Percy's stirring sequel to Love in the Ruins follows Tom More's redemptive mission to cure the mysterious ailment afflicting the residents of his hometown. Dr. Tom More returns to his parish in Louisiana determined to live a simpler life. Fresh out of prison after getting caught selling uppers to truck drivers, he wants nothing more than to live "a small life." But when everyone in town begins acting strangely—from losing their sexual inhibitions to speaking only in blunt, truncated sentences—More, with help from his cousin Lucy Lipscomb, takes it upon himself to reveal what and who is responsible. Their investigation leads them to the highest seats of power, where they discover that a government conspiracy is poised to rob its citizens of their selves, their free will, and ultimately their humanity.

How did the table fork acquire a fourth tine? What advantage does the Phillips-head screw have over its single-grooved predecessor? Why does the paper clip look the way it does? What makes Scotch tape Scotch? In this delightful book Henry, Petroski takes a microscopic look at artifacts that most of us count on but rarely contemplate, including such icons of the everyday as pins, Post-its, and fast-food "clamshell" containers. At the same time, he offers a convincing new theory of technological innovation as a response to the perceived failures of existing products—suggesting that irritation, and not necessity, is the mother of invention.

"The "land where lemons bloom" was already a fascinating travel destination long before Goethe identified it as such. The grand culture and varied landscapes of Italy have attracted and inspired artists and writers of every epoch. Since the time of classic "educational trips" to the ancient sites of the Apennine Peninsula, ever increasing numbers of travellers have developed an affinity to this country and the ars vivendi of its inhabitants. Indeed, the simple and yet ingenious Italian cuisine has become the expression of countless visitors' approach toward life. In 496 pages and more than 1,200 color photographs, Culinaria Italy introduces not only kitchen and cellar, but also the land and people who reside between the Alps' peaks and the pointed toe of the Italian "boot". More than 380 time-tested recipes from every region of the country ensure that a feast for the palate can follow the stimulating reading pleasure."

Together with his colleagues at Citroën, Andre Lefebvre
created the Traction Avant (1934), the TUB (1939) -
Citroën's first front wheel drive utility van that was
succeeded by the H and HY vans (1947) - the Deux Chevaux
(1948), and, last but not least, the DS (1955). From 1923 to
1931 Lefebvre also designed several highly original and
outstanding competition cars and record-breaking automobiles
for Voisin. He even drove some these cars in races and**

record attempts. It is obvious that during his 16 years with Gabriel Voisin he was very much influenced by the ideas of this illustrious aviation pioneer and car manufacturer. The experience gained during that period gave him the self-confidence to persuade his successive bosses at Citroën that his unorthodox approach to automobile design was what the company needed; first he convinced André Citroën, later Pierre Michelin, then Pierre-Jules Boulanger, and finally Robert Puiseux and Pierre Bercot. His oeuvre for Citroën alone earns him a place of honour among the great automobile designers of the past century. The fact that most present-day cars still carry the DNA of his design philosophy makes him stand out above other automotive pioneers and innovators. That is why it is amazing that so little is known about this fascinating and brilliant engineer. This book was written in order to remedy that, and to pay tribute to André Lefebvre: the passionate pioneer who left car enthusiasts around the world such an important heritage.

Open wide! Dentists care for people's teeth. Give readers the inside scoop on what it's like to be a dentist. Readers will learn what dentists do, the tools they use, and how people get this exciting job. This fascinating story of the MGB covers its development as a replacement for the MGA. The author includes the designers and engineers who worked on the project; the early production cars; the evolution of the model and the introduction of the MGC and MGB GT versions; competition and works cars; sales and promotion; and the MGB industry today. Vivid illustrations include a gallery of specially commissioned color photographs, official archive material, cutaway drawings, and photographs provided by ex-MG employees.

