*Incisive insights into contemporary pop culture and its apocalyptic bent The world is going to hell. So begins this book, pointing to the prevalence of apocalypse — cataclysmic destruction and nightmarish end-of-the-world scenarios — in contemporary entertainment. In How to Survive the Apocalypse Robert Joustra and Alissa Wilkinson examine a number of popular stories — from the Cylons in Battlestar Galactica to the purging of Innocence in Game of Thrones to the hordes of zombies in The Walking Dead — and argue that such apocalyptic stories reveal a lot about us here and now, about how we conceive of our life together, including some of our deepest tensions and anxieties. Besides analyzing the dystopian shift in popular culture, Joustra and Wilkinson also suggest how Christians can live faithfully and with integrity in such a cultural context.*

*How would you go about rebuilding a technological society from scratch? If our technological society collapsed tomorrow what would be the one book you would want to press into the hands of the postapocalyptic survivors? What crucial knowledge would they need to survive in the immediate aftermath and to rebuild civilization as quickly as possible? Human knowledge is collective, distributed across the population. It has built on itself for centuries, becoming vast and increasingly specialized. Most of us are ignorant about the fundamental principles of the civilization that supports us, happily utilizing the latest—or even the most basic—technology without having the slightest idea of why it works or how it came to be. If you had to go back to absolute basics, like some sort of postcataclysmic Robinson Crusoe, would you know how to re-create an internal combustion engine, put together a microscope, get metals out of rock, or even how to produce food for yourself? Lewis Darnell proposes that the key to preserving civilization in an apocalyptic scenario is to provide a quickstart guide, adapted to cataclysmic circumstances. The Knowledge describes many of the modern technologies we employ, but first it explains the fundamentals upon which they are built. Every piece of technology rests on an enormous support network of other technologies, all interlinked and mutually dependent. You can't hope to build a radio, for example, without understanding how to acquire the raw materials it requires, as well as generate the electricity needed to run it. But Darnell doesn't just provide specific information for starting over; he also reveals the greatest invention of them all—the phenomenal knowledge-generating machine that is the scientific method itself. The Knowledge is a brilliantly original guide to the fundamentals of science and how it built our modern world.*

The Zombie Apocalypse Survival Guide for Teenagers isn't a normal book. It's not even a normal Zombie survival guide. It's a story of three teenagers enduring and surviving against the odds, adapting where many adults failed. Not many teenagers survived "The Havoc," probably because most didn't acclimate and learn like these three.So what's the secret to their survival?Good question. The answer lies in these pages, a journal written by a teenager named Chris.Each section includes some discussion questions to help you digest what you just read. These questions will point to the Bible here and there for some wisdom that has stood the test of time: wisdom for surviving your real world.

Inside these pages lies unspearable horror. Bloodsplattering, brain-impaling, flesh-devouring horror. You've probably read your fair share of zombie stories. But this time it's different. No longer can you sit idle as a bunch of fools make all the wrong moves. All hell is about to break loose—and YOU have a say in humanity's survival. You have choices to make. Moral dilemmas. Strategic decisions. Weapons. Vehicles. Will you be a hero? Or will you cover your own ass at all costs? Can you withstand the coming hours, days, weeks, and months? Or will you die amidst the chaos and violence of a zombie uprising? Or, worst of all, will you become one of them?

It seems like people are always talking about the end of the world, doesn't it? Y2K, the Mayan Apocalypse, Blood Moon Prophecies, nuclear war, killer robots, you name it. In Apocalypse Any Day Now, journalist Tea Krulos travels the country to try to puzzle out America's obsession with the end of days. Along the way he meets doomsday preppers—people who stockpile supplies and learn survival skills—as well as religious prognosticators and climate scientists. He camps out with the Zombie Squad (who use a zombie apocalypse as a survival metaphor); tours the Survival Condos, a luxurious bunker built in an old Atlas missile silo; and attends Wasteland Weekend, where people party like the world has already ended. Frightening and funny, the ideas Krulos explores range from ridiculously outlandish to alarmingly near and present dangers.

Will the world, as we know it, end in our time? It's the intention of this book to teach you what you'll need to know IF it does. Spiritual/scientific predictions, asteroid impacts, pandemics, economical/governmental collapse, solar flares, electrical grid failure, climate change, epic floods, WW3, Planet-X, peak oil, super tsunamis, alien invasions, how the government's preparing; this book has it all, and teaches how you and your family can survive it all. A complete self-help guide not only for the end times, but all global crises, of which we seem to be having plenty of lately. Written by a retired Boeing Aerospace Technician who lived six years 100% self-sufficient and cut-off from society; Dan Martin presents eye-opening views of humanity; and his insights into possible future events are breath-taking, to say the least. The book makes you wonder, is the end closer than we think? Are any of us really prepared?

