practising engineers  
and scientists, but  
also to advanced  
students interested in  
wear. It reviews our  
current  
understanding of the  
influence of  
microstructural  
elements and  
physical properties  
of materials (metals,

wear processes. The following chapters are concerned with wear modes of great practical interest such as grooving wear, sliding wear, rolling-sliding wear and erosive wear.

Our present understanding of abrasion, adhesion,

covers classical, modified and discrete lamination theory. It then addresses the theory of tire shape and spring properties and the mechanics of tread pattern contact properties, as well as the performance of
