

How To Improve Your Academic Writing Rhs Intranet

This title is a comprehensive study skills and personal development guide, incorporating coverage of personal skills, academic skills and job search skills within the framework of personal development planning.

With its friendly, step-by-step format, Becoming an Academic Writer by Patricia Goodson helps writers improve their writing by engaging in deep and deliberate practice—the type of practice adopted by expert performers in areas such as sports or music. Featuring 50 exercises, this practical, self-paced guide is flexibly organized so readers can either work their way through all of the exercises in order or focus on the specific areas where they need additional practice building their skills. The Second Edition is enhanced by a new appendix on literature review, new feature boxes, and new chapter summaries.

If you want to improve your grades, and become a better student, then check out HowExpert Guide to Study Skills. Students are under more pressure than ever to perform well in the classroom, write flawless papers, and excel during testing. Sadly, many students struggle in school because they do not know how to succeed in the academic environment. This book speaks to give students the tools they need to succeed. Written by an experienced tutor, this book examines 101 lessons every student needs to be successful. Academic success is not just about taking the right classes; it's also about using the right skills and structures to organize and streamline your learning process. This book examines every aspect of student life, taking you from the beginning of the class through your final special projects. Students are encouraged to be a planner and are taught how to use it to increase their productivity and success significantly. They are also taught how to take an active part in their education with lessons on the T-zone in classrooms and on nine study skills proven effective through experience. Readers are then taught how to write and speak effectively by managing their information and organizational structures, and they learn key test-taking strategies and tips for managing test anxiety. This book delves into the specifics that every student needs to succeed in their academic ventures, giving them the tools and the support they need to be truly successful. Check out HowExpert Guide to Study Skills now! About the Expert Sarah Fantinel has been a tutor of all ages for five years. She enjoys helping students discover their academic potential and has helped many students improve their grades and pass various standardized tests, including the ACT and the teacher test. Sarah first started tutoring in college because she wanted to help her peers be successful, and tutoring has allowed her to celebrate the little victories of life with her students. Having degrees in both English and Humanities, Sarah currently lives in Arkansas with her dog and sixteen-year-old cat. When she is not writing or tutoring students, Sarah likes to take walks and explore new burger restaurants. HowExpert publishes quick 'how to' guides on all topics from A to Z by everyday experts.

Discusses intelligence, the brain, reading skills, note-taking, techniques for specific subjects, writing, speeches, test-taking, and other methods for academic success

Writing academic prose in English is especially difficult for non-native speakers, largely because the standard vocabulary used in this genre can be quite different from colloquial English. Expand Your English: A Guide to Improving Your Academic Vocabulary is a unique and invaluable guide that will enable the reader to overcome this hurdle. It will become the favourite go-to reference book for both beginners and for intermediate learners struggling with the complexities of English-language academic writing. Steve Hart covers 1,000 vocabulary items that are essential for good academic writing. The first section describes 200 key terms in detail, grouping them into logical sets of 10. Through careful repetition, the reader will find it easy to retain, retrieve, and reuse these essential phrases. The second section explains a further 800 terms, grouping them according to function, meaning, and the areas of an essay where they are likely to be used. The expansive scope of Expand Your English gives non-native speakers all the vocabulary tools they need to master this difficult style of writing.

Designed to enable non-native English speakers to write science research for publication in English, this book is intended as a do-it-yourself guide for those whose English language proficiency is above intermediate. It guides them through the process of writing science research and also helps with writing a Master's or Doctoral thesis in English

"Contains material adapted from The everything guide to study skills, by Cynthia Clucke Muchnick."—T.P., verso.

Help your students take control of their university experience, one step at a time. In Be Well, Learn Well, Gareth Hughes explores the different dimensions of student wellbeing (physical, psychological, social and academic) and helps students understand the connection between their wellbeing and academic performance. Be Well, Learn Well begins by considering the impact of factors such as diet, exercise, hydration, sleep and sunlight on learning, before examining how 'deep' learning can improve wellbeing. Subsequent chapters help students create meaningful approach exams, presentations and group projects with confidence. The final chapter challenges unhelpful narratives around career trajectories and helps students to take small, manageable steps towards their goals. This inspirational guide by the lead author of the UK'sUniversity Mental Health Charterwill empower students of all disciplines to study more effectively, feel calmer and take control of their time at university.

