How To Save The World And Still Be Home For Dinner

Excessive in everything he does, Max learns an important lesson about the fragile state of the environment after he causes a power outage--inspiring him to work with others to become more "green" in order to help save the planet that he loves. Original.

Help the United Nations to save the world! On 25 September 2015, world leaders at the UN adopted 17 Sustainable Development Goals. These new Goals, which universally apply to all people, are a call to take action to end all forms of poverty, fight inequalities and tackle climate change, while ensuring no one is left behind. For the Goals to be reached, it is not just the actions of governments and businesses that are important - you can help the UN save the world, too! Produced in support of the United Nations, 17 Ways to Save the World is an accessible guide to how you can help the UN achieve their 17 Sustainable Development Goals. As well as charting the global issues identified in the Goals, this book will demonstrate how small lifestyle changes can help in solving the world's biggest issues, empowering you to actively pursue a more sustainable future. This book is the perfect tool for kids aged 9+ looking to make a meaningful difference. Immersive artwork and sensitive text presents serious, worldwide problems in an compassionate manner, encouraging both empathy and action.

"This thought experiment considers ten ways one trillion dollars could be spent for the good of humanity, from ending global poverty to reversing climate change"--

"A ravenous read." --Kirkus Reviews Shaun of the Dead meets Clueless in this hilarious YA horror comedy set at a local zombie convention--featuring a teenage girl gang that has to save the world from a horde of actual zombies. Perfect for fans of Geekerella, Undead Girl Gang, and Anna and the Apocalypse. Mega-fan June Blue's whole life has been leading up to this moment: ZombieCon!The Ultimate in Undead Entertainment has finally come to her hometown. She and her two best friends--gorgeous, brilliant Imani and super-sweet, outrageously silly Siggy--plan on hitting all the panels and photo ops, and meeting the heartthrob lead of their favorite zombie apocalypse show, Human Wasteland. It's going to be the best time of their lives--and one of their last adventures before they all split up for college. And when they arrive, everything seems perfect. June's definitely not going to let anything get in the way of the flawless con experience--even though she's endlessly anxious about the SATs and college admissions, and she can't seem to avoid her ex-best friend Blair, whose VIP badge lets her walk straight to the front of every single line. No matter what, June is determined to make the best of her dream day at ZombieCon! But something's not quite right at the con--there are strange people in hazmat suits running around, enthusiastic cosplayers taking their shambling a little too far, and someone actually biting a cast member. Then, at a panel gone wrong, June and her friends discover the truth: the zombie apocalypse is here. Now June, Imani, and Siggy must do whatever it takes to survive a horde of actual flesh-eating zombies-- and save the world. A hilarious and heartfelt horror comedy, that is an ode to zombies, friendship, and girl power. Praise for Girls Save the World in This One: "Readers looking for all of the good, the bad, and the ugly of the zombie apocalypse will be absolutely thrilled to read this book . . . . Hand this book to anyone who likes zombie apocalyptic horror." --Booklist "This fun coming-of-age story tackles popular topics such as cons and zombies with an inclusive cast of characters, and highlights the power of friendship and strong women. VERDICT: For those who love zombies and action-packed books, as well as reluctant readers."--School Library Journal "An excellent read for any teen who loves thrills, action, and stories of survival." --Publishers Weekly

