

Hospice Documentation Tools

This book serves as a comprehensive reference for the basic principles of caring for older adults, directly corresponding to the key competencies for medical student and residents. These competencies are covered in 10 sections, each with chapters that target the skills and knowledge necessary for achieving competency. Each of the 45 chapters follow a consistent format for ease of use, beginning with an introduction to the associated competency and concluding with the most salient points for mastery. Chapters also includes brief cases to provide context to the clinical reasoning behind the competency, strengthening the core understanding necessary to physicians of the future. Written by expert educators and clinicians in geriatric medicine, *Geriatric Practice* is key resource for students in geriatric medicine, family and internal medicine, specialties, hospice and nursing home training, and all clinicians studying to work with aging patients.

The first truly interdisciplinary book on supportive oncology and palliative care returns with a new edition that serves as a practical guide to the management of the myriad symptoms and quality-of-life issues that occur in patients with cancer—including newly diagnosed patients, patients undergoing treatment, cancer survivors, and patients whose disease is no longer curable. The interdisciplinary group of contributors includes leading experts in hospice care and palliative medicine, oncology, nursing, neurology, psychiatry, anesthesiology, and pharmacology. This completely revised edition features new chapters on caregiver stress, hepatic failure, pulmonary failure, research issues in palliative care, and beginning a palliative care program. Content has been aligned with the needs of today's palliative care fellowship programs and includes additional tables, algorithms, and flow charts.

Adult Nursing Practice: Using evidence in care enables today's students and newly qualified nurses develop the knowledge and skills they need to deliver, and lead care tomorrow. Reflecting the principles of evidence-based care, this textbook helps students learn to manage patients with common conditions and fundamental health needs so they can provide the best possible evidence-based care every day.

Core Skills and Clinical Competencies

This practical, engaging book provides concise, real life-tested guidance to healthcare teams concerned with widely reported and incentivized hospital quality and safety metrics, offering both a conceptual approach and specific advice and frameworks for reviewing quality and safety numerator events, from the perspective and experience of clinicians and administrators working within the Ochsner Health System. The text opens with the rationale for closely managing widely (including publicly) reported hospital patient quality and safety measures. Attention is given to the financial implications of quality performance, with respect to both penalties and payment incentives used by payer organizations. It then reviews the major public ratings and their relevant methodologies, including CMS, AHRQ and NSHN. In addition, it addresses ratings by proprietary organizations that have a large member clientele, such as Vizient, USNews, Leapfrog, Healthgrades, CareChex and others. Each metric - for example, the AHRQ Patient Safety Indicators (PSIs), and other metrics such as readmission rate, risk adjusted complications, hospital-acquired conditions and mortality - is addressed in a stand-alone chapter. For each, the importance, approach to review, opportunity for optimization, and engagement of healthcare staff are reviewed and discussed. Overall, this book forefronts the benefits of a collaborative approach within a health system. The concurrent review process, multidisciplinary collaboration among quality improvement, clinical documentation, coding and medical staff personnel are all emphasized. Also described in detail is the approach to and specific opportunities for medical staff education and engagement. Additional key topics include Engagement of the Medical Staff and House Staff (i.e., residents and other trainees), Futile Care, Surgical Quality Improvement (NSQIP), Nursing Provider Partnership, and Translation of Data Review to Successful Performance Improvement. Specialty chapters on pediatric, neurologic and transplant quality metrics are also included.

Understand the when, why, and how! Here's your guide to developing the skills you need to master the increasing complex challenges of documenting patient care. Step by step, a straightforward 'how-to' approach teaches you how to write SOAP notes, document patient care in office and hospital settings, and write prescriptions. You'll find a wealth of examples, exercises, and instructions that make every point clear and easy to understand.