The MGB epitomises the spirit of the British sports car. Launched in 1962, the 'B' remained in production for 18 years, and has become one of the most-loved sports cars of all time. Although the MGB was mass-produced, its combination of unpretentious styling, sound engineering and practicality won the affection of drivers on both sides of the Atlantic, and ensures that enthusiasm for this affordable classic remains undiminished. This beautifully produced book will appeal to all fans of British sports cars as well as to MGB owners and enthusiasts. The MGB epitomises the spirit of the British sports car. This illustrated volume should appeal to all fans of British sports

Bernt Spiegel's The Upper Half of the Motorcycle was a best-selling motorcycling book in its original German with multiple editions and printings to its credit. Now translated into English, its provocative message is available to a wider audience. Spiegel's metaphor considers the rider and the motorcycle as a single unit, the rider being the upper half. Taking a multidisciplinary approach, the author draws on anthropology, psychology, biology, physics, and other disciplines to analyze the theory and function of the man-machine unit. Motorcycle riding is seen as a junction where people have created machines for personal transport and then become so adept at using them that the machine becomes like an extension of the rider themselves. The ultimate goal for riders is the integration of the man-machine interface and subsequent skill development to the point of virtuosity. Spiegel considers the various aspects of motorcycle riding that must be understood, practiced, and mastered before virtuosity can be attained. Many anecdotes, supplementary material, and in-depth treatment of specialized topics is contained in sidebars and footnotes. Numerous diagrams and photographs illustrate the book's principles allowing the reader to consider and develop their riding skill set. The Harley Davidson is more than just a motorbike - for many enthusiasts it's a lifestyle statement. This stunning book packed with 500 color photographs celebrates that lifestyle, as well as covering the complete history of this 20th Century icon. From Marlon Brando to Billy Idol, every celebrity over the last 50 years wanting to promote a cool, tough image has been photographed astride one of these legendary machines. Packed with various model photos, colorful memorabilia and celebrity pictures, this book celebrates Harley Davidson history in a classy photographic style.

In early twentieth-century Russia, suicide became a public act and a social phenomenon of exceptional scale, a disquieting emblem of Russia's encounter with modernity. This book draws on an extensive range of sources, from judicial records to the popular press, to examine the forms, meanings, and regulation of suicide from the seventeenth century to 1914, placing developments into a pan-European context. It argues against narratives of secularization that read the history of suicide as a trajectory from sin to insanity, crime to social problem, and instead focuses upon the cultural politics of self-destruction. Suicide - the act, the body, the socio-medical problem - became the site on which diverse authorities were established and contested, not just the priest or the doctor but also the sovereign, the public, and the individual. This panoramic history of modern Russia, told through the prism of suicide, rethinks the interaction between cultural forms, individual agency, and systems of governance.

The new book is published to coincide with an exhibition at the Kunsthau Baselland in summer 2013, featuring work by students and alumni of the Master Fine arts program at Zurich University of the Arts. The museum has a tradition of presenting work by significant emerging artist, from Switzerland and abroad. For the first time the museum has cooperated with one of the major Swiss art schools with its

Masters course that is based on experimental and project orientated thinking as well as trans-disciplinary, individual and collaborative work. The entire project It Is All in the Detail was never considered as a rigid topic to be illustrated with works of art. The objective was rather to provide points of discussion, realized in cooperation with the artists. The title aims at provoking reflections, with a focus on contemplating art itself and the insights gained in the process. The book is published in cooperation with the Department of Art & Media, Zurich University of the Arts ZHdK.

In the decade preceding World War II and into the 1950s, Harley-Davidson was the United States Military's battle bike of choice. Employed by the U.S. Army, Navy, and Marines, as well as several allied forces, it saw service in World War II arenas from Normandy to China. Loved for its toughness and versatility by the men it carried into conflict, Harley's military models are highly prized by today's motorcycle collectors and military enthusiasts. How to Restore Your Military Harley-Davidson 1932-1952 Second Edition is the ultimate reference for correctly restoring these rare and historically significant machines. Author Bruce Palmer III is one of the top experts on Harley-Davidson military motorcycles bringing years of research to this work. Through extensive research, the book details the different models, parts, finishes, equipment, and markings necessary to restore or preserve these motorcycles. More than 250 archival and detail photos cover every facet of these unique motorcycles.
