Presents Book One of Euclid's Elements for students in humanities and for general readers. This treatment raises deep questions about the nature of human reason and its relation to the world. Dana Densmore's Questions for Discussion are intended as examples, to urge readers to think more carefully about what they are watching unfold, and to help them find their own questions in a genuine and exhilarating inquiry.

The backbone of Henle Latin Second Year is intensive language study, including review of the first year plus new materials. Separated into four parts, Henle Latin Second Year includes readings from Caesar's Commentaries, extensive exercises, and Latin-English vocabularies. Humanistic insight and linguistic training are the goals of the Henle Latin Series from Loyola Press, an

and author of G. K. Chesterton -The Apostle of Common Sense, presents a book of wonderful insights on how to look at the whole world through the eyes of Chesterton. Since, as he says, Chesterton wrote about everything, there is an ocean of his material to benefit from GKC's insights on a kaleidoscope of many important topics. Chesterton wrote a hundred books on a variety of themes, thousands of essays for London newspapers, penned epic poetry, delighted in detective fiction, drew illustrations, and made everyone laugh by his keen humor. Everyone who knew Chesterton loved him, even those he debated with. His unique writing style that combines philosophy, spirituality, history, humor, and paradox have made him one of the most widely read authors of modern times. As Ahlquist shows in his engaging volume, this most quoted writer of the 20th century has much to share with us on topics covering

*water, food, and pollution—as well as on people who are working to make things better. A People's Curriculum for the Earth has the breadth and depth of Rethinking Globalization: Teaching for Justice in an Unjust World, one of the most popular books we've published. At a time when it's becoming increasingly obvious that life on Earth is at risk, here is a resource that helps students see what's wrong and imagine solutions. Praise for A*

*People's Curriculum for the Earth "To really confront the climate crisis, we need to think differently, build differently, and teach differently. A People's Curriculum for the Earth is an educator's toolkit for our times." – Naomi Klein, author of The Shock Doctrine and This Changes Everything: Capitalism vs. the Climate "This volume is a marvelous example of justice in ALL facets of our lives—civil, social, educational, economic, and yes,*

*breathe? What causes the ocean waves? Now you can learn the answers to these and other questions about the earth, sea, and air through 101 fun, safe, low-cost experiments and activities that can be performed at home or in the classroom. In Earth Science for Every Kid, you'll use a tennis ball and a marble to demonstrate a solar eclipse. You'll make a peanut butter and jelly sandwich to understand sedimentary rock formation. And, with the assistance of a Slinky(r) and a helper, you'll learn about the motion of water waves. Each of the 101 experiments is broken down into its purpose, a list of materials, step-by-step instructions, expected results, and an easy to understand explanation. Every activity has been pretested and can be performed safely and inexpensively in the classroom or at home. Also*