Introducing the only fully comprehensive skills text on the market, distinctly for Canadian students! Canadian Clinical Nursing Skills and Techniques helps equip you with the skills you need to successfully care for patients within the Canadian social and institutional context. Building on the strength of Clinical Nursing Skills & Techniques' comprehensive coverage of over 200 basic, intermediate and advanced skills, this textbook features nearly 1,000 full-colour photographs and drawings, a nursing process framework, step-by-step instructions with rationales, and a focus on critical thinking and evidence-informed practice. Written by the highly respected author team of Anne Griffin Perry, Patricia A. Potter, Wendy Ostendorf, and Canadian author Shelley L. Cobbett, it offers all the guidance and tools you need to perform nursing skills with complete confidence! Comprehensive coverage includes over 200 basic, intermediate, and advanced nursing skills. Streamlined theory content in each chapter features a quick, easy-to-read bullet format to help reduce repetition and emphasize the clinical focus of the book. Unique! Evidence-Informed Nursing Practice chapter covers the entire process of conducting research, including collecting, evaluating, and applying evidence from published research. Unique! Unexpected Outcomes and Related Interventions sections alert you to what might go wrong and how to appropriately intervene. Clinical Debriefs case-based review questions at the end of each chapter focus on issues such as managing conflict, care prioritization, patient safety, and decision-making to help you better prepare for the clinical setting. Nursing process framework incorporates the areas of delegation and collaboration; reporting and recording; safety guidelines; and teaching, pediatric, geriatric, and home care considerations. Basic skills presented in streamlined procedural guidelines format makes it easy learn and review basic nursing skills. Clinical Decision Points within skills address key safety issues or possible skill modifications for specific patient needs.

Rationales for each skill step explain why steps are performed in a specific way, including their clinical significance and benefit, and incorporate the latest research findings. Video clip icons indicate video clips that are related to skills and procedures in the book and related lessons in Nursing Skills Online.

The importance of palliative care for children facing life threatening illness and their families is now widely acknowledged as an essential part of care, which should be available to all children and families, throughout the child's illness and at the end of life. The new edition of the Oxford Textbook of Palliative Care for Children brings together the most up to date information, current knowledge, evidence, and developments of clinical practice in the field. The book is structured into four sections. 'Foundations of Care' describes core issues, the foundations on which paediatric palliative care is based. 'Child and Family Care' looks at different aspects of psychological, social, and cultural care for the sick child or young person, and their family. These chapters cover the time course of the illness, around the time of death and support for the bereaved family. 'Symptom Care' focuses on the uses of medication, specific symptoms, and their management. Finally, 'Delivery of Care' examines practical approaches to care in different environments and the needs of clinicians. Two new editors join the team from Canada and South Africa, reflecting our aims to contribute towards the development of care for children across the world, and to be a resource for both experienced clinicians and those new to the field. Comprehensive in scope, exhaustive in detail, and definitive in authority, this third edition has been thoroughly updated to cover new practices, current epidemiological data, and the evolving models that support the delivery of palliative medicine to children. This includes two new chapters, looking in detail at 'Decision Making' and

'Perinatal Care', and a new section highlighting the emerging importance of 'Palliative Care for Children in Humanitarian Crises'. This book is an essential resource for anyone who works with children worldwide.

A Study Guide with Review Questions

THE NURSE MANAGER'S SURVIVAL GUIDE, 4TH EDITION

A Competency Based Approach to Caring for Older Adults

Principles and Practice of Palliative Care and Supportive Oncology

Evidence-Based Patient Care for Adolescents to Older Adults

Psychosocial Issues in Palliative Care

Hospice & Palliative Care Handbook, Third Edition, offers concise, focused coverage of all aspects of hospice and palliative care for clinicians, managers, and other team members who provide important care while meeting difficult multilevel regulations. Author Tina M. Marrelli, Director of the first U.S. hospice program to attain Joint Commission accreditation for hospice services, helps caregivers meet quality, coverage, and reimbursement requirements in daily practice and documentation. Filled with key topics such as professional standards and guidelines, bereavement services considerations, outcomes, and goals, and quality control, this comprehensible book provides the tools hospice caregivers need for success. 2nd Place 2018 AJN Book of the Year

