

Hitchhiker39s Guide To The Galaxy Summary

Ousep Chacko, journalist and failed novelist, prides himself on being “the last of the real men.” His wife, Mariamma, finds ways to feed her family despite their lack of money, but in her spare time she fantasizes about Ousep’s early death. One day, their seventeen-year-old son, Unni—a boy obsessed with comics—does something terrible and inexplicable. Ousep and Mariamma separately try to solve the mystery of Unni’s action but find no answers. Three years later, Ousep receives a package that sends him back to the search. He starts to hound his son’s friends and a famous neurosurgeon. Meanwhile, younger son Thoma—a twelve-year-old with below-sea-level self-esteem—falls desperately in love with their haughty, beautiful teenage neighbour, who has her own secrets. The Illicit Happiness of Other People—a smart, wry and poignant novel—is part mystery, part philosophy and part unlikely love story.

In April 2006 Robin ‘Einstein’ Varghese, a stupendously naïve young man graduates from one of India’s best business schools with a job at Dufresne Partners, a mediocre mid-market management consulting firm largely run by complete morons. Varghese finds that he fits into the culture remarkably well. Or does he?

Through a stunning series of blunders, mishaps and inadvertent errors, Robin begins to make his superiors rue the day they were driven by desperation into hiring him. Dork is for all of those who’ve ever sat depressed in cubicles and wanted to kill themselves with office stationery.

Are you fascinated by Artificial Intelligence but you think that it would be too difficult for you to learn? If you think that Neural Networks and Artificial Intelligence are the present and, even more, the future of technology, and you want to be part of it... well you are in the right place, and you are looking at the right book. If you are reading these lines you have probably already noticed this: Artificial Intelligence is all around you. Your smartphone that suggests you the next word you want to type, your Netflix account that recommends you the series you may like or Spotify's personalised playlists. This is how machines are learning from you in everyday life. And these examples are only the surface of this technological revolution. Either if you want to start your own AI enterprise, to empower your business or to work in the greatest and most innovative companies, Artificial Intelligence is the future, and Neural Networks programming is the skill you want to have. The good news is that there is no exclusive club, you can easily (if you commit, of course) learn how to program and use neural networks, and to do that Neural Networks for Beginners is the perfect way. One Novel, Ten Authors

From the author of One Day in the Eucalyptus, Eucalyptus Tree: Do you wanna? Wanna see? Let's go find that gator, gator, gator! COME WITH ME! Put on your life jacket, hop in the boat, and raise your binoculars—it's time to go on an adventure! In Daniel Bernstrom's follow-up to the critically acclaimed One Day in the Eucalyptus, Eucalyptus Tree, a fearless little girl takes off in search of a giant gator—but she's not going into that swamp alone! No way! She wants YOU, the reader, to come along. Off you go, peering through the lush landscapes, looking for that gator! But each time you think you see it? Oops! Just a fox. Or some ducks! Or a snake. Maybe you'll never find the gator, gator, gator . . . With stunning illustrations from Sendak Fellow Frann Preston-Gannon, readers experience the feeling of being on a real adventure deep in the swamp. Rhyming, repeating, and exhilarating, the text is a delightful read-aloud romp that will entertain and make everyone's heart skip a beat! In one complete volume, here are the five classic novels from Douglas Adams's beloved Hitchhiker series. This well-received novel from a cast of acclaimed authors is now available in paperback! A video message from a dead person. A larcenous teenager. A man who can stick his left toe behind his head and in his ear. An epileptic girl seeking answers in a fairy tale. A boy who loses everything in World War II, and his brother who loses even more. And a family with a secret so big that it changes everything. The world's best beloved authors each contribute a chapter in the life of the mysterious George "Gee" Keane, photographer, soldier, adventurer, and enigma. Under different pens, a startling portrait emerges of a man, his family, and his gloriously complicated tangle of a life.

of strange disappearances and old legends. The most mysterious is that of Sara Harrison Shea, who, in 1908, was found dead in the field behind her house just months after the tragic death of her daughter, Gertie. Now, in present day, nineteen-year-old Ruthie lives in Sara's farmhouse with her mother, Alice, and her younger sister, Fawn. Alice has always insisted that they live off the grid, a decision that suddenly proves perilous when Ruthie wakes up one morning to find that Alice has vanished without a trace. Searching for clues, she is startled to find a copy of Sara Harrison Shea's diary hidden beneath the floorboards of her mother's bedroom. As Ruthie gets sucked deeper into the mystery of Sara's fate, she discovers that she's not the only person who's desperately looking for someone that they've lost. But she may be the only one who can stop history from repeating itself.

