EVALITA (<http://www.evalita.it/>) is the reference evaluation campaign of both Natural Language Processing and Speech Technologies for the Italian language. The objective of the shared tasks proposed at EVALITA is to promote the development of language technologies for Italian, providing a common framework where different systems and approaches can be evaluated and compared in a consistent manner. This volume collects the final and extended contributions presented at EVALITA 2011, the third edition of the evaluation campaign. The 36 revised full papers were carefully reviewed and selected from a total of 87 submissions. The papers are organized in topical sections roughly corresponding to evaluation tasks: parsing - dependency parsing track, parsing - constituency parsing track, domain adaptation for dependency parsing, named entity recognition on transcribed broadcast news, cross-document coreference resolution of named person entities, anaphora resolution, supersense tagging, frame labeling over Italian texts, lemmatisation, automatic speech recognition - large vocabulary transcription, forced alignment on spontaneous speech.

Dr Mohammad Nurunnabi examines the factors that affect the implementation of International Financial Reporting Standards (IFRS) in developing countries and answers these specific research questions: - What is the relative impact of accounting regulatory frameworks and politico-institutional factors on the implementation of IFRS in developing countries? - How do cultural factors affect said implementation? - How does a study of implementing IFRS help to build an understanding of a theory of the role of the state in accounting change in developing countries? This follows a mixed

methodology approach, in which interviews are conducted, IFRS-related enforcement documents and annual reports are evaluated. More than 138 countries have adopted IFRS, yet the International Accounting Standards Board (IASB) does not provide an implementation index. Financial reporting varies by country, even within the area of the world that has apparently adopted IFRS and Nurunnabi offers an important viewpoint that considers the issues of IFRS implementation from various perspectives. This is an invaluable resource for Undergraduate, Masters and PhD students, policy makers (at local, regional and international level) namely the IASB, World Bank, IMF, practitioners and users, giving them the necessary insight into the financial reporting environment and the state's attitude towards accounting transparency. Most importantly, this book contributes to military and democratic political regimes and the Max Weberian view of the theory of the role of the state's attitude towards accounting transparency.

may not be one right answer, but many possibilities. Primarily Creativity bubbles over with ideas to spark creative talent in young students. Get creative juices flowing with lessons in eight areas of creativity including: curiosity, fluency, originality, imagination, awareness, flexibility, elaboration and perseverance. Each section includes an explanation on the skill, questions that foster this type of thinking, a list of tasks, and several attractive, reproducible worksheets. This comprehensive text provides an enjoyable, balanced introduction to creative thinking. For more problem ideas on integrating creativity in your classroom, see Primarily Problem Solving. Grades 1-3

Our experts have created Mathematics: 15 Years Solved Papers for JEE Main and Advanced keeping in mind a distinct pattern emerging 2000 onwards and have covered all previous year questions from 2004. We have chosen solved questions from the year 2004 in order to appraise students of at least two years' of 'subjective type' (numerical value) questions asked in the IIT entrance exam.
