists seeking the latest innovations and technology for the formulation, design, testing, use, and production of cosmetic products for skin, hair, and nails. New features in the Third Edition: 39 new chapters reorganized by skin functions descriptions of ingredients, products, efficacy measurement, and mechanisms in each chapter revised chapters on skin types, skin perception, and targeted products new chapters on skin aging and cosmetics for the elderly strong emphasis on testing and current methods used for testing, and the evolution of instruments for skin and hair testing new ingredients, delivery systems, and testing methodologies information on skin physiology and cosmetic product design interactions affecting and attributed to cosmetic products cosmetic ingredients, vehicles, and finished products difference between pure cosmetics for enhancement and cosmetics used to treat high quality standards in cosmetic products that improve appearance, protect their targets, and maintain natural functions

Essential oils were used globally as a folk medicine for the treatment of a number of diseases because of the high content of natural compounds. Therefore, this book looks at research topics dealing with isolation, purification, and identification of active ingredients of essential oils from plants. This knowledge will provide significant information about essential oils to researchers and others interested in the field.

Living in and from the forests of Central Africa is intended first and foremost as a full-scale extension tool concerning NWFPs in Central Africa. It is a work on the groups who have always lived in these forests, forests that contribute to every aspect of their daily lives, both material and spiritual, and enable them to survive even in periods of extreme crisis.

Light on Life

Analysis of Cosmetic Products Elsevier

Papers presented at the National Seminar on Conservation and Utilization of Medicinal and Aromatic Plants, held at Bhubaneswar during 4-6 December 2001; in Indian context.

Cosmetic science covers the fields from natural sciences to human and social sciences, and is an important interdisciplinary element in various scientific disciplines. New Cosmetic Science is a completely updated comprehensive review of its 35 year old counterpart Cosmetic Science. New Cosmetic Science has been written to give as many people as possible a better understanding of the subject, from scientists and technologists specializing in cosmetic research and manufacturing, to students of cosmetic science, and people with a wide range of interests concerning cosmetics. The relationship between the various disciplines comprising cosmetic science, and cosmetics, is described in Part I. In addition to discussing the safety of cosmetics, the "Usefulness of Cosmetics", rapidly becoming an important theme, is described using research examples. The latest findings on cosmetic stability are presented, as are databases, books and magazines, increasingly used by cosmetic scientists. Part II deals with cosmetics from a usage viewpoint, including skin care cosmetics, makeup cosmetics, hair care cosmetics, fragrances, body cosmetics, and oral care cosmetics. Oral care cosmetics and body cosmetics are presented with product performance, types, main components, prescriptions and manufacturing methods described for each item. This excellent volume enlightens the reader not only on current cosmetics and usage, but indicates future progress enlarging the beneficial effects of cosmetics. Products with better pharmaceutical properties (cosmeceuticals), working both physically and psychologically, are also highlighted. Current evidence shows that medications are underused in the treatment of alcohol use disorder, including alcohol abuse and dependence. * * Within this document "alcohol abuse" and "alcohol dependence" are used when discussing medication indications or research that is based upon this terminology. For a summary of important differences between DSM-IV and DSM-5, please see the box on this page. This is of concern because of the high prevalence of alcohol problems in the general population.1,2 For example, data show that an estimated 10 percent to 20 percent of patients seen in primary care or hospital settings have a diagnosable alcohol use disorder.3,4 People who engage in risky drinking often have physical and social problems related to their alcohol use. Problems with alcohol influence the incidence, course, and treatment of many other medical and psychiatric conditions.

An Advertising Guide for Industry

Oils of Nature

Edible Insects

Handbook of Pharmaceutical Excipients

Cosmetic Formulation of Skin Care Products

Formulas, Ingredients and Production of Cosmetics

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

More than 1,800 cosmetics and toiletry formulations are detailed in Volume 1 of the Second Edition of this well-received and useful book. It is based on information obtained from industrial suppliers. If you would like to purchase the ent

B.K.S. Iyengar--hailed as "the Michelangelo of yoga" (BBC) and considered by many to be one of the most important yoga masters--has spent much of his life introducing the modern world to the ancient practice of yoga. Yoga's popularity is soaring, but its widespread acceptance as an exercise for physical fitness and the recognition of its health benefits have not been matched by an understanding of the emotional, intellectual, and spiritual development that the yogic tradition can also offer. In *Light on Life*, B.K.S. Iyengar brings readers this new and more complete understanding of the yogic journey. Here Iyengar explores the yogic goal to integrate the different parts of the self (body, emotions, mind, and soul), the role that the yoga postures and breathing techniques play in our search for wholeness, the external and internal obstacles that keep us from progressing along the path, and how yoga can transform our lives and help us to live in harmony with the world around us. For the first time, Iyengar uses stories from his own life, humor, and examples from modern culture to illustrate the profound gifts that yoga offers. Written with the depth of this sage's great wisdom, *Light on Life* is the culmination of a master's spiritual genius, a treasured companion to his seminal *Light on Yoga*.

Specifically written to meet the needs of the cosmetic chemist and engineer, this reference outlines the latest technologies and issues pertinent to the development novel skin care products including advances in formulation and development, raw materials and active ingredients, compound testing, and clinical assessment. Organized by product category, then by body application area, this guide supplies all one needs to know to create effective skin care products for men and women in a diverse range of ethnic populations.