Available as an E-inspection Copy! Go here to order Grappling with grammar? Struggling with punctuation? Whether you're writing an essay or assignment, report or dissertation, this useful guide shows you how to improve the quality of your work at university – fast – by identifying and using the correct use of English grammar and punctuation in your academic writing. In this book, authors discuss research and theory on the social psychological forces that shape academic achievement. A key focus is to show how psychological principles can be used to foster achievement and make schooling a more enjoyable process. Topics are highly relevant to both social and educational psychology, with discussions of core concepts such as intelligence, motivation, self-esteem and self-concept, expectations and attributions, prejudice, and interpersonal and intergroup relations.

Turbocharge Your Education. Are you a parent of a student, or a student, who is in grades K-12 and at the university level and you are interested in boosting your grades, and making your work load easier, and getting more school work done in less time? Are you finding it difficult to stay focused and motivated during and after classes? Are there things relating to school that you find frustrating to do and difficult to understand while other students make it seem like it is a breeze to do? There might be a reason for this. Why? because they have a system! You have poor academic performance because they hand in homework assignments late or incomplete, or they do not fully understand the subject matter being taught during class or they get low or failing test grades, and they do not raise their hand in class because they are embarrassed that they might have the wrong answers because they did not have organized notes. School is hard. Students are often overloaded with a wide range of subjects, tests, quizzes and papers and other projects, with different types of assignments, with different teachers with different grading rubrics to be aware of, classrooms and class schedules, and many, many more things that could make a student's life difficult. The book MAXIMUM EDUCATION makes education easy so you can reach your academic potential. Get yourself into the systematic habit of doing things the most productive and efficient way that cuts out any unnecessary distractions. Save time by having a solid system that is geared towards SUCCESS. Many students are not following ANY system and therefore are having to overload their mind and become confused, frustrated and overwhelmed. This is the exact same system that I have taught to use in their every day success routine that has lead them to "make the grade" how does it work? In this book you will learn time management and information management systems. You will learn how to manage your notes and always know what to study so you can get excellent grades. Learn to manage your time and get more free time. Review over 50 techniques and skills including note taking, outlining, test preparation, essay writing and subject writing essays, and much more. You will have access to over 25 videos that support all of the system and techniques that you will learn in Maximum Education. You also get access to the mAKE the grade community where you have opportunity to ask questions and get answers and interact with Dr. Greene and other students. Student testimonials are available on the mAKE the grade community page. Do not hesitate. Get your FREE membership of mAKE the grade community and get your questions answered in real time by getting it that reinforce the teachings of this book. You will change the course of your education and you will love how much fun and easy being a student will get. Buy it now as a gift for your kids or a great tool for yourself and watch how quickly your academic life will improve!

Study Less, Improve Your Grades and Enjoy Everlasting Academic Success

The advanced English vocabulary covered in this book can be used to help improve your academic writing, speaking and reading, up to and including Ph.D. level.

Good writing skills and habits are critical for scholarly success. Every article is a story, and employing the techniques of effective storytelling enhances scholars' abilities to share their insights and ideas, increasing the impact of their research. This book draws on the tools and techniques of storytelling employed in fiction and non-fiction writing to help academic writers enhance the clarity, presentation, and flow of their scholarly work, and provides insights on navigating the writing, reviewing, and coauthoring processes.