'Thrilling, inspiring and informative page-turner.' Walter Isaacson, author of The Code Breaker You know what went wrong. This is the untold story of what went right. Few were ready when a mysterious respiratory illness emerged in Wuhan, China, in January 2020. Politicians, government officials, business leaders and public-health professionals were unprepared for the most devastating pandemic in a century. Many of the world's biggest slow to react or couldn't muster an effective response. It was up to a small group of unlikely and untested scientists and executives to save civilization. A French businessman dismissed by many as a fabulist. A Turkish immigrant with little virus experience. A quirky Midwesterner obsessed with insect cells. A Boston scientist employing questionable techniques. A British scientist resented by his peers. Far from the limelight, each had spent y vaccine approaches. Their work was met with scepticism and scorn. By 2020, these individuals had little proof of progress. Yet they and their colleagues wanted to be the ones to stop a virulent virus holding the world hostage. They scrambled to turn their life's work into life-saving vaccines in a matter of months, each gunning to make the big breakthrough - and to beat each other for the glory that a vaccine guaranteed. A number-one New and award-winning Wall Street Journal investigative journalist, Zuckerman takes us inside the top-secret laboratories, corporate clashes and high-stakes government negotiations that led to effective shots. Deeply reported and endlessly gripping, this is a dazzling, blow-by-blow chronicle of the most consequential scientific breakthrough of our time. It's a story of courage, genius and heroism. It's also a tale of heated rivalries, unbridled ambit unexpected drama. A Shot to Save the World is the story of how science saved the world. ***LONGLISTED FOR THE FT MCKINSEY BUSINESS BOOK OF THE YEAR 2021***

An inspiring look at young climate change activists who are changing the world The world is facing a climate crisis like we've never seen before. And kids around the world are stepping up to raise awareness and try to save the planet. As people saw in the youth climate strike in September 2019, kids will not stay silent about this subject—they're going to make a change. Meet 12 young activists from around the world who are speaking out a change. Learn about the work they do and the challenges they face, and discover how the future of our planet starts with each and every one of us.

Daily news of systemic injustice has caused activist rhetoric to balloon. Tyler Wigg-Stevenson hopes to slow this trend, suggesting that our complex global situation is forcing us to see our limits as world-changers. He calls Christians to leave aside the heady pursuit of causes and take their rightful place as standard-bearers of God?s peace.

"Pithy, funny, exasperated, and informed…You cannot read a more important hundred pages than Stop Saving the Planet!" —Richard White, author of The Republic for Which It Stands We've been "saving the planet" for decades!…And environmental crises just get worse. All this hybrid driving and LEED building and carbon trading seems to accomplish little to nothing—and low-income communities continue to suffer the worst consequences. Why aren't we cleaning up the toxic messes and rolling back climate change? And why do so many Americans hate environmentalists? Jenny Price says Enough already! with this short, fun, fierce manifesto for an environmentalism that is hugely more effective, a whole lot fairer, and infinitely less righteous. She challenges you, corporate sustainability officers, and the EPA to think and act completely anew—and to start right now—to ensure a truly habitable future.

Cities are frequently viewed as passive participants to state and national efforts to solve the toughest urban problems. But the evidence suggests otherwise. Cities are actively devising innovative policy solutions and they have the potential to do even more. In this volume, the authors examine current threats to communities across the U.S. and the globe. They draw on first-hand experience with, and accounts of, the crises already precipitated by climate change, population shifts, and economic inequality. This volume is distinguished, however, by its central objective of traveling beyond a description of problems and a discussion of their serious implications. Each of the thirteen chapters frame specific recommendations and guidance on the range of core capacities and interventions that 21st Century cities would be prudent to consider in mapping their immediate and future responses to these critical problems. How Cities Will Save the World brings together authors with frontline experience in the fields of city redevelopment, urban infrastructure, healthcare, planning, immigration, historic preservation, and local government administration. They not only offer their ground level view of threats caused by climate change, population shifts, and economic inequality, but they provide solution-driven narratives identifying promising innovations to help cities tackle this century's greatest adversities.

