How to Make Your Garden Grow

Vertical Gardening

Growing flowers from seed is one of the easiest and cheapest ways to supplement your borders, bringing instant color to tired gardens. Many of these flowers are also ideal for cutting. Within a single growing season you can produce armfuls of beautiful blooms to cut and bring inside the house. Author Clare Foster and photographer Sabina Rüber have been experienced with growing flowers from seed for several years. In this book they pass on that invaluable experience, explaining how and when to sow and grow a huge range of flowers from Zinnia.

Russell Page, one of the legendary gardeners and landscapers of the twentieth century, designed gardens great and small for clients throughout the world. His memoirs, born of sketching, designing, and working on site, are a mixture of engaging personal reminiscence, keen critical intelligence, and practical know-how. They are not only essential reading for gardeners, but a master's compelling reflection on the deep sources and informing principles of his art. The Education of a Gardener offers charming, sometimes pointed anecdotes about patrons, colleagues, and, of course, gardens, together with lucid advice for the gardener. Page discusses how to plan a garden that draws on the energies of the surrounding landscape, determine which plants will do best in which setting, plant for the seasons, handle color, and combine trees, shrubs, and water features to rich and enduring effect. To read The Education of a Gardener is to wander happily through a variety of gardens in the company of a wise, witty, and knowledgeable friend. It will provide pleasure and insight not only to the dedicated gardener but to anyone with an interest in abiding questions of design and aesthetics, or who simply enjoys an unusually well-written and thoughtful book.