Nowadays, society is constantly changing, and new ways of life are being developed by due to nonstop technological advancements. This generates changes in family, schools, the media, etc. New technologies are creating virtual environments to manage learning and academic achievement, and this is a new challenge to approach formal and informal education. In the last few decades, teachers, families, and educational administrators had very well-defined fields of action and roles to play. Now, these roles are disfigured, and influences from all agents are arguable and more difficult to face. At this current stage, problems sometimes appear that require different forms of intervention. Some of the problems are violence towards people; child abuse; drug abuse at increasingly early ages; integration problems due to immigration; dropping out of school; and typical problems related to student development, personality, disabilities, social and psychical maladjustment, teenagers socioaffective relationships, etc. Research on school success and failure has a long history, but there is still no agreement concerning the prevalence of these variables to explain academic achievement, the relationship between those variables, and which other variables modulate their level of impact. For many years, cognitive psychology has emphasized cognitive function as the most relevant for learning in school. However, recent studies highlight the importance of motivational and affective functions in building consistent models to explain learning and academic achievement. This change of perspective, from the classical cognitive model to a self-regulated learning model, has implied a new orientation in the research of the factors involved in school success and failure. Self-regulated learning models try to integrate students cognitive, socioaffective, and behavioral aspects. These models describe the different components involved in successful learning at all school stages, explaining reciprocal relationships between those components and directly relating learning to personal achievement, motivation, volition, and emotions. With this new paradigm, students not only contribute to strengthening their intelligence, but also their motivational and emotional qualities, all related to achieving personal balance. This book presents studies, ideas, and recommendations to shed light on the complex educational world. Education has limits and difficulties, but it is also the only instrument that can develop students potential into personal success.

This insightful book considers the challenges faced by researchers pursuing an academic career. From applying for grants to supervising PhD students, it utilises practical research and real experiences to illustrate how marketing scholars can strike a healthy working balance between teaching and research to find success in academia.

Getting Smart

Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

A comprehensive look at the promise and potential of online learning in our digital age, students have dramatically new learning needs and must be prepared for the idea economy of the future. In Getting Smart, well-known global education expert Tom Vander Ark examines the facets of educational innovation in the United States and abroad. Vander Ark makes a convincing case for a blend of online and onsite learning, shares inspiring stories of schools and programs that effectively offer "personal digital learning" opportunities, and discusses what we need to do to remake our schools into "smart schools." Examines the innovation-driven world, discusses how to combine online and onsite learning, and reviews "smart tools" for learning Investigates the Lives of Learning professionals, outlines the new employment bargain, examines online learning, and discusses how to make the case for smart capital, advocates for policies that create better learning, studies smart cultures

This concise and practical text will equip students with the effective reading strategies they need when preparing for their university assessments. It dispels assumptions often made about the nature of reading at university, and provides an overview of the culture of academic reading, note-making, and what markers expect. This text provides support for reading structured around the process of crafting an assignment, including reading critically and developing an academic voice.

If you want to know how to perfect your reading and writing skills and turn these skills into a potential partner towards your academic and university success, read on From mastering your reading skills to polishing your writing ability, this book aims at improving your grasp over the language and also helping beginners take the first step towards effective usage of English. This book has been written to appeal to Language learners of all levels, and it will serve as a guide to you in every step of the way. If you want to improve your everyday communication with some quick yet authoritative information, then this book fits the description perfectly. The tips mentioned in every chapter will help you express yourself fully and also read all those books that you have in your bucket list. You will seamlessly navigate through the pages of these books in no time. No matter how tricky the language is, with time, you will overcome the struggles you were facing before. So, here are some of the key takeaways that you will learn from this book: - Speed-reading and speed-writing skills - How to structure your ideas properly into essays - Know the different styles of writing that are present in the English Language - Different forms of punctuation and their usage with proper examples - A step-by-step approach to writing different documents - Effective methods for comprehension - Learn simple visualization exercises for better reading Even if you have always avoided learning the different aspects of English Grammar, this book will be your guidebook as it is written in the simplest way possible. All the lessons are arranged in a progressive manner so that none of it seems too overwhelming for you. If you follow the steps mentioned in this book, diligently, your reading and writing skills will improve dramatically. You will learn to write effective emails and you no longer have to rely on others for your resume. If your job requires you to do things like making reports and writing letters, then those tasks would seem easier too. Your text will have a better structure and your employer might just give you a raise based on the effort that you have places in enhancing these skills. You will no longer depend on filler words or sentences to stretch your letters but learn to be concise yet informative. You will learn to replace your old, weak words with stronger and more impactful ones. With time, you will no longer find it difficult to come up with catchy headlines. You will learn how you can infuse your personality into your writing so that your employer or anyone reading it can understand your personality. Even if you had any mistakes in your concepts before, this book will clarify them and give you a better understanding of how you can improve your reading and writing skills within a short period of time. Once you have completed the book, you will get rid of the problems of wordiness or lack of cohesion. You will read and write smoothly, and with all that, your vocabulary will be enhanced too.

