I fili invisibili della naturaAltri fili invisibili della naturaThe Great BattleCliffhangerRandom House

This volume seeks to uncover the multifarious roles played by nymphs in literature, drama, music, the visual arts, garden architecture, and indeed intellectual culture tout court, and thereby explore the true significance of this well-known figure for the early modern age.

Another classic picture book from the Smarties Prize–winning partnership behind Tadpole’s Promise “On top of a mountain there lived a fat mammoth. Down in the valley there lived a thin caveman. The caveman was hungry. Very, very hungry. He saw the mammoth and licked his lips.” Fed up with eating seeds, fed up with eating weeds . . . a mammoth can start looking pretty delicious to a hungry caveman! But a mouthwatering Mammoth Pie turns out to be more difficult to come by than the caveman could ever imagine.

John Dee’s Five Books of Mystery

Italian Futurist Poetry

giochi e giocattoli 1750/1960

The Notebook

Discovered in a hidden compartment of an old chest long after his death, the secret writings of John Dee, one of the leading scientists and occultists of Elizabethan England, record in minute detail his research into the occult. Dee concealed his treatises on the nature of humankind’s contact with angelic realms and languages throughout his life, and they were nearly lost forever. In his brief biography of John Dee, Joseph Peterson calls him a “true Renaissance man”? detailing his work in astronomy, mathematics, navigation, the arts, astrology, and the occult sciences. He was even thought to be the model for Shakespeare’s Prospero. All this was preparation for Dee’s main achievement: five books, revealed and transcribed between March 1582 and May 1583, bringing to light mysteries and truths that scholars and adepts have been struggling to understand and use ever since. These books detail his system for communicating with the angels, and reveal that the angels were interested in and involved with the exploration and colonization of the New World, and in heralding in a new age or new world order. While Dee’s influence was certainly felt in his lifetime, his popularity has grown tremendously since. His system was used and adapted by the Hermetic Order of the Golden Dawn, and subsequently by Aleister Crowley. This new edition of John Dee’s Five Books of Mystery is by far the most accessible and complete published to date. Peterson has translated Latin terms and added copious footnotes, putting the instructions and references into context for the modern reader.

"This is the first volume exclusively devoted to the Expositio by Berthold of Moosburg (c.1295-c.1361) on Proclus' Elements of Theology. The breadth of its vision surpasses every other known commentary on the Elements of Theology, for it seeks to present a coherent account of the Platonic tradition as such (unified through the concord of Proclus and Dionysius) and at the same time to consolidate and transform a legacy of metaphysics developed in the German-speaking lands by Peripatetic authors (like Albert the Great, Ulrich of Strassburg, and Dietrich of Freiberg). This volume aims to provide a basis for further research and discussion of this unduly overlooked commentary, whose historical-philosophical importance as an attempt to refound Western metaphysics is beginning to be recognized. The publication of this volume has received the generous support of the European Research Council (ERC) under the European Union’s Horizon 2020 research and innovation programme through the ERC Consolidator Grant NeoplAT: A Comparative Analysis of the Middle East, Byzantium and the Latin West (9th-16th Centuries), grant agreement No 771640 (www.neoplat.eu). Contributors are: Henryk Anzulewicz, Alessandra Beccarisi, Dragos Calma, Michael W. Dunne, Tommaso Ferro, Stephen Gersh, Wouter Goris, Paul Hellmeier, Evan King, Theo Kobusch, Ezequiel Ludue ñ a, Alessandro Palazzo, Fiorella Retucci, Sylvain Roudaut, Loris Sturlese”--

Did you know that: Sea otters can spend months in the water without returning to land? Flying fish can glide for 300 ft over the water? A Praying Mantis can rotate its head 180 degrees? Become an expert on all things that swim, fly, walk, hop, slither, and crawl! In a celebration of the many animals that share our planet, this gorgeously illustrated atlas explores over 250 different animals across the seven continents. Learn where different animals live, what they eat, how they communicate, and many more fascinating facts!

Once Upon a Star

The Great Battle

Hippos navigate by it, sloths keep in touch through it, rabbits eat it... and most grown-ups prefer not to mention it at all However you look at it, poo is probably the most useful stuff on Earth. It comes in all shapes and sizes, and every animal has its own special sort. Find out what it's for, where it goes, what we can learn from it and lots more.

"Benvenuti a PepitiHouse! PepitiHouse è la casa dei Pepiti, tre gatti molto vivaci e intraprendenti! C'è Dobby, nera come la notte e morbida come il velluto, c'è Gingy gattone buono e infine c'è MiniMinù, tutta bianca e peperina: ogni giorno una ne pensano e cento ne fanno! Chicca, la loro coinquilina umana, racconta ai bimbi le avventure che vivono insieme. Benvenuti! Che ne dite di entrare per dare un'occhiata e conoscere i Pepiti e le loro storie?"

Quello di Carlo, protagonista del racconto, è un mondo antico e magico, pullulante di ricordi: “Somiglia la nostra vita a un fiume che prima di arrivare alla foce ha visto specchiarsi nelle sue acque albe radiose, tramonti infuocati, notti stellate; ha attraversato sentieri a tratti regolari e a tratti scoscesi e tortuosi, valli solitarie e boschi rigogliosi...” Ma, tra i vividi colori della memoria, i pensieri si ammantano di una luce nuova e trionfa il desiderio di vivere la bellezza dell’attimo fuggente.

