In this profound  
work, Vittorio

Guidano expands  
upon his earlier  
seminal

contributions on  
the application of  
cognitive and  
developmental  
principles to  
individuals  
struggling with

various forms of  
psychopathology.

Here, he fully  
develops the idea  
that individuals'  
experience, both  
positive and  
negative, are  
powerfully  
influenced by  
their personal  
` psychological or

experiences and

ongoing

psychological

processes may

collude to

perpetuate

dysfunctional

patterns and

The central and

File Type PDF

perhaps most  
exciting thesis in  
this new

expression of

Guidano's

thinking is that

the ``deep

structure' or ``core

organizing

processes`` that

constrain human

experience may  
be at the heart of  
successful

intervention as

well as the

classical problems

of resistance,

relapse, and

refractory

behaviors.

Guidano's

contention is at

once simple and

powerful: those

psychological

processes

involved in the

development and

maintenance of

personal identity,

or ``self' that

should be the

primary foci of

research and

meaning of

Guidano's

perspective for

perhaps best

expressed in the

author's own

words: ``Knowing

possible for that  
particular client. In  
other words, the  
therapist should  
be able to

respects the  
client's personal  
identity and

coherence and  
that, at the same

time, does not

confirm the basic

pathogenic

assumptions. For

example, in

working with

agoraphobics, the

therapist has to

respect their self-

images centered  
on the need to be  
in control. He/she

can do this by  
avoiding any  
direct attack on  
their controlling  
attitudes and by  
leaving them a  
wide margin of  
control in the  
relationship. At

File Type PDF

the same time the therapist should avoid confirming their assumptions about the somatic origin of their emotional disturbances or about their inborn fragility. In short, the therapist who can anticipate the

better able to help
