

How To Grade English Papers Quickly

Grading is one of the most hotly debated topics in education, and grading practices themselves are largely based on tradition, instinct, or personal history or philosophy. But to be effective, grading policies and practices must be based on trustworthy research evidence. Enter this book: a review of 100-plus years of grading research that presents the broadest and most comprehensive summary of research on grading and reporting available to date, with clear takeaways for learning and teaching. Edited by Thomas R. Guskey and Susan M. Brookhart, this indispensable guide features thoughtful, thorough dives into the research from a distinguished team of scholars, geared to a broad range of stakeholders, including teachers, school leaders, policymakers, and researchers. Each chapter addresses a different area of grading research and describes how the major findings in that area might be leveraged to improve grading policy and practice. Ultimately, Guskey and Brookhart identify four themes emerging from the research that can guide these efforts: - Start with clear learning goals, - Focus on the feedback function of grades, - Limit the number of grade categories, and - Provide multiple grades that reflect product, process, and progress criteria. By distilling the vast body of research evidence into meaningful, actionable findings and strategies, this book is the jump-start all stakeholders need to build a better understanding of what works—and where to go from here.

Grading papers is a fact of life, especially in English classrooms, and the paper load is a leading cause of teacher burnout. Fortunately, Carl Jago's here to help, and in "Papers, Papers, Papers," she offers you advice honed from thirty-one years in the English classroom and forty-five thousand papers worth of grading.

An English Teacher's Guide to More Meaningful Grading

In 1940, the nation hovers on the brink of World War II, and a small and fearful six-year-old trembles on the brink of first grade at St. Marys School, Elgin. He will find himself plunged into a world of mystery, guided by white-robed nuns who speak a mysterious language and live in a separate world from ordinary people. He will become steeped in the liturgy and language of the Catholic Church as it presented itself at the time, and come to feel set apart from the non-Catholics and special, but not always in a good way. Charging into adolescence cars and girls and algebra he joins the St. Edward High School Green Wave (if only as a manager,) develops attitudes and a kind of identity if only as a class clown,) sets his sights on Notre Dame University and thinks about the priesthood, but not yet. And he works at the Bordons Ice Cream Factory and the Elgin Daily Courier News and Barnetts Junior Miss store and Edwards Jewelers but none of these venues give him a clue as to his future.

An Elgin Memoir:

Proven Methods for Middle and High School Classrooms

Backed by solid research, *Writing Instruction That Works* answers the following question: What is writing instruction today and what can it be tomorrow? This up-to-date, comprehensive book identifies areas of concern for the ways that writing is being taught in todays secondary schools. The authors offer far-reaching direction for improving writing instruction that assist both student literacy and subject learning. They provide many examples of successful writing practices in each of the four core academic subjects (English, mathematics, science, and social studies/history), along with guidance for meeting the Common Core standards. The text also includes sections on Technology and the Teaching of Writing and English Language Learners.

Now in its second edition, How to Read Texts introduces students to key critical approaches to literary texts and offers a practical introduction for students developing their own critical and close-reading skills. Written in a lively, jargon-free style, it explains critical concepts, approaches and ideas including: - Debates around critical theory - The role of history and context - The links between creativity and criticism - The relationship between author, reader and text. The new edition now includes guidance on analysing a range of multi-media texts, including film and online media as well as the purely literary. In addition to new practical examples, readings, exercises and 'checkpoints' that help students to build confidence in their own critical readings of both primary and secondary texts, the book now also offers guidance on writing fully-formed critical essays and tips for independent research. Comprehensively updated and revised throughout, How to Read Texts is an indispensable guide for students making the transition to university study.