Latina novelist Alma Huebner is suffering from writer's block and is years past the completion date for yet another of her bestselling family sagas. Her husband, Richard, works for a humanitarian organization dedicated to the health and prosperity of developing countries and wants her help on an extended AIDS assignment in the Dominican Republic. But Alma begs off joining him: the publisher is breathing down her neck. She promises to work hard and follow him a bit later. The truth is that Alma is seriously sidetracked by a story she has stumbled across. It's the story of a much earlier medical do-gooder, Spaniard Francisco Xavier Balmis, who in 1803 undertook to vaccinate the populations of Spain's American colonies against smallpox. To do this, he required live "carriers" of the vaccine. Of greater interest to Alma is Isabel Sendales y Gómez, director of La Casa de Expósitos, who was asked to select twenty-two orphan boys to be the vaccine carriers. She agreed— with the stipulation that she would accompany the boys on the proposed two-year voyage. Her strength and courage inspire Alma, who finds herself becoming obsessed with the details of Isabel's adventures. This resplendent novel-within-a-novel spins the disparate tales of two remarkable women, both of whom are swept along by machismo. In depicting their confrontation of the great scourges of their respective eras, Alvarez exposes the conflict between altruism and ambition.

A comprehensive guide to the ways we can all make small changes in our lives to help tackle climate change - a topic which, it is now becoming clear, is of utmost importance and urgency. Together, we can change the world There is little doubt that our beautiful planet is now under huge threat; our weather is more extreme, plastic litters our oceans, industrial production and farming methods wreak havoc on the environment and mass deforestation has led to the extinction of many species. Carry on this way and it's almost certain that sea levels will continue to rise, there will be extreme heatwaves, loss of the polar ice caps and mass pollution; in short, a very worrying future for us all. We need to take action before it's too late, and we can all do our bit to help. This guide is full of simple tips we can all incorporate into our daily lives, and will demonstrate how small eco-friendly changes can have a huge positive effect on the world around us. They might even save the planet.

Have you ever looked at a problem and thought, "someone should do something about that?" That someone is you. As our world faces never-before-seen challenges, almost all of us want to try to help make our world a better place. While we all have something we care deeply about, few of us know how to turn that passion into action. With the right tools and information, we can harness our passion and the technologies we use every day to make a difference. Tech to Save the World explains how everyone can use technology to make change - even if you don't consider yourself a tech person! In this book, you will learn: Why you are the type of person who can - and will - make a difference Stories of everyday people who changed the world through idealistic innovation Skills and tools used in business and non-profits to create and test creative solutions to global challenges From the doctor who found a way to save patients in developing countries with the Solar Suitcase, to the college student who created a smartwatch application to help sufferers of PTSD, Tech to Save the World shows how the average person can build a better world. Tech to Save the World includes "blueprints" with step-by-step instructions for dreamers, professionals, and executives who want to change the world but don't know where to start.

Twelve-year-old Mya Parsons could save the world and organize her family, if only she had her own cell phone. A Dork Diaries for today's socially conscious young readers. Mya Parsons runs her school's social justice club with her best friend, Cleo. Her lifelong desire is to work for the United Nations and change the world, and then bask in all the ensuing adulation. Her more immediate desire is to get a phone, preferably one like Cleo's, with a leopard-print case to match. When her distracted dad and her long-distance mom (temporarily in Myanmar taking care of Mya's grandmother) both say no, no way, and possibly never, Mya launches a campaign to prove herself reliable and deserving. She advertises her babysitting services, takes on more responsibility around the house, and attempts to supervise her sister's skateboarding lessons. Her efforts leave her ego bruised and the kitchen slightly scorched. She's no closer to touch-screen victory, let alone the Nobel Peace Prize she deserves. But all that changes after an accident leaves Mya to take charge--an experience which helps her realize how much she's grown, with or without access to proper communications.

The James Beard Award□winning founder of Milk Bar and host of Bake Squad shares her personal stories and wisdom for igniting passion, following your joy, and creating a satisfying life. Dessert connects us heart-to-heart like almost nothing else. It brings us together in good times and bad, celebration and solace. It marks big and small milestones and creates memories of comfort and joy. And Christina Tosi, the founder and CEO of Milk Bar, believes it can save the world. Does the combination of sugar, flour, and butter have some magical ability to fix all the craziness of our modern existence? Of course not. Tosi knows a cookie is just a cookie□but bringing the joy a cookie holds into every area of your life most definitely can. The spirit of dessert□the relentless, unflinching commitment to finding or creating joy even when joy feels hard to come by□is what can save us. And then we, in turn, can each save the world. Tosi shares the wisdom she learned growing up surrounded by strong women who showed her baking□s ability to harness love and create connection, as well as personal stories about succeeding in the highly competitive food world by unapologetically being her true self. Studded with personal and unorthodox recipes, Dessert Can Save the World reveals the secret ingredients for transforming our outlooks, our relationships, our work, and our entire collective existence into something boldly optimistic and stubbornly joyful.