"...profoundly moving..." -Publishers Weekly

Nelson Mandela's two great-grandchildren ask their grandmother, Mandela's youngest daughter, 15 questions about their grandad - the global icon of peace and forgiveness who spent 27 years in prison. They learn that he was a freedom fighter who put down his weapons for the sake of peace, and who then became the President of South Africa and a Nobel Peace Prize-winner, and realise that they can continue his legacy in the world today. Seen through a child's perspective, and authored jointly by Nelson Mandela's great-grandchildren and daughter, this amazing story is told as never before to celebrate what would have been Nelson's Mandela 100th birthday.

The year is 1878. The widowed Christopher Gore, his son David and their housekeeper Margaret, the woman with whom they are both in love, live at The Lodge in Ballybeg. But in this era of unrest at the dawn of Home Rule, their seemingly serene life is threatened by the arrival of Christopher's English cousin, who unwittingly ignites deep animosity among the villagers of Ballybeg. This quirky novel - a bestseller in India - chronicles an Indian student's year abroad at an American university. Gopal's hilarious misadventures with the American language, his flamboyant landlady, the ubiquitous hamburger, and, most of all, American women form the basis for this wonderfully truthful story. Faced with the relentless sexuality of his fellow college students, the quintessentially decent Gopal reacts with a mixture of disbelief, sly amusement, and hormonal overload. Throughout his battles with racism, his own insecurity, and his family's warning that he will be severely judged should he dabble in America's temptations, Gopal retains a dignity and surprising shrewdness, rejecting the worst of what America offers even as he recognizes the best. Following reluctantly behind the outrageous leadership of his American friend Randy, the naive but observant Gopal reacts with a wit that far transcends his linguistic limitations.

A history of the Korean War with soldier's-eye views from both sides, by the Pulitzer Prize-winning author of The Rising Sun and Infamy. Pulitzer Prize-winning author John Toland reports on the Korean War in a revolutionary way in this thoroughly researched and riveting book. Toland pored over military archives and was the first person to gain access to previously undisclosed Chinese records, which allowed him to investigate Chairman Mao's direct involvement in the conflict. Toland supplements his captivating history with in-depth interviews with more than two hundred American soldiers, as well as North Korean, South Korean, and Chinese combatants, plus dozens of poignant photographs, bringing those who fought to vivid life and honoring the memory of those lost. In Mortal Combat is comprehensive in it discussion of

events deemed controversial, such as American brutality against Korean civilians and allegations of American use of biological warfare. Toland tells the dramatic account of the Korean War from start to finish, from the appalling experience of its POWs to Mao's prediction of MacArthur's Inchon invasion. Toland's account of the "forgotten war" is a must-read for any history aficionado.

One works. One looks around. One meets people. But very little communication takes place . . . That is the nature of this little island. As five apparently unrelated characters meet in a seemingly insignificant garden, the autumnal sun shines overhead and everybody waits for rain. What they discuss is superficially anything that can pass the time. What is portrayed is the very essence of England, Englishness, class, unfulfilled ambition, loves lost and homes that no longer exist. Storey's timeless play is a beautiful, compassionate, tragic and darkly funny study of the human mind and a once-great nation coming to terms with its new place in the world.

human health and ecology are still unknown, and public concern has been steadily intensifying. This new book from the Council for Responsible Genetics gathers the best, most thought-provoking essays by the leading scientists, science writers, and public health advocates. Collectively, they address such questions as: Are GM foods safe and healthy for us? Will GM food really solve world hunger? Who really controls the power structure of food production? Are GM foods ecologically safe and sustainable? Why is it so difficult to get GM foods labeled in the US? What kinds of regulations and policies should be instituted? How is seed biodiversity, of lack thereof, affecting developing countries? Should animals be genetically modified for food? How are other countries handling GM crops? Ultimately, this definitive book encourages us to think about the social, environmental, and moral ramifications of where this particular branch of biotechnology is taking us, and what we should do about it.
