Go the Distance! Whether you're running a race or running a company, pacing is everything. Go too fast and you'll burn yourself out—too slow and you're left in the dust. So how can leaders find the right speed? Growth expert Alison Eyring, who is also a long-distance runner and triathlete, found the answer in endurance training. It's a concept she calls Intelligent Restraint. Eyring shows leaders how to evaluate their company's and team's current capacity for growth and identify the right capabilities and pacing strategies to increase growth steadily and sustainably. She masterfully weaves physiological and psychological research, in-depth business case studies, examples from real leaders, and practical tools with her own narrative of endurance training. The result is a revolutionary new mindset for enduring success. This book contains papers in the fields of Interactive, Collaborative, and Blended Learning; Technology-Supported Learning; Education 4.0; Pedagogical and Psychological Issues. With growing calls for affordable and quality education worldwide, we are currently witnessing a significant transformation in the development of post-secondary education and pedagogical practices. Higher education is undergoing innovative transformations to respond to our urgent needs. The change is hastened by the global pandemic that is currently underway. The 9th International Conference on Interactive, Collaborative, and Blended Learning: Visions and Concepts for Education 4.0 was conducted in an online format at McMaster University, Canada, from 14th to 15th October 2020, to deliberate and share the innovations and strategies. This conference's main objectives were to discuss guidelines and new concepts for engineering education in higher education institutions, including emerging technologies in learning; to debate new conference format in worldwide pandemic and post-pandemic conditions; and to discuss new technology-based tools and resources that drive the education in non-traditional ways such as Education 4.0. Since its beginning in 2007, this conference is devoted to new learning approaches with a focus on applications and experiences in the fields of interactive, collaborative, and blended learning and related new technologies. Currently, the ICBL conferences are forums to exchange recent trends, research findings, and disseminate practical experiences in collaborative and blended learning, and engineering pedagogy. The conference bridges the gap between 'pure' scientific research and the everyday work of educators. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, school teachers, industry-centric educators, continuing education practitioners, etc.

An essential guide to the highly recommended Floortime approach for treating children with any of the autism spectrum disorders (ASD). From the renowned child psychiatrist who developed the groundbreaking Floortime approach for children with autism spectrum disorder, Engaging Autism is a clear, compassionate roadmap for parents. Unlike approaches that focus on changing specific behavior, Dr. Greenspan's program promotes the building blocks of healthy emotional and behavioral development, showing that children with ASD do not have a fixed, limited potential, and may often join their peers to lead full, healthy lives. With practical advice for every scenario you may face with your autistic child at any age—including sensory craving, overactivity, avoidant behavior, eating, toilet training, developing social skills, and more—Engaging Autism offers hope for families and redefines how we see children with ASD. Praise for Engaging Autism “This is a valuable book: valuable to parents who worry about their child, valuable to professionals who are consulted, valuable to the teams (parents and professionals) who are looking for interventions for this frightening disorder, and the DIR programs are exciting innovations and dramatically effective.”—T. Berry Brazelton, MD, Clinical Professor of Pediatrics Emeritus, Harvard Medical School “Dr. Greenspan provides lots of practical methods for engaging children with autism in meaning interactions with parents and teachers.”—Temple Grandin, author of Thinking in Pictures

It is assumed that the reader has a background in mathematics, including calculus. Integrated navigation systems are the combination of an onboard navigation solution (position, velocity, and attitude) and independent navigation data (aids to navigation) to update or correct navigation solutions. In this book, this combination is accomplished with Kalman Filter algorithms.

A clear, comprehensible, and practical guide to the essentials of computer cryptography, from Caesar's Cipher through modern-day public key. Frames of Reference for Pediatric Occupational Therapy, Fourth Edition, uses frames of reference for diagnostic categories (neuro-development, social participation, etc.) as effective blueprints for applying theory to pediatric OT practice. Updated with new chapters, case examples, and a new focus on evidence-based practice. This proven approach helps students understand the "why" of each frame of reference before moving on to the "how" of creating effective treatment programs to help pediatric clients lead richer, fuller lives. The book first covers the foundations of Frames reference for pediatric OT (Section I), and then covers commonly used frames of reference such as motor skill acquisition, biomechanical, and sensory integration (Section II). A final section discusses newer focused/specific frames of reference like handwriting skills and social participation. A standardized format within each frame of reference chapter covers the same elements (Theoretical Base, Supporting Evidence, the Function/Dysfunction Continuum, Guide to Evaluation, and Application to Practice) to help students build the knowledge and skills needed for effective practice.
