country invites us to turn our attention to the historical context from which that demand originates. Repair takes up that invitation, offering a detailed account of the circumstances that surrounded the emancipation of enslaved African Americans in two unique contexts, the Sea Islands of South Carolina and Davis Bend, Jefferson Davis' former plantation outside Vicksburg, Mississippi. Repair makes the case for racial reparations in the United States by returning to a time at the end of slavery when many formerly enslaved

people were provided land explicitly as a form of reparation, yet after President Abraham Lincoln was assassinated that land was stolen back from freed people and given to former slave owners. Thus begins a complicated and volatile fight for justice for Black Americans who have had to demand retribution for the crime of slavery in the US.

Smartiepants will teach the computer challenged person or senior how to diagnose and repair over 85% of all computer problems without requiring the assistance of a computer store or technical guru. This book was written by a Computer Store owner whose stores have serviced over 50,000 computers, tablets, phones and monitors since 1988. No technical expertise is necessary to follow the instructions provided. The reader will learn the "Three Golden Rules" for staying out of computer trouble, how to diagnose any problem (not just computers) and how to recover when a computer

to give them the very best, but with the press of the many demands of ministry, sometimes that is difficult to do. And if you're like me, you prefer writing your own sermons because you have a special connection with your congregation that is hard to reach through a message someone else has written. In other words, no one knows your people like you do! Our new Pulpit Outline Series gives you a starting point - a sermon title, a deductive sermon outline; and a relevant illustration you can use however you like. In this edition, rather than an outline, we have given you

Obama's "Favorite Books of 2019" Porchlight's Personal Development & Human Behavior Book of the Year In a world where addictive technology is designed to buy and sell our attention, and our value is determined by our 24/7 data productivity, it can seem impossible to escape. But in this inspiring field guide to dropping out of the attention economy, artist and critic Jenny Odell shows us how we can still win back our lives. Odell sees our attention as the most precious—and overdrawn—resource we have. And we must actively and continuously choose how we use it. We might not spend it on things that capitalism has deemed important ... but once we can start paying a new kind of attention, she writes, we can undertake bolder forms of political action, reimagine humankind's role in the environment, and arrive at more

meaningful understandings of happiness and progress. Far from the simple anti-technology screed, or the back-to-nature meditation we read so often, How to do Nothing is an action plan for thinking outside of capitalist narratives of efficiency and techno-determinism. Provocative, timely, and utterly persuasive, this book will change how you see your place in our world.

Answering the key question of whether there is an obligation for States to define and enact sound climate policies in order to avoid the impacts of global warming, this timely book provides expert analysis on recent global climate cases, assessing not only the plaintiffs' claims but also the legal reasoning put forward by the courts. As an increasing number of environmental organisations are requiring domestic courts

to answer this fundamental question, this book illustrates that more and more court decisions are confirming that the discretion held by States with regards to the issue of climate change is not unlimited. The book explores how States must also demonstrate that sufficient action is being taken to protect their citizens from risks. With in-depth assessments of common legal grounds, such as the international climate change regime, environmental law principles and human rights, it further highlights potential issues for climate litigation including the separation of powers and the standing of the plaintiffs themselves. Addressing current and emerging issues, this timely book will be an excellent resource for scholars of environmental law, climate change and human rights. Environmental activists and organisations looking for

shopping malls, hundreds of new cities in China stand empty, with hundreds more set to be built by 2030. Between now and then, the country's urban population will leap to over one billion, as the central government kicks its urbanization initiative into overdrive. In the process, traditional social structures are being torn apart, and a rootless, semi-displaced, consumption orientated culture rapidly taking their place. Ghost Cities of China is an enthralling dialogue driven, on-location search for an understanding of

monopolists like Facebook, Google, and Bayer (which has merged with the former agricultural giant Monsanto), resulting in a greater concentration of wealth and power than we've seen since the Gilded Age. They are evolving into political entities that often have more influence than the actual government, bending state and federal legislatures to their will and even creating arbitration courts that circumvent the US justice system. How can we recover

our freedom from these giants? Anti-corruption scholar and activist Zephyr Teachout has the answer: Break 'Em Up. This book is a clarion call for liberals and leftists looking to find a common cause. Teachout makes a compelling case that monopolies are the root cause of many of the issues that today's progressives care about; they drive economic inequality, harm the planet, limit the political power of average citizens, and historically-

disenfranchised groups bear the brunt of their shameful and irresponsible business practices. In order to build a better future, we must eradicate monopolies from the private sector and create new safeguards that prevent new ones from seizing power. Through her expert analysis of monopolies in several sectors and their impact on courts, journalism, inequality, and politics, Teachout offers a concrete path toward thwarting these enemies of