An on-the-go reference for hospice nurses and those interested in end-of-life care, this practical guide covers the essential elements in the compassionate and holistic care of terminally ill patients and their families. Nurses care for patients facing end-of-life issues in every practice specialty and, as the U.S. population continues to age, the need for proficiency in end-of-life skills will become increasingly important. Fast Facts for the Hospice Nurse: A Concise Guide to End-of-Life Care is an invaluable resource that provides emotional, administrative, and palliative support, whether in a hospice, long-term care facility, or acute care setting. This vital go-to text clearly and concisely lays out not only how to care for patients facing end-of-life issues, but also how to engage in self-care and cope with occupational stress. Beginning with an overview of hospice care, including its history and philosophy, this book offers a timeline of the growth of the hospice movement in the United States. Subsequent sections include up-to-date information on the clinical responsibilities of the hospice nurse in addressing the physical, psychological, and spiritual needs of terminally ill patients and their families in a culturally sensitive way. This book also outlines the administrative duties of the hospice nurse, including hospice documentation, a review of hospice regulations, and quality management. The closing section focuses on occupational stress in hospice nursing and how to engage in self-care. This text can serve as a useful clinical resource and also as a reference for nurses seeking hospice certification from the Hospice and Palliative Credentialing Center. Key Features Organized within the context of the scope and standards of practice of the Hospice and Palliative Nurses Association. Addresses key points about issues unique to hospice nursing and highlights evidence-based interventions Addresses important Medicare regulations and reimbursement Offers numerous clinical resources to assist with hospice nursing practice Serves as a concise study resource for hospice nursing certification

Drs Eduardo D. Bruera and Russell K. Portenoy have completely revised and updated the widely respected Cancer Pain: Assessment and Management for the second edition of this unanimously praised book. This is a comprehensive, clinically oriented review of all aspects of the complex and multidimensional problem of cancer pain. The unique characteristics of cancer pain, including pathophysiology, clinical assessment, diagnosis, and pharmacological and nonpharmacological management are all discussed here in detail. Internationally recognized leaders in cancer pain research have contributed to many new chapters, including neuraxial analgesia, hospice and institution-based palliative care programs, bone pain, and cancer pain and palliative care in the developing world. Cancer Pain continues to be a scholarly but accessible text that is an essential resource for physicians, nurses, and medical students who treat suffering from cancer pain.

Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. Proven, approachable, and part of a complete course solution, Fundamentals of Nursing, 9th Edition, makes essential concepts accessible and help students develop the knowledge and clinical skills to succeed throughout their nursing education. This comprehensively enhanced edition equips students for today's clinical environment with coverage of emerging practices and technology, new multimedia learning tools, and case studies that reflect the clinical application of chapter concepts and prepare students to excel throughout their nursing careers. Features New! Reflective Practice Leading to Personal Learning callouts cultivate a person-centered approach to nursing care. New! Clinical vignettes personalize the clinical application of concepts and integrate with vSim for Nursing for patient-specific reinforcement of commonly encountered scenarios and conditions. New! Technology Alerts familiarize students with emerging devices and software they'll likely encounter in the clinical setting. New! Informatics chapter reflects the increasingly important role of data and information technology in patient care. New! QSEN boxes in every chapter help students ensure compliance with Quality and Safety Education for Nurses competencies. NEW! Legal Alerts help students ensure compliance with important laws and considerations related to clinical practice. New! Watch & Learn Videos clarify key concepts and procedures in engaging detail. Revised! Illustrated Concept Maps engage visual learners, simplify complex topics, and strengthen students' clinical reasoning skills. Case scenarios in each chapter encourage holistic patient care and reflection on critical thinking questions.

Fast Facts for the Hospice Nurse

An overlook of the theoretical perspective and practical information about the growing field of hospice.

