Change starts at home. In the office. Change starts with you. Your family. Your friends. Change starts with everyday things. One object at a time. Sometimes it can feel overwhelming thinking about all that needs to be done to save our planet. This book is the antidote to that feeling. Easy to read and easy to do - here's all the information and inspiration you need to make a difference, simply by making smart choices about everyday objects, tasks and habits. Environmental scientist Dr Tara Shine guides you from room to room and occasion to occasion with environmentally friendly solutions, backed by science. From swapping bottled soap to bars, to replacing cling film with a simple plate, you will reduce your environmental footprint in an instant, while saving money. This book busts persistent myths and will once and for all show that living sustainably can be both fun and convenient. Besides, it will not only have a positive impact on the environment, but your wellbeing too! 'Dr. Tara Shine is an enlightened big-picture thinker, and with this book she shows that she is equally and delightfully adept at bringing details into focus. This book is all about realising the power you have as an individual by informing yourself, asking questions and making smart choices. By getting becoming active and

joining the conversation, you become empowered and you do something about the problem we face rather than feeling powerless in its presence.' Christiana Figueres, Former Executive Secretary of the United Nations Framework Convention on Climate Change 'Tara's book reminds us we all have the power to make changes in our lives. The only way to achieve systemic change is through the actions of many. We can all make that change and bring about climate justice.' Mary Robinson, Chair of The Elders, former President of Ireland, UN High Commissioner for Human Rights and UN Special Envoy on Climate Change 'Dr Tara Shine is a much loved and admired member of the Homeward Bound team - both past participant and now faculty member in the visibility stream. She has many stories to share and is a connected and pragmatic activist. Her book should be handed round, downloaded, talked about and acted on.' Fabian Dattner, founder, Dattner Group & CEO, Homeward Bound

BUILD IT. FIX it. OWN IT. A Beginner's Guide to Building and Upgrading a PC Build It. Fix It. Own It. is the ultimate beginner's guide to building and fixing your own PC. With a friendly, knowledgeable tone, this book shows the beginning PC builder everything he or she needs to know to build a computer or upgrade an existing one. We step you through the parts that lurk inside a

PC, from the motherboard and power supply to the CPU, memory, hard drive, video card, sound card, and networking hardware. In each case, you will learn how the hardware works, what it does, what types of hardware are available, and what to look for when buying the hardware. Then we walk you step-by-step through a series of PC building projects. We show you how to build five different types of PC: a basic business PC, a home theater PC, a high-performance PC, a killer gaming PC, and a budget PC. And if building a new PC from scratch isn't in your budget, we show you how to resurrect an old PC by swapping out a few key components. When you have your PC built and running, we show you how to set up a wireless network and the BIOS and maintain your new rig. Build It. Fix It. Own It. is the ultimate PC builder's guide, even if you've never ventured inside a PC case before! Author Bio Paul McFedries is one of the industry's most well known and respected technical writers and is a passionate computer tinkerer. He is the author of more than 70 computer books that have sold more than three million copies worldwide. His recent titles include the Sams Publishing books Windows Vista Unleashed and Windows Home Server Unleashed and the Que Publishing books Networking with Microsoft Windows Vista, Formulas and Functions with Microsoft Excel 2007, Tricks of the Microsoft Office 2007 Gurus, and Microsoft Access 2007

Forms, Reports, and Queries. Paul also is the proprietor of Word Spy (www.wordspy.com), a website devoted to tracking new words and phrases as they enter the English language. Category Hardware Covers PC Hardware User Level Beginner—Intermediate

In this exceptional new second edition, the author has retained much of her earlier experiences when emigrating to the United States but adds depth and detail to the life events that have currently influenced her social values, attitudes, and behaviors. This is a supplementary textbook with the fundamental purpose of facilitating students in associating the understandings in their personal daily lives with larger social forces. The main discussion focuses on cross-cultural experiences and society with the understanding that time, society, and culture will always influence everyday lives. The following topics are featured: sociological theories and how different political and economic systems influence ways of thinking, everyday life, and social interaction with others; the importance of doing research projects, collecting data, and how to avoid common mistakes; the comparison between Chinese and American cultures, and cultural shock; how immigrants assimilate themselves into American society; deviant behavior that may be considered universal; comparison and evaluation of U.S. and Chinese social stratification;

racial group issues; comparison of U.S. and Chinese sex and gender behaviors; different approaches to the importance of family in cultures; the influence of Confucius versus Christianity; population issues including family planning and abortion; and urbanization and its effect on social change. Replete with numerous illustrations, the author provides a background of Chinese history, culture, and current issues. The book is especially important in the study of history immigration, world cultures, current American immigration, and the socialization and assimilation by the dominant culture in a society. This book serves as a significant resource for the general study of sociology and social sciences at all levels.

