*Developing a Mixed Methods Proposal by Jessica T. DeCuir-Gunby and Paul A. Schutz is a practical, hands-on guide helps beginning researchers create a mixed methods research proposal for their dissertations, grants, or general research studies. The book intertwines descriptions of the components of a research proposal (introduction, literature review, research methods, etc.) with discussions of the essential elements and steps of mixed methods research. Examples from a real-world, interdisciplinary, mixed methods research study demonstrate concepts in action throughout the book, and an entire sample proposal appears at the end of the book, giving readers insight into every step up to completion. Readers who complete the exercises in each chapter will have an individualized, detailed template for their own mixed methods research proposal. Developing a Mixed Methods Proposal is Volume 5 in the SAGE Mixed Methods Research Series. This three-volume bibliography of printing, published 1880-6, quickly became a classic reference work, and is still of value today.*
