George Simling has grown up in the city-state of Illyria, an enclave of logic and reason founded as a refuge from the Reaction, a wave of religious fundamentalism that swept away the nations of the twenty-first century. Yet to George, Illyria's militant rationalism is as stifling as the faith-based superstition that dominates the world outside its walls. For George has fallen in love with Lucy. A prostitute. A robot. She might be a machine, but the semblance of life is

perfect. To the city authorities, robot sentience is a malfunction, curable by erasing and resetting silicon minds. But George knows that Lucy is something more. His only alternative is to flee Illyria, taking Lucy deep into the religious Outlands where she must pass as human because robots are seen as mockeries of God, burned at the stake, dismembered, crucified. Their odyssey leads them through betrayal, war and madness, ending only at the monastery of the Holy Machine... Long ago, powerful priests hid an entire city within a mountain to protect it from the encroaching West. But, magic is funny. The

priests ended up cursing the very city they wished to protect.

Centuries later, when rodeo star Ashton Lanyard walked into Katherine Lowell's office, Kat thought it was just business as usual. She had no idea that she was about to be catapulted into a world of curses and magic that she never knew existed. Ashton was in town to get married, but that wasn't all he was up to.

During his time in the military, Ashton had stumbled across an ancient treasure trove filled to the brim with chests and boxes of treasures beyond belief. However, the trouble with boxes is that you never know what's inside--until

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in