This landmark text is the key resource for nurses working in the field of palliative care. Edited by renowned nursing experts, and written by a dynamic team of internationally known authorities in nursing and palliative medicine, the Oxford Textbook of Palliative Nursing covers the gamut of principles of care from the time of initial diagnosis of a terminal disease to the end of a patient's life and beyond. The text is distinctively developed to highlight the nurse's vital role as part of an integrated palliative care team. Various care settings are discussed including the hospital, ICU, home care, and hospice. Chapters focus on the practical aspects of nursing care, including symptom assessment, patient teaching, family support, psychosocial aspects of palliation, and spiritual care. New to the fourth edition are chapters on the National Consensus Project for Quality Palliative Care Guidelines, palliative care of veterans, palliative care in rural settings, disaster situations, palliative care in Eastern Europe, and palliative care in the Philippines.

The first study guide for the CHPN® certification exam! This must-have study guide for nurses seeking to obtain Certified Hospice and Palliative Nurse (CHPN®) status provides state-of-the-art information about all aspects of this specialty. It features 300 carefully selected Q&As that offer a detailed rationale for each question, along with tips and strategies to promote exam mastery and frequently asked questions about the exam. Additional questions are arranged in chapters mirroring the exam blueprint and the number of questions for each category correlates with the exam matrix. Case-based scenarios embodied within the questions facilitate the application of knowledge in a problem-solving format. A complete practice exam is included as well. Brief topical reviews address hospice and palliative care nursing practice in all of its dimensions, including physical, spiritual, and psychosocial. The resource highlights information that forms the basis of end-of-life care, such as communication and family-centered care.

Additionally, high-level skills used by hospice and palliative care nurses, such as drug and dosage conversion and the use of infusion therapy, are covered as well. Key Features: Delivers the first study guide for hospice and palliative nurses seeking CHPN® certification Provides concise, up-to-date knowledge on all aspects of the specialty Includes information about the exam, answers to commonly asked questions, and tips and strategies for exam mastery Includes practice questions and answers following each chapter Provides a final comprehensive practice exam that offers 300 Q&As with detailed answer rationales that mirror the exam format Presents case-based scenarios within the questions that facilitate the application of knowledge

Palliative Care

A Concise Guide to End-of-Life Care

The Oxford Textbook of Palliative Social Work is a comprehensive, evidence-informed text that addresses the needs of professionals who provide interdisciplinary, culturally sensitive, biopsychosocial-spiritual care for patients and families living with life-threatening illness. Social workers from diverse settings will benefit from its international scope and wealth of patient and family narratives. Unique to this scholarly text is its emphasis on the collaborative nature inherent in palliative care. This definitive resource is edited by two leading palliative social work pioneers who bring together an array of international authors who provide clinicians, researchers, policy-makers, and academics with a broad range of content to enrich the guidelines recommended by the National Consensus Project for Quality Palliative Care.

Find out all you need to know about providing high-quality care to patients with serious illnesses from the 2nd edition of Palliative Care: Core Skills and Clinical Competencies. Drs. Linda L. Emanuel and S. Lawrence Librach, leaders in the field, address the clinical, physical, psychological, cultural, and spiritual dimensions that are integral to the care of the whole patient. They give you a broad understanding of the core clinical skills and competencies needed to effectively approach patient assessment, care of special populations, symptom control, ethical issues, and more. Clearly written in a user-friendly, high-yield format, this resource is your ultimate guidebook to the burgeoning practice of palliative medicine. Improve your pain management and symptom management skills with a better understanding of best practices in palliative care. Quickly review specific treatment protocols for both malignant and non-malignant illnesses, including HIV/AIDS, heart failure, renal failure, pulmonary disease, and neurodegenerative disease. Better understand and manage the common and unique challenges associated with delivering palliative care in various social settings, such as the ICU, hospice, and the home; and to diverse populations, such as children, elders, and vulnerable members of society. Expand your knowledge of palliative care issues with new chapters on Veterans, Special Populations, Prognostication, Delirium, Working with Families, Wound Care, Home Care, and Dealing with Economic Hardship. Find the information you need quickly and easily with a templated, high-yield format.

