*Composed of fifteen chapters written by experienced consumer health librarians, The Medical Library Association Guide to Providing Consumer and Patient Health Information is designed for library and information science graduate students as well as librarians new to health and medical librarianship, regardless of library setting. It is comprehensive in scope, covering all aspects of consumer and patient health and medical information from their humble, grassroots beginnings to the ever-evolving applications of new technology and social media. In between, the mundane aspects of health and medical librarianship, such as needs assessment, costs, budgeting and funding, and staffing are discussed. Adding richness to this discussion are the coverage of more sensitive topics such as patient-friendly technology, ethical issues in providing consumer and patient health information, meeting the needs of diverse populations, and responding to individuals from various cultural backgrounds. No comprehensive picture of consumer and patient health librarianship would be complete without addressing the critical importance of marketing and strategic partnerships; such discussions round out this invaluable guide. Patients today must be knowledgeable enough to participate in their health and well-being. Shorter hospital stays, changing reimbursement patterns and the gradual shift towards focusing on proactively maintaining health and managing disease require patients to be informed and actively engaged. Education, information and understanding are important components of actively-engaged patients. Correspondingly, in today's e-world, there is a glut of information resources available through the Internet – from YouTube videos to Googling to blogs and Twitter feeds. What is lacking in these information-rich times is the relevance of meaning and context for those who ask, "Does this health and medical information apply to me and my unique clinical picture?" or "How do I use this information?" As knowledge navigators, information technology wizards and content experts, librarians offer focused responses to individuals' specific and highly personal health and medical information queries. In a new healthcare world order of optimizing health and minimizing hospitalizations, such a service is invaluable. Sadly, there still exists in our highly networked and technological age an information gap for those who struggle in obtaining meaningful health or medical information. These individuals may be foreign-born, non-English speaking, poor, rural, aged or semi-literate. Whatever their status, librarians must have the wherewith-all to find germane resources and also help create responsive mechanisms to bridge that health information gap for vulnerable citizens. The Medical Library Association Guide to Providing Consumer and Patient Health Information will guide you on the road to providing that response.*

Managing Human Resources

Although the topics author N. O. Slak chooses to write about contain humor, satire, and true personal stories, The American Nutcracker is intended for those who share his opinions, yet are hesitant to convey their message for fear of being politically incorrect. Differences of opinion are encouraged in the United States and are even considered healthy by some. Slak offers his interesting viewpoint on everything from the workplace and grocery shopping to celebrities and award shows. Here are some examples: Self-proclaimed environmentalists tend to do a lot of whining, but there's not much going on as far as action. Actors, like studio executives, come and go. But why do they continue to soak up-and even beg for-those gratuitous fifteen minutes of fame? You think the State of the Union Address is long and boring? Think again. Only at award shows can you hear the most long-winded, revoluting, and obnoxious speeches. Slak is in no way bashful in his self-elected job of speaking for the silent majority. If you can't handle the truth, coupled with a little sarcasm and satire, then go ahead and put The American Nutcracker down and slowly back away.

Business Issues in the Arts

Business Issues in the Arts is a text designed to address some of the most prescient business issues that nonprofit arts organizations face today. This text is not a how-to but an in-depth dive into fourteen topics and their associated theories to augment learning in arts administration programs. With contributions from leading academics in arts administration, the book guides readers through an exploration of those topics which have been found by practitioners to be most vital and least explored. Chapters include numerous case examples to illustrate business theory in the artistic and creative environment. The academic contributors themselves each come with both professional backgrounds and research experience, and they are each introduced at the start of their chapters, allowing for a collection of voices to navigate through some oftentimes challenging topics. This book is designed for an advanced undergraduate course or a stand-alone graduate course on the intersection of business and management and the cultural and creative industries, especially those focusing on business issues in the arts.

*Highly acclaimed in its first two editions, Ian R. McWhinney's Textbook of Family Medicine is one of the seminal texts in the field. While many family medicine texts simply cover the disorders a practitioner might see in clinical practice, McWhinney defines the principles and practices of family medicine as a separate and distinct field of practice. The initial sections cover basic principles and philosophies of family medicine and a later section discusses approaches to common diseases encountered in practice. The discussions not only address these clinical problems, but each is a workshop for incorporating what it means to be a family physician into everyday practice. The new edition is updated throughout with help from a group of reviewers and a new coauthor, Thomas Freeman, Chairman of the Department of Family Medicine at the University of Western Ontario, where McWhinney is Professor Emeritus.*

*Human resource information systems (HRIS) has become a crucial area of attention for management professionals. A major challenge in teaching the course is its cross-disciplinary nature. HR students find it difficult to grasp the IT//IS side of the subject and vice versa. To overcome the technical nature of most of the books in the market Human Resource Information Systems has a balanced approach in dealing with HR and IT//IS issues by drawing from experts in both areas. Rather than depending on expensive commercial software products to demonstrate the applications of HRIS, this book uses case studies at the end of most chapters to facilitate discussions and link them to managerial and technical problems in HRIS.*

A lot has changed since 1985, when this landmark collection of human resource forms was last published. New legislation, the ongoing modernization of company practices, and drastic changes in the workplace have led to a slew of new challenges for HR professionals. Forms Used in Human Resources tackles these challenges head on. It is fully revised with up-to-date forms for areas such as domestic partnership, the ethical use of computer software, and requests for translation services. Forms Used in Human Resources is for anyone faced with the difficult task of creating or redesigning human resources forms. It features contributions from over 55 U.S. and Canadian companies and includes 350 commonly used HR forms. It can be used as a source to create new forms or as a standard for evaluating your company's current forms with those used by others. Forms in this book have been designed to meet the needs of the companies using them. They have already been put to use by companies such as the Principal Financial Group, the Southwestern Life Corporation and Mutual of New York, so you know they work well in the workplace. And with so comprehensive a source, there is no longer any need to spend hours doing research or struggling to create a new form. Practical examples are right there at your fingertips-examples that will save you valuable time and money.

Research has shown that adult learners prefer a problem solving approach to learning rather than subject centered. This text provides a non-traditional approach to teaching and learning the basics of human resource management through a series of 120 'in-basket' exercises and guided questions. The in-basket exercises focus on real-life problems and issues that confront school administrators on a daily basis. As a result, it scores very high in student interest and satisfaction. A brief history of assessment centers and a synopsis of recognized adult learning theories are also included. Covering 12 HR categories, the exercises are devoted to: recruitment; legal/policy; selection/credentials; collective bargaining; data analysis/budgeting; investigations; employee relations/public relations/counseling; evaluation; contract administration; discipline; planning/problem solving; and grievance(s)/arbitration.