THE STUDENT EQEDGE Facilitation and Activity Guide This Facilitation and Activity Guide is a companion tothe book The Student EQ Edge: Emotional Intelligence and YourAcademic and Personal Success . It offers faculty andfacilitators a hands-on resource for helping students reach theirpotential by tapping into the power of emotional intelligence. TheFacilitation Guide includes exercises and activities whicare designed to help students develop confidence, independence, theability to set and meet goals, impulse control, socialresponsibility, problem-solving skills, stress tolerance, and muchmore—all of which help improve academic success. The Guidealso contains a wealth of illustrative case studies, questions forstudent reflection, movie selections and TV shows that illustratemeotional intelligence, and a self-development plan. "The single best resource on emotional intelligence in studentaffairs, The Student EQ Edge: Student Workbook andFacilitation and Activity Guide are well organized,creative, and offer everything an emotional intelligencefacilitator would need in a fast-paced student affairs environment. The examples are soundly constructed and resonate with students.These materials are my go-to resources."—Candice Johnston,associate director of student leadership and organizations, WakeForest University"If I were building a new course to improvestudent success, it would be founded on emotional intelligence. Allthe instruction in the world on 'study skills' cannot touch theadvantages that come to students who are able to manage theiremotional intelligence. And the best news of all is that theseskills can be taught. EQ skills make the difference." —RandyL. Swing, executive director, Association for InstitutionalResearch "This Facilitation and Activity Guide is particularlyuseful, offering options from which the facilitator can draw inpreparing assignments or learning community meetings. The focus onlearners' needs, and particularly an authentic exploration of selfand purpose, is practical yet has the potential to draw students too deeper understanding of self that will draw them to highperformance and contribution to others."—Dennis Roberts,assistant vice president for faculty and student services for theQatar Foundation

Many people don't understand what critical thinking is. Moreover, not all the ones that do, apply it in their daily lives. Politics, the media, and so many other aspects of society show how small the number is of people who use their brains. Critical thinking means, among others, that you look at multiple sides of a controversial topic, that you can stay objective and put away your biases until you have reached a firm conclusion based on verifiable facts. This skill is highly valuable in job interviews, relationships, and everyday life. In order to improve your critical thinking skills, it would be best to adopt the best practices that help you accomplish this task. In other words, some things help you develop this skill, others are a waste of time and effort, or even worse, go against it and cause a degeneration of your intellect and open-minded attitude. Find out today what you can do to become a more intelligent, critical thinker.

Powerful behavioral interventions to help your students succeed Behavioral problems can disrupt learning for the whole classroom if not managed properly, which is often a matter of frustrating trial and error. This must-have guide delivers a set of fifteen practical intervention techniques that can be applied to virtually any situation in both pull-out and inclusive classrooms. Backed by research and case studies, each chapter is brief and to the point with a focus on one behavioral intervention technique. Insights include: Incorporating student interests in classroom activities Understanding the reason the student is misbehaving to plan an appropriate intervention Understanding how stimulation impacts performance

Do you feel like you spend way more time studying than you should or even want to? Truth is, many students do! Of those who don't, very few know how to use the small amount of time they do study to help them achieve the grades they are after. In either case, this book will help you overcome any obstacles you face when it comes to spending less time studying while also improving your grades. The techniques suggested in this book have been used by Despina Gavovyannts and countless other students she has worked with to achieve great academic success. Despina went from failing to placing in the top 4% of the state in less than five months, and in her final year of high school nonetheless. Using the methods she describes in this book, you can also achieve the same, if not completely surpass these results. That's what study hacking is all about. This is the book for you if you find that you: - Are uncertain about what to do after you finish school - Know you have bad habits which are preventing you from succeeding - Struggle to be organised or to manage your time - Find that you get stressed out by upcoming exams, university applications or the thought of what to do once you finish school Going well in school can be a tough process. Becoming a study hacker will make your success in this process as effortless and as easy as possible!

Elegant ideas deserve elegant expression. Sourd dispels the myth that you can't get published without writing wordy, impersonal prose. For scholars frustrated with disciplinary conventions or eager to write for a larger audience, here are imaginative, practical, witty pointers that show how to make articles and books enjoyable to read—and to write.