Nurses are already nurse managers. They must manage patient caseloads and care plans as well as supervise aides, technicians, and other care providers. But moving from this type of organic management to a defined nurse manager role is not a natural progression. Nurse managers must command a vast, diverse, and robust skill set, and those skills must first be defined, explained, and operationalized for success. In an environment that offers new managers little support, where do they turn? The Nurse Manager's Survival Guide (4th Ed.) provides an overview of a nurse manager's major roles and responsibilities—all the fundamentals needed for success in one easy-to-use, consolidated, practical reference. From tips on building the right team to budgeting basics, time-management tools, and advice on taking care of one's self (and their team), author Tina Marrelli supplies the resources nurse managers need to excel in day-to-day operations.

The Textbook of Interdisciplinary Pediatric Palliative Care, by Dr. Joanne Wolfe, et al., aims to inform interdisciplinary teams about palliative care of children with life-threatening illness. It addresses critical domains such as language and communication, symptoms and quality of life, and the spectrum of life-threatening illnesses in great depth. This comprehensive product takes a first-of-its-kind team approach to the unique needs of critically ill children. It shows how a collaborative, interdisciplinary care strategy benefits patients and their families. If you deal with the complex care of critically ill children, this reference provides a uniquely integrated perspective on complete and effective Apply interdisciplinary perspectives to provide the most comprehensive care. Care for patients and their families with an integrated approach designed to address physical, psychological, social, and spiritual needs. Focus on the self-care of clinicians in order to be more expert in direct patient care. Understand the importance of linking community palliative care with hospital-based palliative care. Access the full text online with regular updates along with a host of valuable resources such as education modules, research articles, patient handouts, and audio/visual materials. Implement consistent terminology for use by the entire palliative care team. Reflects the collaborative approach necessary to provide optimal care for children and their families

Cancer Pain

Certified Hospice and Palliative Nurse (CHPN) Exam Review

Oxford Textbook of Palliative Social Work

Oxford Textbook of Palliative Nursing

Hospice and Palliative Care

Originally published in 2001, the Textbook of Palliative Nursing has become the standard text for the field of hospice and palliative care nursing. In this new edition, the authors and editors have updated each chapter to ensure that the content is evidence-based and current references are included. They also have retained the important focus on case studies throughout the text and practical,

clinically-relevant tables, figures, and other resources. Like the previous edition, this text has an introductory section of the general principles of palliative care followed by a comprehensive section on symptom assessment and management encompassing twenty-one different symptoms. Other key sections include psychosocial support and spiritual care, providing holistic perspective on care of patients facing advanced disease. The text also includes an innovative section on special populations addressing those most in need of palliative care. The textbook is a useful resource for all nurses with the excellent section on end-of-life care across settings. In this new edition, the pediatric palliative care section has been greatly expanded and includes seven separate chapters on pediatric care. It includes a section on "special issues" addressing topics such as ethical considerations, nursing research, and public policy perspectives and concludes with a section presenting models of excellence including six international models. This edition also offers a narrative on dying based on a spouse's perspective. The text includes an appendix with an extensive list of resources for nurses in the field.

Written by experienced authorities from around the world giving a wider international perspective on palliative nursing, this substantially expanded new edition has been specifically adapted to reflect working practices within the NHS. All nurses especially those that are new to palliative care, and those working in other areas of health where palliative skills are required, will find this essential reading.

Handbook of Home Health Standards, Revised Reprint

Specifically designed to enhance your knowledge and skills within generalist palliative care, this informative textbook provides a comprehensive overview of the principle areas you may encounter whilst working with adult palliative and end-of-life patients, and their families. The development of the text has been backed by Macmillan Cancer Support and each chapter has been written by a range of specialist and generalist authors. The topics covered include approaches to palliative care and symptom management in a wide range of conditions and populations, with chapters linked to case studies to encourage interactive learning and understanding. Communication skills are also highlighted to help aid confidence when engaging in open and difficult conversations. The text is in line with Scottish Palliative Care Guidelines and the NES Framework for Palliative and End of Life Care. The book may either be used as course reading for relevant training programmes, such as the Enhanced Palliative Care course, as well as by healthcare professionals hoping to develop their skills and practice. It is aimed at anyone involved in management and prescribing within non-specialist palliative care, both in hospitals and in the community, including paramedics, nurses, doctors, pharmacists, and other key health professionals.

