In this fresh new offering to the Intro Psychology course, authors John Cacioppo and Laura Freberg portray psychology as being an integrative science in two ways. First, they have written a text that reflects psychology's rightful place as a hub science that draws from and is cited by research in many other fields. Second, this text presents psychology as a unified science that seeks a complete understanding of the human mind, rather than as a loosely organized set of autonomous subspecialties. As psychology moves rapidly toward maturity as an integrative, multidisciplinary field, the introductory course offers an opportunity to teach all of psychology in one place and at one time. This text reflects that evolution—and the authors' excitement about it. Did you ever stop to think that the person who just walked by was someone you were supposed to meet? In this fast-paced world, we sometimes miss opportunities to become inspired by complete strangers, or even someone close to us. For years, Melissa "Missy" Hopely struggled with this idea because, although family and teammates always surrounded her, she felt completely alone in her battle with depression, obsessive-compulsive disorder, and bullying. Missy was diagnosed with OCD and depression as a teenager. Although she excelled as an athlete in sports like soccer and softball, Missy had a difficult time with normal social interactions and relationships. She struggled with a sometimes-crippling anxiety that made her stand out in a negative way to her peers, causing them to bully her at school. Persevering through years of hiding her true self, enduring her parents' difficult and painful divorce, and being abandoned by friends who couldn't cope with her differences, Missy started listening to others' stories. All of the people she had met throughout her lifetime. What she found out astonished her: Everyone has a story. Everyone feels insignificant at times. Everyone has challenges. Everyone will experience both bad and good. Everything we experience and go through is a part of us, but it doesn't have to define us. And, most important: Others have been where you are; you are not alone. This book tells not only Missy's story, but also the inspirational stories of courage and perseverance of people Missy has met "in real life." People like Carolyn, a high school student diagnosed with a cancerous brain tumor. Kimberly, a mom whose daughter's suicide made national television headlines. Lafayette, who has been HIV positive since birth. Jordan, who suffers from depression and bi-polar disorder and tried to take his own life by jumping out a ninth-story window. Ryan, a semi-professional boxer and college student who doesn't let his amputation slow him down. P-Track, who doesn't let his Asperger syndrome keep him from dancing. And, so many others. Missy's positive, encouraging message shines through these stories: If we take a second, we as individuals have the great power of uniting and working together to change other people's lives and our world for the better.

Stedman's Dental Dictionary

Body systems-based textbook to train nursing assistants to work in long-term care

Named one of the Best Books of the Year by Kirkus Reviews and BookPage "Illuminates human fragility in tales both lyrical and soul-wrenching." —Danielle Ofri, New York Times Book Review In this "artful, unfliningly human, and understandable" (Boston Globe) account inspired by his own experiences becoming a doctor, Terrence Holt puts readers on the front lines of the harrowing crucible of a medical residency. A medical classic in the making, hailed by critics as capturing "the feelings of a young doctor's three-year hospital residency . . . better than anything else I have ever read" (Susan Okie, Washington Post), Holt brings a writer's touch and a doctor's eye to nine unforgettable stories where the intricacies of modern medicine confront the mysteries of the human spirit. Internal Medicine captures the "stark moments of success and failure, pride and shame, courage and cowardice, self-reflection and obtuse blindness that mark the years of clinical training" (Jerome Groopman, New York Review of Books), portraying not only a doctor's struggle with sickness and suffering but also the fears and frailties each of us—doctor and patient—bring to the bedside.

The American Crisis is a collection of articles by Thomas Paine, originally published from December 1776 to December 1783, that focus on rallying Americans during the worst years of the Revolutionary War. Paine used his deistic beliefs to galvanize the revolutionaries, for example by claiming that the British are trying to assume the powers of God and that God would support the American colonists if they are loyal to their rights. The book is influential that others began to adopt some of their more stirring phrases, catapulting them into the cultural consciousness: for example, the opening line of the first Crisis, which reads "These are the times that try men's souls." This book is part of the Standard Ebooks project, which produces free public domain ebooks.