Regardless of income, social status, or ethnicity, parents everywhere are concerned about their children's academic performance. We all want our children to reach their academic potential. We all seek the peace of mind that comes with knowing our children are learning and mastering all the skills necessary for academic competence. In Boost Your Child's Academic Success, author Dr. Marshena McCoy-Williams offers a series of recommendations for empowering children's learning capabilities. The founder of Smart Kids PLC, a tutoring and learning center in Greensboro, North Carolina, that provides academic services to public, private, and home-schooled children and their parents, she gives strategies parents can apply to improve their children's academic performance. Designed for individuals from diverse ethnicities, cultures, socioeconomic strata, and family structures, the ideas can be mixed, matched, and modified to fit specific circumstances. Many of the recommendations and strategies are based on research in education, pedagogy, medicine, nutrition, and cognition. Some are traditional and others are nontraditional. Some activities cost money and some don't, but each directly or indirectly helps develop intellectual and/or academic abilities. Boost Your Child's Academic Success provides a range of options from which parents can select to create a holistic and focused plan of action to improve their child's academic experience and performance.

Academic Writing with Corpora offers a step-by-step accessible guide to using concordancers and aims to help introduce data-driven learning into the academic English classroom. Addressing the challenges faced by EAP teachers when explaining to their students how to write 'naturally', this book provides a solution to the problem by placing an emphasis on learning from expert and proficient writing. In doing so, it takes a highly practical approach: uses Lextutor, an easy-to-use, open access concordancer, whilst introducing students to tools, such as SKELL, MICUSP and BMC-English Corpora; fosters autonomous learning by demonstrating how to solve everyday difficulties in word choice and grammar; helps teachers to use corpora in teaching proficient writing and helps students to improve their academic writing by learning from the best examples in their field; guides students towards better awareness of the communicative side of academic writing. This book forms essential reading for all students on academic writing and EAP courses or who wish to improve their writing.

Improving Academic Achievement

In the course of working with students across various disciplines, Claire Odogbo realized that many students have problems with their studies because they do not understand the basic principles of learning. Most teenagers and young adults in our schools and institutions of higher learning do not know how to learn. They are used to simply memorizing things without understanding them, and then providing the memorized information as their answers to relevant questions asked in tests and examinations. Such a learning method creates a very weak foundation for true learning and development, as it does nothing to improve the learner. Learning to Learn is an attempt to correct this problem and aid those who really wish to learn, along the path of true learning, to attain self-development and higher achievements in life. This manual is designed as a handbook for the person who wants to be a more effective learner. Anyone who wishes to benefit from it must constantly refer to it in order to effectively implement the principles and ideas presented herein. This work is designed for easy reading and comprehension by persons in the seventh grade and higher, hence the author has refrained from delving too deep into the intricacies involved in learning.

This engaging and highly regarded book takes readers through the key stages of their PhD research journey, from the initial ideas through to successful completion and publication. It gives helpful guidance on forming research questions, organising ideas, pulling together a final draft, handling the viva and getting published. Each chapter contains a wealth of practical suggestions and tips for readers to try out and adapt to their own research needs and disciplinary style. This text will be essential reading for PhD students and their supervisors in humanities, arts, social sciences, business, law, health and related disciplines.

Is a career as a professor the right choice for you? If you are a graduate student, how can you clear the hurdles successfully and position yourself for academic employment? What's the best way to prepare for a job interview, and how can you maximize your chances of landing a job that suits you? What happens if you don't receive an offer? How does the tenure process work, and how do faculty members cope with the multiple and conflicting day-to-day demands? With a perpetually tight job market in the traditional academic fields, the road to an academic career for many aspiring scholars will often be a rocky and frustrating one. Where can they turn for good, frank answers to their questions? Here, three distinguished scholars—with more than 75 years of combined experience—talk openly about what's good and what's not so good about academia, as a place to work and a way of life. Written as an informal conversation among colleagues, the book is packed with inside information—about finding a mentor, avoiding pitfalls with a dissertation, negotiating the job listings, and much more. The three authors' distinctive opinions and strategies offer the reader multiple perspectives on typical problems. With rare candor and insight, they talk about such tough issues as departmental politics, dual-career marriages, and sexual harassment. Rounding out the discussion are short essays that offer the "inside track" on financing graduate education, publishing the first book, and leaving academia for the corporate world. This helpful guide is for anyone who has ever wondered what the fascinating and challenging world of academia might hold in store. Part I - Becoming a Scholar * Deciding on an Academic Career * Entering Graduate School * The Mentor * Writing a Dissertation * Landing an Academic Job Part II - The Academic Profession * The Life of the Assistant Professor * Teaching and Research * Tenure * Competition in the University System and Outside Offers * The Personal Side of Academic Life