Sixteen biographies of extraordinary people--ranging from Sebastião Salgado to Björk and Greta Thunberg--who came of age fighting climate change Every person has a path in life, one that is intertwined with the fate of the earth. The life stories in this collection begin and end with that realization. First, as children, in different countries and eras, they witness how humans provoke environmental degradation. Each leads a life that not only minimizes their individual contribution to climate change at a local scale, but also that of their generation on a global scale. Then, as adults, they recognize the maturity and agency acquired at that moment which defined their lives. The biographies depict concrete initiatives that contribute to climate preservation, from a physicist who promotes organic farming techniques in India to a designer that only uses ecological fabrics and dyes in Italy. Rock climber Yvon Chouinard, biologist Rachel Carson, and designer Adriana Santanocito are included in this diverse cast of environmental activists. Together they show us that regardless of culture, class, or profession it is never too early or late to find your way to improve the world our children will inhabit. The stakes couldn't be higher: "Our house is on fire," as Greta Thunberg rightly said.

NATIONAL BESTSELLER · Provocative and illuminating essays from women at the forefront of the climate movement who are harnessing truth, courage, and solutions to lead humanity forward. "A powerful read that fills one with, dare I say . . . hope?"–The New York Times NAMED ONE OF THE BEST BOOKS OF THE YEAR BY SMITHSONIAN MAGAZINE There is a renaissance blooming in the climate movement: leadership that is more characteristically feminine and more faithfully feminist, rooted in compassion, connection, creativity, and collaboration. While it's clear that women and girls are vital voices and agents of change for this planet, they are too often missing from the proverbial table. More than a problem of bias, it's a dynamic that sets us up for failure. To change everything, we need everyone. All We Can Save illuminates the expertise and insights of dozens of diverse women leading on climate in the United States–scientists, journalists, farmers, lawyers, teachers, activists, innovators, wonks, and designers, across generations, geographies, and race–and aims to advance a more representative, nuanced, and solution-oriented public conversation on the climate crisis. These women offer a spectrum of ideas and insights for how we can rapidly, radically reshape society. Intermixing essays with poetry and art, this book is both a balm and a guide for knowing and holding what has been done to the world, while bolstering our resolve never to give up on one another or our collective future. We must summon truth, courage, and solutions to turn away from the brink and toward life-giving possibility. Curated by two climate leaders, the book is a collection and celebration of visionaries who are leading us on a path toward all we can save. Can we 'save the Planet'? For a resilient, durable and sustainable future for human society, we need to repurpose, reinvent, redesign, remake and recover our human-made world so that our built environment is benignly and seamlessly biointegrated with Nature to function synergistically with it. These are the multiple tasks that humanity must carry out imminently if there is to be a future for human society and all lifeforms and their environments on the Planet. Addressing this is the most compelling question for those whose daily work impacts on Nature, such as architects, engineers, landscape architects, town planners, environmental policy makers, builders and others, but it is a question that all of humanity needs to urgently address. Presented here are two key principles as the means to carry out these tasks – 'ecocentricity' being guided by the science of ecology, and 'ecomimesis' as designing and making the built environment including all artefacts based on the emulation and replication of the 'ecosystem' concept. Designing with ecology is contended here as the authentic approach to green design from which the next generation of green design will emerge, going beyond current use of accreditation systems. For those who subscribe to this principle, this is articulated here, showing how it can be implemented by design. Adopting these principles is fundamental in our endeavour to save our Planet Earth, and changes profoundly and in entirety the way we design, make, manage and operate our built environment.