Pharmaceutical Manufacturing Handbook

A Report of the Surgeon General

Analysis of Cosmetic Products

This book presents WHO guidelines for the protection of public health from risks due to a number of chemicals commonly present in indoor air. The substances considered in this review, i.e. benzene, carbon monoxide, formaldehyde, naphthalene, nitrogen dioxide, polycyclic aromatic hydrocarbons (especially benzo[a]pyrene), radon, trichloroethylene and tetrachloroethylene, have indoor sources, are known in respect of their hazardousness to health and are often found indoors in concentrations of health concern. The guidelines are targeted at public health professionals involved in preventing health risks of environmental exposures, as well as specialists and authorities involved in the design and use of buildings, indoor materials and products. They provide a scientific basis for legally enforceable standards.

Analysis of Cosmetic Products, Second Edition advises the reader from an analytical chemistry perspective on the choice of suitable analytical methods for production monitoring and quality control of cosmetic products. This book helps professionals working in the cosmetic industry or in research laboratories select appropriate analytical procedures for production, maintain in-market quality control of cosmetic products and plan for the appropriate types of biomedical and environmental testing. This updated and expanded second edition covers fundamental concepts relating to cosmetic products, current global legislation, the latest analytical methods for monitoring and quality control, characterization of nanomaterials and other new active ingredients, and an introduction to green cosmetic chemistry. Provides comprehensive coverage of the specific analytical procedures for different analytes and cosmetic samples Includes information on the biomonitoring of cosmetic ingredients in the human body and the environment Describes the most recent developments in global legislation governing the cosmetics industry Introduces green technologies and the use of nanomaterials in the development and analysis of cosmetic ingredients

This book addresses the application of nanotechnology to cosmetics. Edited by three respected experts in the field, the book begins with a general overview of the science behind cosmetics and skin care today, and of the status quo of nanotechnology in cosmetics. Subsequent chapters provide detailed information on the different nanoparticles currently used in cosmetics; the production and characterization of nanoparticles and nanocosmetics; and regulatory, safety and commercialization aspects. Given its scope, the book offers an indispensable guide for scientists in academia and industry, technicians and students, as well as a useful resource for decision-makers in the field and consumer organizations. Chapter 6 of this book is available open access under a CC BY 4.0 licence at link.springer.com.

NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT -- OVERSTOCK SALE -- Significantly reduced list price *This Surgeon General's Report details the causes and the consequences of tobacco use among youth and young adults by focusing on the social, environmental, advertising, and marketing influences that encourage youth and young adults to initiate and sustain tobacco use. This is the first time tobacco data on young adults as a discrete population have been explored in detail. The report also highlights successful strategies to prevent young people from using tobacco. This three volume set includes the following items: A booklet containing highlights from the 2012 Surgeon General's report on tobacco use among youth and teens ages 12 through 17 and young adults ages 18 through 26. This booklet provides an overview of tobacco use within this targeted age group. The second booklet is an Executive Summary with two messages. One message from for Kathleen Sebelius, Secretary of Health and Human Services and a second message from Howard Koh, Assistant Secretary of Health and contains a brief introduction to the set and summary*

and conclusions for each chapter contained in the final volume. The final volume contains over 800 pages of documentation, interwoven with text and data addressing the adverse health consequences of tobacco use by children and young adults. It includes research on a variety of topics, including nicotine addiction, trends in cigarette smoking among young adults, trends in smokeless tobacco use and cigar smoking over time, genetic factors in tobacco use among youth, and mass media influence on smoking to this age group to name a few. This third volume is rich with table data research findings to support the Surgeon General's concerns with America's use and tobacco. If you would like to find similar products, please check out our Alcoholism, Smoking, and Substance Abuse resources collection at this link: <https://bookstore.gpo.gov/catalog/health-benefits/alcoholism-smoking-substance-abuse> "

This book presents all the publicly available questions from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment.

The global popularity of herbal supplements and the promise they hold in treating various disease states has caused an unprecedented interest in understanding the molecular basis of the biological activity of traditional remedies. Herbal Medicine: Biomolecular and Clinical Aspects focuses on presenting current scientific evidence of biomolecular effects. An internationally acclaimed reference work recognized as one of the most authoritative and comprehensive sources of information on excipients used in pharmaceutical formulation with this new edition providing 340 excipient monographs. Incorporates information on the uses, and chemical and physical properties of excipients systematically collated from a variety of international sources including: pharmacopeias, patents, primary and secondary literature, websites, and manufacturers' data; extensive data provided on the applications, licensing, and safety of excipients; comprehensively cross-referenced and indexed, with many additional excipients described as related substances and an international supplier's directory and detailed information on trade names and specific grades or types of excipients commercially available.

This book meets your needs for an affordable, well-structured, user-friendly guide to dermatological diagnosis and treatment. It begins with principles of diagnosis and therapy before going on to discuss the major groups of skin diseases. Each skin disorder is illustrated with a color clinical photograph as well as a line drawing showing you exactly what the entity looks like. The logical organization of the chapters guides you towards an accurate diagnosis with therapy options in highlighted boxes. Tables in each chapter rank diseases according to frequency of incidence and highlights clinical features to assist you in making a differential diagnosis. Clinical examples of unusual presentations or unusual cases test your understanding and ability to apply key principles discussed in the text. Places cross-sectional line diagrams alongside color clinical photographs to show you what each syndrome looks like and provide schematic representation of the cause and condition. Uses tables to summarize main characteristics of major groups of skin conditions. Summarizes key information for easy comparison of variations of different skin diseases in same group. Presents a consistent format to help you find information in a systematic way. Includes color clinical photos to facilitate diagnosis. Features self-assessment tests to polish your understanding of principles discussed. Adds extra content at the end of each chapter with photos of more uncommon presentations to encourage you to think about non-obvious solutions. Uses full-color histopathology illustrations for additional clarity.