How to Survive the ApocalypseZombies, Cylons, Faith, and Politics at the End of the WorlddWm. B. Eerdmans Publishing

"By the author of the award-winning To Be a Machine, a deeply considered look at the people and places in confrontation with the end of our days. We're alive in a time of worst-case scenarios: The weather has gone uncanny, volatile. Our old post-war alliances are crumbling. Everywhere you look there's an omen, a joke whose punchline is the end of the world. How are we to live in the shadow of such a grim future? What does the world hold for our children? What might it be like to live through the worst? And what is anybody doing about it? Dublin-based writer Mark O'Connell ("wryly humorous, cogently insightful"--NPR) is possessed by these questions. In Notes from an Apocalypse, he crosses the globe in pursuit of answers. He tours survival bunkers in South Dakota. He ventures to New Zealand, a favored retreat of billionaires banking on civilization's collapse. And he bears witness to those places where the future has already arrived--real-life portraits of the end of the world as we know it. In doing so, he offers us a unique window into our apocalyptic imagination. Part tour, part pilgrimage, Notes from an Apocalypse is an affecting and hopeful meditation on our alarming present tense. With insight, humanity, and wit, O'Connell leaves you to wonder: What if the end of the world isn't the end of the world?!"--

**How To Survive the Zombie Apocalypse** is a detailed prepper's guide to surviving the impending zombie apocalypse. There are three chapters: Prepping for the apocalypse, The initial outbreak, and surviving the apocalypse. If you are preparing to survive the zombie apocalypse, you need to read this book.

**A riveting and unexpected novel that questions whether a peaceful and non-violent community can survive when civilization falls apart. Again, all are asleep, but I am not. I need sleep, but though I read and I pray, I feel too awake. My mind paces the floor. There are shots now and again, bursts here and there, far away, and I cannot sleep. I think of this man in his hunger, shot like a rabbit raiding a garden. For what, Lord? For stealing corn intended for pigs and cattle, like the hungry prodigal? Helpless in a strange land. I can hear his voice. When a catastrophic solar storm brings about the collapse of modern civilization, an Amish community is caught up in the devastating aftermath. With their stocked larders and stores of supplies, the Amish are unaffected at first. But as the English (the Amish name for all non-Amish people) in the cities become increasingly desperate, they begin to invade nearby farms, taking whatever they want and unleashing unthinkable violence on the gentle communities. Written as the diary of an Amish farmer named Jacob who tries to protect his family and his way of life, When the English Fall examines the idea of peace in the face of deadly chaos. Should members of a nonviolent society defy their beliefs and take up arms to defend themselves? And if they do, can they survive? David Williams's debut novel is a thoroughly engrossing look into the closed world of the Amish, as well as a thought-provoking examination of how we live today and what remains if the center cannot hold.**

*"A kind of apocalyptic Super Size Me" (The Guardian) that is both "page-turning and thoughtful" (Financial Times) about "prepper" communities around the world that are building fortresses against an array of threats. Currently, 3.7 million Americans call themselves preppers. Millions more prep without knowing it. Bradley Garrett, who began writing this book years before the 2020 Covid-19 pandemic, argues that prepping is a rational response to global, social, and political systems that are failing to produce credible narratives of continued stability. Left with a sense of foreboding fueled by disease outbreaks, increasing government dysfunctionality, eroding critical infrastructure, nuclear brinkmanship, and an accelerating climate crisis, people all over the world are responding predictably—by bunkering down. Garrett traveled across four continents to meet those who are constructing panic rooms, building underground backyard survival chambers, stockpiling supplies, preparing go bags, hiding inflatable rafts, rigging mobile "bugout" vehicles, and burrowing deep into the earth. He has increased with "a big-thinking, deep-diving, page-turning study of fear, privilege, and apocalypse" (Robert Macfarlane, author of Underland) on the frontlines of the way we live now: an illuminating reflection on our age of disquiet and dread that brings our times into new and sharper focus. With scenes that are "fascinating, amusing, crazy, chilling, and surreally topical" (Douglas Preston, author of Lost City of the Monkey God), Garrett shows that the bunker is all around us: in malls, airports, gated communities, the vehicles we drive. Most of all, he reveals, it's in our minds.*

The classic apocalyptic novel that stunned the world.

A woman sits in prayerful meditation, waiting to offer her first confession in more than thirty years. She holds a small book on her lap, one that she's made, and tells herself again the Bible stories it contains, the ones she has written anew, for herself, each story told aslant, from Jonah to Jesus, Moses to Mary Magdalen. Woven together and stitched by hand, they provide a new version, virtually a new translation, of the holy of this ancient and sacred text. Rakow's Bernadette traces, through each brief and familiar story, a line where belief and disbelief touch, the line that has been her home, ragged and neglected, that hidden seam. The result is an amazing book of extraordinary beauty, so human and humorous, and yet so holy it becomes a work of poetry, a canticle, a song of lament and praise. In the private terrain of silence and devotion, shared with us by a writer of power and grace, Rakow offers, through Bernadette, her own lectio divina for the modern world. No reader will forget this book or be able to read the Bible itself without a new perspective on this text that remains, arguably, Western civilization's greatest literary achievement.

*In this insightful book, an underwater archaeologist and survival coach shows how understanding the collapse of civilizations can help us prepare for a troubled future. Pandemic, climate change, or war: our era is ripe with the odor of doomsday. In movies, books, and more, our imaginations run wild with visions of dreadful, abandoned cities and returning to the land in a desperate attempt at survival. In The Next Apocalypse, archaeologist Chris Begley argues that we completely misunderstand how disaster works. Examining past collapses of civilizations, such as the Maya and Rome, he argues that these breakdowns are actually less about cataclysmic destruction than they are about long processes of change. In short: it's what happens after the initial uproar that matters. Some people abandon their homes and neighbors; others band together to start anew. As we anticipate our own fate, Begley tells us that it was communities, not lone heroes, who survived past apocalypses—and who will survive the next. Fusing archaeology, survivalism, and social criticism, The Next Apocalypse is an essential read for anxious times.*