Are you confused by the feedback you get from your academic teachers and mentors? This clear and accessible guide to decoding academic feedback will help you interpret what your lecturer or research supervisor is really trying to tell you about your writing--and show you how to fix it. It will help you master a range of techniques and strategies to take your writing to the next level and along the way you'll learn why academic text looks the way it does, and how to produce that 'authoritative scholarly voice' that everyone talks about. This book is an easy-to-use resource for postgraduate students and researchers in all disciplines, and even professional academics, to diagnose their writing issues and find ways to fix them. This book would also be a valuable text for academic writing courses and writing groups, such as those offered in doctoral and Master's by research degree programmes. Whether they have writing problems or not, every academic writer will want this handy compendium of effective strategies and sound explanations on their book shelf--it's a must-have! offered in doctoral and Master's by research degree programmes. Whether they have writing problems or not, every academic writer will want this handy compendium of effective strategies and sound explanations on their book shelf—it's a must-have! Pat Thomson, Professor of Education, University of Nottingham, UK

This memory transforming book is a guide to study, learn and remember which leads to academic success after the students' examination. It also encompasses techniques used for training memory for workers (skilled and unskilled workers) for their works that require remembrance of the work procedures. It is birthed out of personal experiences and teaching experiences in high schools, colleges and universities for

academic success.It enables students and workers (scholars) to activate, train and use their memory power in the cerebrum of brain for academic excellence and work procedures proficiency. It describes the types of memories, functions of the types of the memories and the specific memory that can be trained for retaining information. It also describes foods, fruits and oils that boost human memory and diets (food and

drinks) that retard memory. It describes how to develop fast reading skills used for effective comprehension and retention of the information in the permanent memory. These fast reading skills were used by Former United States of American president called John F. Kennedy to read and understand 1,200 words per minute.In this book, I established a fact that no student is a dullard if he or she practices these practical

guides on how to study and remember. This book teaches students the study habits that boost memory, study habits that retard memory, psychological warfare responsible for memory loss and proven principles used for achieving academic excellence. This book is a panacea to all types of memory loss. It also enumerates the types of study wont and technique used to learn very fast and retain properly in the permanent

memory.The secrets of the academic success of the scholar geniuses are ninety-nine percent trained retentive memories and one percent inspiration. This book describes the secret skill of trained retentive memory used by a genius called Lucius Cornelius Scipio to remember the names of all the people in Rome. As a scholar or student, you can easily memorize the encyclopedia or all your text books if you thoroughly

practice all the studying and learning guides in this book. This book highlights how to learn and never forget and how to train a retentive memory. It describes various advanced study methods which include Pigeon rote, Fox hunt and memory bank which guarantee permanent memory of the studied information. It narrates the types of fast learning techniques like parrot short story and various memory training techniques

used for fast learning without forgetting.

There is no country or economy participating in PISA 2012 that can claim that all of its 15-year-old students have achieved a baseline level of proficiency in mathematics, reading and science. Poor performance at school has long-term consequences, both for the individual and for society as a whole. Reducing the number of low-performing students is not only a goal in its own right but also an effective way to improve

an education system's overall performance - and equity, since low performers are disproportionately from socio-economically disadvantaged families. Low-performing Students: Why they Fall Behind and How to Help them Succeed examines low performance at school by looking at low performers' family background, education career and attitudes towards school. The report also analyses the school practices and educational

policies that are more strongly associated with poor student performance. Most important, the evidence provided in the report reveals what policy makers, educators, parents and students themselves can do to tackle low performance and succeed in school.
