Forecasting is required in many situations. Stocking an inventory may require forecasts of demand months in advance.

Telecommunication routing requires traffic forecasts a few minutes ahead.

Whatever the

involved, forecasting
is an important aid
in effective and
efficient planning.

childrearing:

“Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions”

(Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many

parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a

File Type PDF Holt
Algebra 2 Teacher

dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do

math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react

when their peers
tease them) to getting
a vasectomy (because
fewer kids in a
family mean smarter
kids). Conley
encourages parents
to draw on the latest
data to rear children,
if only because that
level of engagement
with kids will
produce solid and

happy ones.

Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession.

Parentology teaches you everything you need to know about

the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.
