**This is NOT your father's home repair book! And it's not your husband's, your brother's, your boyfriend's, or the guy's next door. Dare to Repair is a do-it-herself book for every woman who would rather be self-reliant than rely on a super or contractor. No matter the depth of your pockets or the size of your home, a toilet will get clogged, a circuit breaker will trip, and a smoke**

detector will stop working. It's up to you how you'll deal with them -- live in denial, pay the piper, or get real and do it yourself. Dare to Repair demystifies these home repairs by providing information that other books leave out. In Dare to Repair, you'll learn how to: Take the plunge -- from fixing a leaky faucet to cleaning the gutters. Lighten up -- from removing a broken light bulb to installing a dimmer switch. Keep your cool -- from

**maintaining a refrigerator's gasket to changing the rotation of a ceiling fan. Get a handle on it -- from replacing a doorknob to repairing a broken window. Play it safe -- from planning a fire escape route to installing a smoke detector. Filled with detailed illustrations, Dare to Repair provides even the most repair-challenged woman with the ability to successfully fix things around the home. Once you start, you won't want to stop.**

electrical systems with easy-to-understand language, step-by-step photography, and detailed illustrations.

Homeowners will learn how their home's electrical system works and how to complete installations and repairs. This project-based book shows how to select the right cable, wires, and other equipment, and how to run wiring through walls and between floors. Projects guide the reader through installing switches, outlet receptacles, electrical appliances, and lighting systems. The book also shows how outdoor lighting, including security and low-voltage systems, can help homeowners improve and illuminate the exterior areas around their homes. The eighth edition has been updated with the latest information on everything from big screen TVs to 3-way switches required by the

distracted us from the work that matters most? It's hard to avoid innovation these days. Nearly every product gets marketed as being disruptive, whether it's a new technology or a new toothbrush. But in this manifesto on the state of American work, historians of technology Lee Vinsel and Andrew Russell argue that our focus on shiny new things has made us poorer, less safe, and--ironically--less innovative. Drawing on years of original research and reporting, Russell and Vinsel show how our fixation on innovation has harmed every corner of the economy. Corporations have spent millions hiring chief innovation officers while their core businesses tanked. Computer science programs have focused on programming and development even though the overwhelming majority

of jobs are in IT and maintenance. Suburban sprawl has saddled cities with expensive infrastructure and piles of deferred maintenance that they can't afford to fix. And sometimes, innovation even kills--like in 2018, when a Miami bridge hailed for its innovative design collapsed onto a highway and killed six people. Vinsel and Russell tell the at-times humorous, at-times alarming story of how we devalued the work that keeps our world going--and in so doing, wrecked our economy, left our public infrastructure derelict, and lined the pockets of consultants who combine the ego of Silicon Valley with the worst of Wall Street's greed. They offer a compelling plan for how we can shift our focus in resources away from the pursuit of growth at all costs, and back toward the people and technologies
