These guidelines are a set of rules
that have been developed to
accompany and complement the
official conventions and instructions
provided within the ICD-10-CM
itself. The instructions and
conventions of the classification
take precedence over guidelines.
These guidelines are based on the

Codebook Icd 10 Cm The Complete Official Codebook coding and sequencing instructions in the Tabular List and Alphabetic Index of ICD-10-CM, but provide additional instruction. Adherence to these guidelines when assigning ICD-10-CM diagnosis codes is required under the Health Insurance Portability and Accountability Act (HIPAA). The diagnosis codes (Tabular List and Alphabetic Index) have been adopted under HIPAA for all healthcare settings. A joint effort between the healthcare provider and the coder is essential to achieve complete and accurate documentation, code assignment, and reporting of diagnoses and procedures. These guidelines have been developed to assist both the

ICD-10-PCS 2018: The Complete Official Codebook contains the complete ICD-10-PCS code set and supplementary appendixes required for reporting inpatient procedures. This illustrated codebook presents the code set in 17 sections of tables arranged by general procedure type.

Tables within the extensive Medical and Surgical section are additionally sectioned out by body system, indicated by color-coded page borders. ICD-10-PCS contains classifications for procedures, devices and technologies. Features and Benefits * Content updates to reflect the 2018 code set * NEW! Spiralbinding allows for

convenient lay-flat use of the book. * Illustrations of body parts

accompanying the Character Meaning Tables. These tables are located at the beginning of each body system in the

Medical/Surgical section. *

Complete set of ICD-10-PCS codes. View all 17 sections of tables by general procedure type from medical/surgical to new technology. * Official coding

guidelines. Learn how to use the code set appropriately following the guidelines specific for each

section. * Intuitive features and format. Handy code tables build the code through character value selections that reflect the procedure performed. Now with

body part definitions included in the root operation tables for the Medical/Surgical section. *

The International Statistical Classification of Diseases and Related Health Problems, 10th Revision (ICD-10), published by the World Health Organization (WHO), is the foundation of ICD-10-CM. ICD-10 continues to be the classification used in cause-of-death coding in the United States. The ICD-10-CM is comparable with the ICD-10.

ICD-10-CM far exceeds its predecessors in the number of concepts and codes provided. The disease classification has been expanded to include health-related conditions and to provide greater specificity at the sixth and seventh character level. The sixth and seventh characters are not optional and are intended for use in recording the information documented in the clinical record. All official authorized addenda since the last complete update (October 1, 2017) have been included in this revision. The 2018 ICD-10-CM files below contain information on the ICD-10-CM updates for FY 2018. These 2018 ICD-10-CM codes are

The Centers for Medicare and Medicaid Services (CMS) and the National Center for Health Statistics (NCHS), two departments within the U.S. Federal Government's Department of Health and Human Services (DHHS) provide the following guidelines for coding and reporting using the International Classification of Diseases, 10th Revision, Clinical Modification (ICD-10-CM). These guidelines should be used as a companion document to the official version of the

ICD-10- CM as published on the NCHS website. The ICD-10-CM is a morbidity classification published by the United States for classifying diagnoses and reason for visits in all health care settings. The ICD-10-CM is based on the ICD-10, the statistical classification of disease published by the World Health Organization (WHO). These guidelines have been approved by the four organizations that make up the Cooperating Parties for the ICD-10-CM: the American Hospital Association (AHA), the

adopted under HIPAA for all healthcare settings. A joint effort between the healthcare provider and the coder is essential to achieve complete and accurate documentation, code assignment, and reporting of diagnoses and procedures. These guidelines have been developed to assist both the healthcare provider and the coder in identifying those diagnoses that are to be reported. The importance of consistent, complete documentation in the medical record cannot be overemphasized. Without such documentation accurate coding cannot be achieved. The entire record should be reviewed to determine the specific reason for

the encounter and the conditions treated. The term encounter is used for all settings, including hospital admissions. In the context of these guidelines, the term provider is used throughout the guidelines to mean physician or any qualified health care practitioner who is legally accountable for establishing the patient's diagnosis. Only this set of guidelines, approved by the Cooperating Parties, is official. The guidelines are organized into sections. Section I includes the structure and conventions of the classification and general guidelines that apply to the entire classification, and chapter-specific guidelines that correspond to the

chapters as they are arranged in the classification. Section II includes guidelines for selection of principal diagnosis for non-outpatient settings. Section III includes guidelines for reporting additional diagnoses in non-outpatient settings. Section IV is for ICD-10-CM Official Guidelines for Coding and Reporting FY 2018. outpatient coding and reporting. It is necessary to review all sections of the guidelines to fully understand all of the rules and instructions needed to code properly. you will learn facility-based coding by actually working with codes.

This comprehensive guide provides an in-depth understanding of inpatient diagnosis and procedure coding if you 're just learning to code, or are an experienced professional who needs to solidify and expand your knowledge. It combines basic coding principles, clear examples, plenty of challenging exercises, and the ICD-10-CM and ICD-10-PCS Official Guidelines for Coding and Reporting to ensure accuracy using the latest codes. From leading medical coding authority and AHIMA-approved ICD-10 Trainer Karla Lovaasen, this expert resource offers all a well-rounded understanding of the necessity and functions of

ICD-10-CM/PCS coding. ICD-10-CM and ICD-10-PCS Official Guidelines for Coding and Reporting provide fast, easy access instruction on proper application of codes. 30-day access to TruCode® encoder on the Evolve companion website provides you with realistic practice with using an encoder. Coverage of both common and complex procedures prepares you for inpatient procedural coding using ICD-10-PCS. Illustrations and examples of key diseases help in understanding how commonly encountered conditions relate to ICD-10-CM coding. Coding examples and exercises let you apply concepts and practice coding with ICD-10-CM/PCS codes. Illustrated, full-color design

emphasizes important content such as anatomy and physiology and visually reinforces key concepts.

Coverage of medical records provides a context for coding and familiarizes you with documents you will encounter on the job.

Coverage of common medications promotes coding accuracy by introducing medication names commonly encountered in medical records. NEW! information. UPDATED! codes for
Pancreatitis, Diabetic Retinopathy,
Fractures, GIST Tumors,
Hypertension and Myocardial
Infarctions.

ICD-10-CM 2017 The Complete
Official Codebook presents the
complete code set of chapters
within a tabular list of diseases and
injuries. It includes everything an
outpatient or inpatient coder needs
to code diagnoses to the highest
level of specificity! The book
translates the confusing
ICD-10-CM Coding Guidelines into
simple English. The guidelines are
then formatted into simple form so
students or working coders can
find the guideline they need easily
and quickly.