Hospice & Palliative Care Handbook, Third Edition

Hospice and Palliative Care for Companion Animals

Fundamentals of Nursing

Geriatric Practice

The Art and Science of Person-Centered Care

Improving Quality

This issue of Physician Assistant Clinics, guest edited by Donna Seton and Rich Lamkin, is devoted to Hospice and Palliative Care Medicine. Articles in this issue include: Introduction to Hospice and Palliative Care Medicine, The Role of the Physician Assistant in Hospice and Palliative Care Medicine, Breaking Serious News: Communication in Hospice and Palliative Care Medicine, Advance Care Planning and Goals of Care in Hospice and Palliative Care Medicine, Palliative Care and Spirituality, Prognostic Tools in Hospice and Palliative Care Medicine, Basics of Pain Management in Hospice and Palliative Care Medicine, Dyspnea in Hospice and Palliative Care Medicine, Gastrointestinal Symptoms in Hospice and Palliative Care Medicine, Psychiatric Issues in Hospice and Palliative Care Medicine, Pediatric Palliative Care Basics in Hospice and Palliative Care Medicine, and more.

Accessible and instructive, *Palliative Care* guides and inspires health social workers to incorporate palliative care principles into their current clinical practice. Through the lenses of environmental theory and intersectionality, rich case narratives highlight opportunities for social workers to enhance their work, advancing whole-person care in the face of serious illness. Chapters include questions to concretize ideas and demonstrate real-world application, while case narratives cover a range of settings, diagnoses, and populations. This book is a useful tool for educators, learners, and practicing social workers working with individuals and families navigating complex health care systems.

As a palliative medicine physician, you struggle every day to make your patients as comfortable as possible in the face of physically and psychologically devastating circumstances. This new reference equips you with all of today's best international approaches for meeting these complex and multifaceted challenges. In print and online, it brings you the world's most comprehensive, state-of-the-art coverage of your field. You'll find the answers to the most difficult questions you face every day...so you can provide every patient with the relief they need. Equips you to provide today's most effective palliation for terminal malignant diseases • end-stage renal, cardiovascular, respiratory, and liver disorders • progressive neurological conditions • and HIV/AIDS. Covers your complete range of clinical challenges with in-depth discussions of patient evaluation and outcome assessment • ethical issues • communication • cultural and psychosocial issues • research in palliative medicine • principles of drug use • symptom control • nutrition • disease-modifying palliation • rehabilitation • and special interventions. Helps you implement unparalleled expertise and global best practices with advice from a matchless international author team. Provides in-depth guidance on meeting the specific needs of pediatric and geriatric patients. Assists you in skillfully navigating professional issues in palliative medicine such as education and training • administration • and the role of allied health professionals. Includes just enough pathophysiology so you can understand the "whys" of effective decision making, as well as the "how tos." Offers a user-friendly, full-color layout for ease of reference, including color-coded topic areas, mini chapter outlines, decision trees, and treatment algorithms. Comes with access to the

complete contents of the book online, for convenient, rapid consultation from any computer.

Assessment and Management

"Psychosocial Issues in Palliative Care is for anyone working the field of palliative care, both in the community and in hospitals; this includes those in medicine, nursing, social work, chaplaincy, counseling, primary care, and mental health."--Jacket.