We have the scientists, the entrepreneurs and the innovators. We lack the politics and policies to make your vision of a better world happen. So we need a plan to save our planet... How to Save Our Planet is your handbook of how we together can save our precious planet. From the history of our planet and species, to the potential of individuals and our power to create a better future, Maslin inspires optimism in these bleak times. We stand at the precipice. The future of our planet is in our hands. It's time to face the facts and save our planet from, and for, ourselves. _____ 'A handbook of clearly established, authoritative facts and figures about the terrible toll we as humans have taken of our planet, plus ways in which we can lessen the impact. For laypeople like me, who can see what is happening but haven't always got the precise statistics to hand, it's hugely valuable' John Simpson CBE, BBC World Affairs Editor, Broadcaster, Author & Columnist 'Saving the world is no small thing, but picking up this book's a good start' Paris Lees, Contributing Editor at British Vogue, campaigner 'I love it. My kids love it' Chris Evans, Virgin Radio Breakfast Show 'A no-nonsense crib sheet on the state of the world and how to help it' The I Newspaper

'an unpreachy guide [...] free of jargon and full of often surprising information.' The Times Change starts at home. In the office. Change starts with you. Your family. Your friends. Change starts with everyday things. One object at a time. Sometimes it can feel overwhelming thinking about all that needs to be done to save our planet. This book is the antidote to that feeling. Easy to read and easy to do – here's all the information and inspiration you need to make a difference, simply by making smart choices about everyday objects, tasks and habits. Environmental scientist Dr Tara Shine guides you from room to room and occasion to occasion with environmentally friendly solutions, backed by science. From swapping bottled soap to bars, to replacing cling film with a simple plate, you will reduce your environmental footprint in an instant, while saving money. This book busts persistent myths and will once and for all show that living sustainably can be both fun and convenient. Besides, it will not only have a positive impact on the environment, but your wellbeing too! 'Dr. Tara Shine is an enlightened big-picture thinker, and with this book she shows that she is equally and delightfully adept at bringing details into focus. This book is all about realising the power you have as an individual by informing yourself, asking questions and making smart choices. By getting becoming active and joining the conversation, you become empowered and you do something about the problem we face rather than feeling powerless in its presence.' Christiana Figueres, Former Executive Secretary of the United Nations Framework Convention on Climate Change

An informed look at the myths and fears surrounding nuclear energy, and a practical, politically realistic solution to global warming and our energy needs. Faced by the world's oil shortages and curious about alternative energy sources, Gwyneth Cravens skeptically sets out to find the truth about nuclear energy. Her conclusion: it is a totally viable and practical solution to global warming. In the end, we see that if we are to care for subsequent generations, embracing nuclear energy is an ethical imperative.

There is no greater aspiration than saving the world. Natalie Fee's upbeat and engaging book is a life-altering guide to making those changes that will contribute to helping our planet. Covering all key areas of our lives, from food and leisure to travel and sex, Natalie will galvanize you to think and live differently. You will feel better, live better and ultimately breathe better in the knowledge that every small change contributes towards saving our world.

We got ourselves into this. Here's how we can get ourselves out. We know the problem: the amount of biodiversity loss, the scale of waste and pollution, the amount of greenhouse gas we pump into the air... it's unsustainable. We have to do something. And we are resourceful, adaptable and smart. We have already devised many ways to reduce climate change - some now proven, others encouraging and craving uptake. Each one is a solution to get behind. In 39 Ways to Save the Planet, Tom Heap reveals some of the real-world solutions to climate change that are happening around the world, right now. From tiny rice seeds and fossil fuel free steel to grazing elk and carbon-capturing seagrass meadows, each chapter reveals the energy and optimism in those tackling the fundamental problem of our age. Accompanying a major BBC Radio 4 series in collaboration with the Royal Geographical Society, 39 Ways to Save the Planet is a fascinating exploration of our attempt to build a better future, one solution at a time. A roadmap to global action on climate change, it will encourage you to add your own solutions to the list.
