worse. What I can do, is help you learn how to learn at university and college. Many students come to university, or college, without any idea of how to learn. You might be one of them. You have gone through twelve, or more years of schooling, and you probably still have no idea how you learn. Just taking in information is not learning. There is a difference between obtaining a wide variety of knowledge, and actually learning how to use that knowledge, and until you understand that difference it will be difficult for you to learn. Let's start with obtaining information. You go to class, you take in information, and then you go away and forget it, as soon as you leave the classroom. That is not learning. I am not sure what I would call that, but it is definitely not learning. So, how

This book will provide insights into discovering what kind of a learner you are, how to read critically, how to think critically, some of the ways to improve your memory, how to take more effective notes in class, and how to think about the notes you take so that you can become more successful when writing an exam. It was also written with the intention that you, the student, would interact with the book. It has questions along the way, that you should answer before continuing to read the next section, to ensure that you are understanding the main concepts. This book is designed to be of assistance to first-

I tried to anticipate the questions that you might ask about the concepts, based on the questions that my students have asked me over the years. This book was written, in an effort, to get you to understand that it is important to interact with what you are learning in your classes. It was written with you in mind. In this book, I will show you how good basic business principles should be applied and followed. It is written for men and women who are already in business, those starting a business, and entrepreneurs ready to launch a new idea, and students leaving college or university wanting to make their way in business. Business is not an exact science. There is no written formula that can guarantee success, but there are basic rules that must be followed if you are to be successful. I have drawn on my past experiences in business, my failings, the shortcomings of the thousands I have mentored, and those who have consulted me. I have written what I believe is an easy-to-read, easy-to-understand guide, of the basic do's and don'ts in business. My comments are set out in a practical

There is no better advice than firsthand knowledge and experience. Businessmen want nitty gritty information that they can use and relate to their business. This is what you will get from my book.

Trust in the LORD with all thine heart, and lean not upon thine own understanding: In all thy ways acknowledge him, and he shall direct thy paths. — Proverbs 3:5-6 “ I have for years felt the need of a book to put in the hands of those beginning the Christian life that would tell them just how to make a complete success of this new life upon which they were entering. I could find no such book, so I have been driven to write one. This book aims to tell the young convert just what he most needs to know. I hope that pastors and evangelists and other Christian workers may find it a good book to put in the hands of young converts. I hope that it may also prove a helpful book to many who have long been Christians but have not made that headway in the Christian life that they long