The Oxford Textbook of Palliative Nursing remains the most comprehensive treatise on the art and science of palliative care nursing available. Dr. Betty Rolling Ferrell and Dr. Judith A. Paice have invited 162 nursing experts to contribute 76 chapters addressing the physical, psychological, social, and spiritual needs pertinent to the successful palliative care team. Organized within 7 Sections, this new edition covers the gamut of principles of care: from the time of initial diagnosis of a serious illness to the end of a patient's life and beyond. This fifth edition features several new chapters, including chapters on advance care planning, organ donation, self-care, global palliative care, and the ethos of palliative nursing. Each chapter is rich with tables and figures, case examples for improved learning, and a strong evidence-based practice to support the highest quality of care. The book offers a valuable and practical resource for students and clinicians across all settings of care. The content is relevant for specialty hospice agencies and palliative care programs, as well as generalist knowledge for schools of nursing, oncology, critical care, and pediatric. Developed with the intention of emphasizing the need to extend palliative care beyond the specialty to be integrated in all settings and by all clinicians caring for the seriously ill, this new edition will continue to serve as the cornerstone of palliative care education.

Hospice and Palliative Care for Companion Animals: Principles and Practice offers the first comprehensive reference to veterinary hospice and palliative care, with practical guidance and best practices for caring for sick and dying animals. Presents the first thorough resource to providing veterinary hospice and palliative care Offers practical guidance and best practices for caring for sick and dying animals Provides an interdisciplinary team approach, from a variety of different perspectives Gives concrete advice for easing pets more gently through their final stage of life Includes access to a companion website with client education handouts to use in practice

The Oxford American Handbook of Hospice and Palliative Medicine and Supportive Care is an easily-navigable source of information about the day-to-day management of patients requiring palliative and hospice care. The table of contents follows the core curriculum of the American Board of Hospice and Palliative Medicine, thus meeting the educational and clinical information needs of students, residents, fellows, and nurse practitioners. Succinct, evidence-based, topically-focused content is supplemented by extensive tables, algorithms, and clinical pearls. This edition includes new sections on grief and bereavement, medical marijuana, and physician assisted suicide, and has been updated throughout to incorporate National Consensus Project for Quality Palliative Care Clinical Practice Guidelines.

Textbook of Interdisciplinary Pediatric Palliative Care

Building an Evidence Base

'The Textbook of Palliative Care Communication' is the authoritative text on communication in palliative care. Uniquely developed by an interdisciplinary editorial team to address an array of providers including physicians, nurses, social workers, and chaplains, it unites clinicians and academic researchers interested in the study of communication.

Oftentimes, documentation to prove hospice eligibility can be tricky. Generalization and lack of specific details can result in non payment or repayment of claims. My purpose in creating this pocket guide is to help nurses, physicians and other disciplines be able to accurately and thoroughly document hospice decline. Everything you need is at the drop of the hand in a small convenient size guide that can easily be carried with you anywhere.

Behavioral Intervention Research in Hospice and Palliative Care: Building an Evidence Base sets forth research considerations and guidelines to build evidence-based interventions to improve end-of-life care. It is an in-depth introduction to implementation research and showcases how a clinical need is identified to inform an intervention. The book extensively examines the various phases of intervention research, including design, implementation, evaluation, dissemination and translation. The book focuses on methodological, ethical and practical issues. The science behind the quality of hospice and palliative care lags behind that of traditional medical practice, despite the continuous growth of palliative care interdisciplinary teams.

Researching, developing and testing strategies is essential to advancing the effectiveness and value of this care. Informs readers how to conduct intervention research toward identifying best care Advises readers on design, implementation and evaluation of research Provides step-by-step templates to develop an intervention study Includes mock protocols from successful intervention trials Synthesizes lessons learned by established intervention researchers in hospice and palliative care

"I was thrilled to see content that focuses on quality improvement, patient safety, interprofessional collaboration, care coordination, and other content that supports the role of the AGNP as a clinical leader and change agent. The authors give these topics the attention that they deserve, with clear, insightful guidance

and importantly, the evidence base. The chapters that address roles (including during disasters!), settings of care, billing, and medication use address salient issues that will help the fledgling AGNP to hit the ground running and the seasoned AGNP to keep current. -Marie Boltz, PhD, GNP-BC, FGSA, FAAN Elouise Ross Eberly and Robert Eberly Endowed Professor Toss and Carol Nese College of Nursing, Penn State University

