A research-based guide for educators to the practical methods of understanding, evaluating and facilitating the change process. Significantly revised based on student and instructor feedback, the new third edition of Implementing Change continues to examine the ways in which change processes are experienced by those "on the ground" while adding new features, new material and the most current research. Based primarily on the Concerns Based Adoption Model (CBAM), this user-friendly text focuses on introducing constructs that can be used by those engaged in facilitating change processes as well as those who are evaluating and studying change. Rather than maintaining a bird's eye view of change processes, each chapter introduces a research-based, research-verified construct about change that captures the complexity of implementing change and the diversity of reactions to it. With a stress on pedagogical aids, each chapter incorporates practical examples, sample research, case studies, reflection questions and examples of common roadblocks to change.

Co-written by an HR lecturer and an HR practitioner, this introductory textbook provides academic and practical insights which convey the reality of human resource management. The range of real life cases and learning features enables students to quickly understand the issues in practice as well as theory, and brings the subject to life.

Human Resource Management (HRM) takes a managerial orientation; and is viewed as being relevant to managers in every unit, project, or team. Managers are constantly faced with HRM issues, problems, and decision making and the text's primary goal is to show how each manager must be a human resource problem solver and diagnostician. This book pays attention to the application of HRM approaches in "real organizational" settings and situations. Realism, understanding, and critical thinking were important in the revision. ***This dissertation examines how human resources are managed at selected Ethiopian private companies, how Ethiopian human resource management practice is evolving and how it can be improved. The examination is qualitative and exploratory, since no comparative research on human resource management has yet been conducted at Ethiopian profit or non-profit organizations. An understanding of Ethiopian human resource management practice makes it possible to improve Ethiopian human resource management practice, and thus to increase employee productivity. The study took place at four manufacturing and four service companies in Addis Ababa, all***

*representative of their sector. The research claim is that Ethiopian human resource management practices differ from human resource management practices in the West, due to differences in cultural factors, economic systems, political systems, and legal and industrial relations. For this reason, Ethiopia s culture, politics, economy and legal and industrial relations have been analyzed. The main finding of this study is that the importance of human resource management is not uniformly understood at all the case-study companies. Although the multinational companies based in Ethiopia see their human resources as the companies most important asset, as human capital, the local companies generally do not. The fact that respondents claim that Ethiopia has limited experience in industrialization might explain why human resource management in Ethiopia is rudimentary and still has a long way to go. With this dissertation the researcher wants to contribute to improving Ethiopian human resource management practice. Moreover, this dissertation may be used as a framework for similar research in other sectors or for more specific in-depth research. This dissertation may also serve as a knowledge base for company managers, business consultants, academics and government officials of countries with a national culture similar to Ethiopia s (for example Kenya, Tanzania and Zambia), countries undergoing (or which have undergone) a recent transition to a free market economy, and countries facing similar macro-economic developments.*

Introduction to Human Resource Management

Human Resource Management

***Frank, a Political Monster: 12 Rules to Succeed in Organizations portrays the story of a remarkable man from a poor neighborhood in Caracas, Venezuela. Frank was born and raised in a household full of love, dysfunctionality, intellectuality, hunger, violence, alcohol, European customs, laughter, tears, death, and more death. By a gracious miracle, Frank ended up breaking the cycle of poverty and becoming a civil engineer, a highly successful manager in the private sector, a husband, a father, an ambitious and tenacious entrepreneur, a shrewd politician, and one of the most admired and respected persons in the country. Sadly, the demons from the past never completely left Frank and ended up destroying most of his life's accomplishments. This is a story full of ups and downs, life lessons, and mostly of an unlimited desire for chasing one's dreams. The more I read about Shackleton, the more I realized how truly heroic leadership is almost impossible to find in today's businesses. Despite all the research and programs devoted to motivating employees, most workers admit they feel disenfranchised in their daily work life. In reading the Shackleton story, it became clear to me that Shackleton's leadership lessons could benefit these very same people. This book is my attempt to bring an extraordinary explorer's leadership lessons to those business leaders who, on a daily basis, must guide their workforce towards a common goal. Because Shackleton's story is more than just one man fighting for survival in the Arctic region it is about coordinating teamwork under the most strenuous conditions. Even in the fast-paced and often unpredictable business world, leaders can use Shackleton's strategies to make every team effort a successful one. In this book are inspirational lessons from one of the greatest leaders of the 20th century lessons that can enrich both the way we work and the lives of those we lead.***