Industrial Product-Service Systems (IPS2), which is defined as “an integrated industrial product and service offering that delivers value in use,” has expanded rapidly over the last decade. IPS2 has allowed us to achieve both high added value and high productivity and has enriched our QOL by improving the performance of products and services. We are now struggling with many awkward issues related to sustainability, but IPS2 is expected to be the “philosopher’s stone” for solving these issues. Following the pattern of conferences held in Cranfield in 2009, Linköping in 2010, and Braunschweig in 2011, the fourth International CIRP Conference on Industrial Product-Service Systems, held on November 8-9, 2012, in Tokyo, will cover various aspects of IPS2. Topics planned for this year’s conference

reflect the latest IPS2 information in both the natural sciences and humanities and include case studies from various industries. IPS2 is still a relatively new field, so it is important to keep track of the entire context in order to promote more cross-sectional cooperation between multimodal fields and disciplines. The fourth International CIRP Conference on Industrial Product-Service Systems will serve as a vital platform for such collaborations and the discussion of new scientific ideas. Global networks, which are the primary pillars of the modern manufacturing industry and supply chains, can only cope with the new challenges, requirements and demands when supported by new computing and Internet-based technologies. Cloud Manufacturing: Distributed Computing Technologies for Global and Sustainable Manufacturing introduces a new paradigm for scalable service-oriented sustainable and globally distributed manufacturing systems. The eleven chapters in this book provide an updated overview of the latest technological development and applications in relevant research areas. Following an introduction to the essential features of Cloud Computing, chapters cover a range of methods and applications such as the factors that actually affect adoption of the Cloud Computing technology in manufacturing companies and new geometrical simplification method to stream 3-Dimensional design and manufacturing data via the Internet. This is further supported case studies and real life data for Waste Electrical and Electronic Equipment (WEEE) remanufacturing. This compilation of up to date research and literature can be used as a textbook or reference for mechanical, manufacturing, and computer engineering graduate students and

researchers for efficient utilization, deployment and development of distributed and Cloud manufacturing systems, services and applications.

Writing Music for Television and Radio Commercials (and more): A Manual for Composers and Students succinctly describes the process of composing and arranging commercials for these two very different media. Expanded from the first edition, this new volume provides a comprehensive overview of the commercial music business, while addressing the tools of composition and arranging and giving helpful instruction for jingle writing and composing for commercials. Michael Zager offers concise methods for analyzing commercials from a musical point of view, properly arranging instruments to get the desired sound, and correctly scoring for each instrument. He often uses interviews with professionals in the field to corroborate his information, and the chapters conclude with assignments for practice. This second edition has been rewritten and reformatted to increase readability and use in the classroom, and it includes new chapters on theatrical trailers, video games, Internet commercials, Web site music, and made-for-the-Internet video. An included audio CD contains examples referenced in the book. This text is a necessary tool for the music student interested in the commercial and advertising

business. It is also useful for composers studying film scoring, as well as advertising writers, art directors, and music producers.

Machine Learning can be defined in various ways related to a scientific domain concerned with the design and development of theoretical and implementation tools that allow building systems with some Human Like intelligent behavior. Machine learning addresses more specifically the ability to improve automatically through experience.

What does the title mean? It is the idea that we can approach any electrical or electronic (and mechanical) fault using a basic logical or probability-based investigation to observe and correctly identify the significant indicators that will eventually lead us to the failure or failures. This is no different from the Detective Books you read or TV Shows you watch

where the hero used a logical approach (while all those around him just ran around willy nilly) to identify the clues and catch the bad guy. This book is a complete course in Troubleshooting. Along with the written theory explaining my troubleshooting methods, there are over 80 diagrams and drawings, and 50 comprehension questions (with the answers) that will help you monitor how much you understand. This book deals with the various ways Netflix reconceptualises television as part of the process of TV IV. As television continues to undergo a myriad of significant changes, Netflix has proven itself to be the dominant force in this development, simultaneously driving a number of these changes and challenging television's existing institutional structures. This comprehensive study explores the pre-history of Netflix, the role of binge-watching in its organisation and marketing, and Netflix's position as a transnational broadcaster. It also examines different concepts of control and the role these play in the history of ancillary technologies, from the remote control to binge-watching as Netflix's iteration of giving control to the viewers. By focusing on Netflix's relationship with the linear television schedule, its negotiations of