From the Foreword Written for Adult-Gerontology Primary Care Nurse Practitioners, faculty, and students, this primary text encompasses the full scope of AGNP primary care practice across multiple healthcare settings including telehealth. The text emphasizes the best available evidence to promote person-centered care, quality improvement of care, interprofessional collaboration, and reducing healthcare costs. The text delivers timely information about current healthcare initiatives in the U.S., including care coordination across the healthcare continuum, interprofessional collaboration, and accountable care organizations. Disease-focused chapters contain general and specific population-based assessment and interprofessional care strategies to both common and complex health issues. They offer consistent content on emergencies, relevant social determinants of health, and ethical dilemmas. The text also prepares students for the administrative aspects of practice with information on the physical exam, medications, billing, coding, and documentation. Concise, accessible information is supported by numerous illustrations, learning objectives, quality and safety alerts, clinical pearls, and case studies demonstrating best practice. A robust ancillary package includes an Instructor's Manual with case studies and teaching guides, a Test Bank reflective of clinical situations and patient conditions, PowerPoints covering key concepts, and an Image Bank of skin conditions and other figures. Key Features: Covers several key courses in the curriculum for ease of teaching/learning Embraces a broad population focus addressing specific care needs of adolescents through older adults Facilitates safe care coordination and reinforces best practices across various health care settings including telehealth Fosters understanding, diagnosis, and management of patients with multimorbid conditions Incorporates evidence-based practice information and guidelines throughout, to ensure optimal, informed patient care A robust ancillary package includes an Instructor's Manual, a Test Bank, PowerPoints, and an Image Bank. Using Evidence in Care
A Guide to Practice**

Trusted for its holistic, case-based approach, Fundamentals of Nursing: The Art and Science of Person-Centered Nursing Care, 10th Edition, helps you confidently prepare the next generation of nursing professionals for practice. This bestselling text presents nursing as an evolving art and science, blending essential competencies—cognitive, technical, interpersonal, and ethical/legal—and instilling the clinical reasoning, clinical judgment, and decision-making capabilities crucial to effective patient-centered care in any setting. The extensively updated 10th Edition is part of a fully integrated learning and teaching solution that combines traditional text, video, and interactive resources to tailor content to diverse learning styles and deliver a seamless learning experience to every student.

Nursing

Provides comprehensive, current information for addressing the physical, psychological, and spiritual needs of hospice patients and their families Substantially updated and expanded, the second edition of this quick-access reference for hospice nurses continues to deliver the most current information on the clinical and administrative duties of the hospice nurse. It encompasses important regulatory changes and milestones, providing timely information on cultural issues, special communication considerations, and hospice care's enduring growth. This resource provides new content on levels of care, assessment and symptom management, and occupational stress, burnout, and self-care. New treatment guidelines and algorithms are included, as are updates on quality measures, the reimbursement schedule, compliance initiatives, and electronic documentation with specific examples. An indispensable clinical resource, the book is a valuable reference for nurses who are seeking to specialize in hospice, those who work in long-term care settings, post-acute care settings, acute care setting, and those who are seeking to enhance their knowledge of end-of-life care within other specialties. New to the Second Edition: Includes new regulatory changes/milestones, such as The National Quality Forum New Priorities for Action 2019 Provides updated information about levels of care, particularly the Last 7 Days rule from Medicare Covers the use of cannabis, non-pharmacological pain management interventions, care of the dying patient, and post-mortem care New chapters are included on the hospice nurse's role as case manager, patient discharge, religious and cultural influences on end-of-life care, pain assessment and interventions, wound care, care of the dying patient, and post-mortem care. Key Features: Reflects key competencies for the hospice nurse as designated by the Hospice and Palliative Nurses Association Delineates clinical and administrative responsibilities of the hospice nurse Simplifies complex information such as Medicare regulations and compliance Provides screening tools for depression, anxiety, and wound risk Includes the Palliative Performance Scale and the Karnofsky Performance Scale Serves as a concise
