

How To Make Paper Trumpets

The Really Useful Book of Science Experiments contains 100 simple-to-do science experiments that can be confidently carried out by any teacher in a primary school classroom with minimal (or no!) specialist equipment needed. The experiments in this book are broken down into easily manageable sections including: *It's alive: experiments that explore our living world, including the human body, plants, ecology and disease* *A material world: experiments that explore the materials that make up our world and their properties, including metals, acids and alkalis, water and elements* *Let's get physical: experiments that explore physics concepts and their applications in our world, including electricity, space, engineering and construction* *Something a bit different: experiments that explore interesting and unusual science areas, including forensic science, marine biology and volcanology. Each experiment is accompanied by a 'subject knowledge guide', filling you in on the key science concepts behind the experiment. There are also suggestions for how to adapt each experiment to increase or decrease the challenge. The text does not assume a scientific background, making it incredibly accessible, and links to the new National Curriculum programme of study allow easy connections to be made to relevant learning goals. This book is an essential text for any primary school teacher, training teacher or classroom assistant looking to bring the exciting world of science alive in the classroom.*

*Sunday, 3 September 1939: the dawn of a new conflict that would engulf the world, following the words of Prime Minister Neville Chamberlain: 'This country is at war with Germany'. By the time World War II ended in 1945, nearly half a million people from Britain and its empire had lost their lives, and the world had changed forever. Eighty years on, a look back at the lives of British people in September 1939 reveals a very different world from the one we know today. Unprecedented hardship lay ahead for a country where free healthcare for all was unknown: strict rationing of food and petrol, conscription for both sexes, and personal tragedy year after year amidst the chaos of Britain's bombed out cities and ports. What was it really like to be living in Britain in September 1939? *The Day the War Broke Out* is a fresh insight into the hearts and minds of a nation on that fateful day. With exclusive personal interviews, untold stories, wartime diaries and newspaper reports, it reveals the innermost fears and hopes of a society on the brink of war: through the eyes of young mothers fearful for their families, bewildered children painfully cut adrift from loved ones, and men of all ages, many now facing combat for the second time in their lives. These are personal, intimate snapshots from eighty years ago - when the entire world, virtually overnight, seemed to have been turned upside down - and of how a nation faced this new world with courage, humour and stoicism.*

Musical Opinion and Music Trade Review

Ludwig van Beethoven, one of the most influential composers of all time, is brought vividly to life and made relevant to todays young musicians in Beethoven for Kids. Children will learn about Beethovens troubled childhood and family life, early gift and passion for music, volatile personality, championing of equality and freedom, and persistence in his work despite increasing hearing loss. The great musicians, thinkers, and movements of Beethovens time, from Mozart and Haydn to the bold new ideas of the Enlightenment, are presented and their profound effect on the composer's life and music explained. Twenty-one engaging activities, including singing musical variations, dancing a Viennese waltz, creating an operatic diorama, and making a model eardrum, illuminate Beethovens life, times, and work. A time line, a glossary, online resources, and recordings and reading lists for further listening and study round out this comprehensive resourca.

Visit us online at www.1stWorldLibrary.ORG - - The present tale is founded more largely on testimony - oral and written - than any other in this series. The external incidents which direct its course are mostly an unexaggerated reproduction of the recollections of old persons well known to the author in childhood, but now long dead, who were eye-witnesses of those scenes. If wholly transcribed their recollections would have filled a volume thrice the length of 'The Trumpet-Major'. Down to the middle of this century, and later, there were not wanting, in the neighbourhood of the places more or less clearly indicated herein, casual relics of the circumstances amid which the action moves - our preparations for defence against the threatened invasion of England by Buonaparte. An outhouse door riddled with bullet-holes, which had been extempo-rized by a solitary man as a target for firelock practice when the landing was hourly expected, a heap of bricks and clods on a beacon-hill, which had formed the chimney and walls of the hut occupied by the beacon-keeper, worm-eaten shafts and iron heads of pikes for the use of those who had no better weapons, ridges on the down thrown up during the encampment, fragments of volunteer uniform, and other such lingering remains, brought to my imagination in early childhood the state of affairs at the date of the war more vividly than volumes of history could have done.