The Renewal of Medieval Metaphysics

Every so often a love story captures our hearts and becomes more than just a story - it becomes an experience to treasure and to share. The Notebook is such a book. It is a celebration of a passion both ageless and timeless, a tale of laughter and tears, and makes us believe in true love all over again. At thirty-one, Noah Calhoun is rebuilding his life on the coast after the horrors of World War II, but he is haunted by images of the girl he lost more than a decade earlier. Allie Nelson is about to marry into wealth and security, but she cannot stop thinking about the boy who stole her heart years ago. And so begins an extraordinary tale of a love so strong it turns tragedy into strength and endures everything . . . 2014 marks the 10th anniversary of the film adaptation of The Notebook starring Ryan Gosling and Rachel McAdams. This new edition includes gorgeous colour photographs from the film, author Q & A, discussion questions and an exclusive chapter from The Longest Ride, the new Nicholas Sparks novel.

I fili invisibili della natura

La città, l'uomo e il suo radicamento

Il viaggio dell'anima

Questa storia narra di una bambina chiamata Nadine, che con fede sincera si affida segretamente a Madre Natura. La fanciulla sin da tenera età scopre di avere predilezione per la danza, che col passare degli anni si tramuta in vera e propria vocazione. Nonostante i desideri di Nadine vengano ostacolati continuamente dalle avversità della vita, un giorno fortunatamente conosce la Libellula Jolie, che l'aiuta a realizzare magicamente il sospirato sogno. La danza è nobile arte, forma d'espressione innata nell'uomo, impulso alla vita e all'unione; è potere magico, forza del volere, sogno che alimenta la speranza, tra quotidiane avversità: è porta misteriosa per accedere con aggraziata eleganza e coinvolgimento dei sensi, al profondo di noi stessi.

In this fascinating book, the author traces the careers, ideas, discoveries, and inventions of two renowned scientists, Athanasius Kircher and Galileo Galilei, one a Jesuit, the other a sincere man of faith whose relations with the Jesuits deteriorated badly. The Author documents Kircher's often intuitive work in many areas, including translating the hieroglyphs, developing sundials, and inventing the magic lantern, and explains how Kircher was a forerunner of Darwin in suggesting that animal species evolve. Galileo's work on scales, telescopes, and sun spots is mapped and discussed, and care is taken to place his discoveries within their cultural environment.

While Galileo is without doubt the "winner" in the comparison with Kircher, the latter achieved extraordinary insights by unconventional means. For all Galileo's fine work, the author believes that scientists do need to regain the power of dreaming, vindicating Kirchner's view.

Entering a convent at nine years old to be trained for combat, Nona begins learning the ways of blade and fist. But when her violent past is revealed, she finds herself at the center of a battle for a crumbling empire in a dying universe.

From climbing and abseiling to canoeing and a Crazy Bucket Race, Tim's adventure holiday promises to be full of action. There's just one problem: he is hopeless at sports of any kind. Can Tim survive the horrors of a week absolutely packed with activity?

Can his team - the Tigers - be the overall champions? There are some surprises in store for everyone!

"Italian Futurist Poetry" contains more than 100 poems (both Italian and English versions) by sixty-one poets from across Italy.

Acting as a first book of whales, A Book About Whales teaches young readers everything they need to know about the largest mammals on earth: how they have evolved over millions of years, what and how they eat, their migration patterns, and more!

Andrea Antinori's whimsical black-and-white illustrations bring their underwater world to life. The book discusses a variety of whales one by one so readers learn to tell the differences between a blue whale and a humpback whale, among others, and what makes each of these whales unique. Packed with facts and playful in tone, this book is a must-have for young and curious nature lovers. It includes a bibliography and index.

Adults and children alike will be enchanted by these charming board books which are distinguished by the exceptional quality of the sounds that bring every picture to life. Aimed at the very young, the

books have a button on every spread which triggers one of six different nature sounds.

In questa opera di Achille Loria, la biografia del grande Thomas Robert Malthus, economista e demografo inglese.

Reminiscent of Scheherazade and One Thousand and One Nights, Gianni Rodari's Telephone Tales is many stories within a story. Every night, a traveling father must finish a bedtime story in the time that a single coin will buy. One night, it's a carousel that adults cannot comprehend, but whose operator must be some sort of magician, the next, it's a land filled with butter men who melt in the sunshine Awarded the Hans Christian Anderson Award in 1970, Gianni Rodari is widely considered to be Italy's most important children's author of the 20th century. Newly re-illustrated by Italian artist Valerio Vidali? (The Forest)?, Telephone Tales? entertains, while questioning and imagining other worlds.

A Publishers Weekly best book of 1995! Dr. Michael Guillen, known to millions as the science editor of ABC's Good Morning America, tells the fascinating stories behind five mathematical equations. As a regular contributor to daytime's most popular morning news show and an instructor at Harvard University, Dr. Michael Guillen has earned the respect of millions as a clear and entertaining guide to the exhilarating world of science and mathematics. Now Dr. Guillen unravels the equations that have led to the inventions and events that characterize the modern world, one of which -- Albert Einstein's famous energy equation, E=mc2 -- enabled the creation of the nuclear bomb. Also revealed are the mathematical foundations for the moon landing, airplane travel, the electric generator -- and even life itself. Praised by Publishers Weekly as "a wholly accessible, beautifully written exploration of the potent mathematical imagination," and named a Best Nonfiction Book of 1995, the stories behind The Five Equations That Changed the World, as told by Dr. Guillen, are not only chronicles of science, but also gripping dramas of jealousy, fame, war, and discovery.
