A complicated and much-hated Tudor queen tells her side of the story in this engaging novel of Anne Boleyn. Anne Boleyn was born without great beauty, wealth, or title, but she has blossomed into a captivating young woman—and she knows it. Determined to rise to the top, she uses her wiles to win the heart of England's most powerful man, King Henry VIII. Not satisfied with the king's heart, however, she persuades Henry to defy everyone—including his own wife—to make her his new queen. But Anne's ambition would prove to be her fatal flaw. Named a New York Public Library Book for the Teen Age, among other honors, Doomed Queen Anne is part of the historical fiction Young Royals series that has illuminated the youthful lives of Europe's most compelling—and sometimes, infamous—queens and princesses.

Isabelle "Izzy" Harmon is home again. Literally. After landing her first teaching gig, Izzy has found herself sleeping in her old room on an ancient twin bed that squeaks whenever she moves. Sure, she loves Honeywell, Iowa but part of her wanted to move to civilization rather than return to her old life after graduating from college. Farm life is in her blood but so is the man who lives next door. It's too bad he never saw her as more than his best friend's little sister. It's true what they say... distance makes the heart grow fonder and four years away did nothing to quell the way Izzy's heart rate doubles whenever he's nearby. She hoped to get over it, but things don't always work out the way we hope. Nashville "Nash" Watson never left. His goal of playing baseball in the majors flew out the window the second he found out he was going to be a father. No regrets, though, because Nash figured he'd return to Honeywell, Iowa to farm his family's land. It was the only thing he knew for sure. Well, that and he's never falling for another woman again. Ever.

Jack presents with a wise, open and informed mind. He speaks firsthand about the psychological aspects of canine behavior as he opens the reader's mind to the possibilities that exist in life and after death. He reminds us that the way we think can change the course of our lives. This story will touch everyone who has ever loved. It matters not if they have four legs or two. Jack leads us to a higher love as he expands our tolerance and compassion for all of humanity. One hundred of the most evocative modern poems on joy, selected by an award-winning contemporary poet "Bursting with energy and surprising locutions. . . . Even the most familiar poets seem somehow new within the context of Joy."--David Skeel, Wall Street Journal "Wiman takes readers through the ostensible ordinariness of life and reveals the extraordinary."--Adrianna Smith, The Atlantic Christian Wiman, a poet known for his meditations on mortality, has long been fascinated by joy and by its relative absence in modern literature. Why is joy so resistant to language? How has it become so suspect in our times? Manipulated by advertisers, religious leaders, and politicians, joy can seem disquieting, even offensive. How does one speak of joy amid such ubiquitous injustice and suffering in the world? In this revelatory anthology, Wiman takes readers on a profound and surprising

journey through some of the most underexplored terrain in contemporary life. Rather than define joy for readers, he wants them to experience it. Ranging from Emily Dickinson to Mahmoud Darwish and from Sylvia Plath to Wendell Berry, he brings together diverse and provocative works as a kind of counter to the old, modernist maxim "light writes white"--no agony, no art. His rich selections awaken us to the essential role joy plays in human life.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.
