A provocative exploration of the tension between our evolutionary history and our modern woes—and what we can do about it. We are living through the most prosperous age in all of human history, yet we are listless, divided, and miserable. Wealth and comfort are unparalleled, but our political landscape is unmoored, and rates of suicide, loneliness, and chronic illness continue to skyrocket. How do we explain the gap between these truths? And how should we respond? For evolutionary biologists Heather Heying and Bret Weinstein, the cause of our troubles is clear: the accelerating rate of change in the modern world has outstripped the capacity of our brains and bodies to adapt. We evolved to live in clans, but today many people don't even know their neighbors' names. In our haste to discard outdated gender roles, we increasingly deny the flesh-and-blood realities of sex—and its ancient roots. The cognitive dissonance spawned by trying to live in a society we are not built for is killing us. In this book, Heying and Weinstein draw on decades of their work teaching in college classrooms and exploring Earth's most biodiverse ecosystems to confront today's pressing social ills—from widespread sleep deprivation and dangerous diets to damaging parenting styles and backward education practices. Asking the questions many modern people are afraid to ask, *A Hunter-Gatherer's Guide to the 21st Century* outlines a science-based worldview that will empower you to live a better, wiser life.

In his original version of Long-Range Precision Rifle, U.S. Army sniper and avid precision rifle and long-range rifle shooter, competitor, and enthusiast Anthony Cirincione II put extreme accuracy with a precision rifle within the reach of any shooter. His instruction was based on 26 months of combat deployments in Iraq and Afghanistan and his training of squad-designated marksmen for his battalion. His precision-shooting book proved to be an instant best-seller. In this expanded edition, Cirincione adds five new sections:

"External Ballistic Truing." Although he briefly detailed the process of external ballistic truing in the first edition, given the level of importance to midrange and long-range target engagement, he believes that the process of truing deserves a detailed description. "Determining Fast and Correct Windage Adjustments or

Holds."Cirincione covered the creation of a custom windage card for specific guns and pet loads in the first edition, but this added windage section shares his current process. The old way works fine, but his new method is faster and more precise, and doesn't require you to look at a card. As always, the process can be applied to any caliber you are using. "Midrange and Long-Range Target Engagement: Magneto Speed V3 Ballistic Chronograph vs. External Ballistic Truing." This section features a report Cirincione sent to the U.S. Army Sniper School outlining the testing of a barrel-mounted chronograph. The test pitted the device against his current method of external ballistic truing, given target engagements from 100 to 1,000 yards. It gives you a couple of different options to get on target at extended range. "How to Build a Switch-Barrel Rifle, and the Process of Swapping Barrels." As Cirincione has moved away from factory bolt-action rifles and into custom-built guns, he thought readers would appreciate information on how to build one. Not only that, but he also includes specific information on how to remove and add barrels of different calibers to that same stock and action. "Suppressed Subsonic Shooting." This section is about precision shot placement with subsonic ammo out to 400 yards. Long-Range Precision Rifle: Expanded Edition lays out the most up-to-date methods for getting the most out of whatever rifle you are using. After discussing rifle, ammunition and optic selection, Cirincione reveals his tried-and-true methods of gathering and recording data. He takes you step-by-step through the process of discovering how to make your rifle perform at its peak with every shot. You will also learn how to adjust for environmental factors and obstructions that lie between you and your target, and discover why handloading and building your own precision cartridges is an extra step well worth taking. "Anthony Cirincione was an amazing teacher while helping me get ready for sniper school. His knowledge and meticulous rifle setup techniques were instrumental to my success. u dents and further help the sniper community."

The Long Range Precision Rifle: 3RD Expanded Edition contains the most up-to-date information and methods for getting the most accuracy out of your rifle.
